We can't wait on All-Electric Reach Codes

I am strongly in favor of California moving toward clean, all-electric buildings statewide and ending our investing in polluting and expensive infrastructure that will soon be obsolete. Climate change is a threat multiplier. Our California droughts and mega-fires are worsening and I am deeply concerned about whether our youth will have the chance to live out their lifetime on a livable planet. We cannot wait an additional three years to take action. The CEC must commit to an all-electric energy code in the 2022 cycle as one important step in addressing the climate emergency.
