## **The State Should Consider the following**

The State should consider more ambitious actions in accelerating 100% clean energy by 2030. The state should consider more ambitious actions because recently the wildfires have hit 112 degrees which have altered how students, workers, and our loved ones live making it more difficult and dangerous to simply breathe the air. We can't wait another 25 years to achieve 100% clean energy so we ask that the state take more action in speeding p this 100% clean energy by 2030 and zero greenhouse gas emissions in the electricity sector by 2035. In 30 years who knows in what world we will be living in , so its best to make sure we are working towards a future where our kids, friend's, and loved one can feel safe.
