Requiring LED lights for cannabis cultivation

I have a state-licensed cannabis farm in Northern California that is constantly struggling with ongoing compliance fees, conflicts with federal regulation, pests, COVID economy, and California's devastating wildfires. This particular fire season has left us barely surviving financially. The idea of more cost to update our lighting is unrealistic with the challenges faced as a legal cannabis farmer. I urge you to do the right thing and NOT require LED lighting. Stomping out the legal farmers only encourages illicit activity.
