Easier and Safer to Install Solar Water Heaters at lower cost

Thank you for your important STW staff workshop Zoom. My name is Al Rich and I have been in solar thermal for 41 years. I am the inventor of the "Skyline" solar water heating collector, please see www.SolarRoofs.com. This lightweight, much easier to install collectors may solve a number of problems discussed in the staff workshop. Please click the Commercial tab to see the Kunde Winery and the Kruger Pickle factory, and then to "Going Commercial" at the bottom of the page:
<https://solarroofs.com/going-commercial/>

I would like to work with anyone there interested in this technology. I can send more pictures and technical details.

Thank you,
Al
