We Need 100% Clean Electricity by 2030

I will be graduating soon, but it has happened much too many times where school has been cancelled due to wildfires. The impact of climate change is becoming more evident as these fires continue to rage on all throughout the state. I implore you to please take action on finding renewable clean energy sources so that we don't have to suffer through these wildfires and other climate issues. The state of California needs to have 100% Clean Electricity by 2030.
