

DOCKETED

Docket Number:	20-SPPE-01
Project Title:	Great Oaks South Backup Generating Facility Small Power Plant Exemption
TN #:	235588
Document Title:	Agenda for the Public Scoping Meeting for the Great Oaks South Backup Generating Facility
Description:	November 17, 2020 Public Scoping Meeting
Filer:	Patty Paul
Organization:	California Energy Commission
Submitter Role:	Commission Staff
Submission Date:	11/13/2020 3:28:19 PM
Docketed Date:	11/13/2020

Agenda

Great Oaks South Backup Generating Facility Public Scoping Meeting

Held Remotely via Zoom – 11:00 a.m. November 17, 2020

Please see TN 235506, Notice of Public Scoping Meeting, for instructions on how to join the meeting via Zoom

1. Introductions (approximately 5 minutes)
2. Staff Presentation - Purpose of Public Scoping Meeting and CEQA Review and Small Power Plant Exemption Process (5 minutes)
3. Applicant overview of proposed project (15 minutes)
4. Public Advisor's Office public participation presentation (5 minutes)
5. Discussion of technical areas with potential significant impacts before mitigation. Public questions and comments follow each technical discussion topic.
 - a. Geology and Soils
 - b. Cultural and Tribal Cultural Resources
 - c. Biological Resources
 - d. Transportation
 - e. Air Quality (including public health)
 - i. Approach/Options for Modeling Readiness Testing: maximum modeled project impacts plus maximum background or temporal pairing of project impacts with background.
 - ii. Approach/Options for Modeling Emergency Operations: modeling assumptions (number of generators, load, duration, background air quality conditions, meteorological conditions, at fence line or sensitive receptors), significance threshold.
 - iii. Use of NO_x offsets when Determining Significance of Impacts

f. Greenhouse Gas Emissions

- i. Routine maintenance and testing: whether BAAQMD's current threshold of significance or a new threshold should apply, any options available if mitigation is determined to be necessary.

- ii. Electricity use: whether participation in City of San Jose's 100 percent clean energy program is required to avoid potential significant GHG impact.

- iii. Emergency Operations: Based on the emergency operation scenarios provided in Air Quality section of the EIR, estimate the annual GHG emissions and describe mitigation measures.

g. Alternatives

6. Additional Questions and Comments (as time allows)

7. Adjourn meeting
