## **All Electric Will Save Lives**

Wow I sat in on the recent CA workshop on Health Impacts of Gas Stoves. Gas in our homes is bad for our health based on the science. Yes ventilation does help but we can do much better with all electric appliances. I support all electric for new construction as soon as possible. Like 2022 or 2023. We need to help the existing housing stock to be upgraded to gas free to save lives and improve health. We have plenty of experience to demonstrate that even in the distribution system for natural gas there are grave risks like explosions and major leaks.

Please vote to get gas out of our homes and building now.
