We need 100% clean electricity by 2030!

Hello, I am a young African American student at UCLA! I have witnessed people from all age groups, social classes, racial backgrounds, etc experience the harmful affects of climate change. Living in the Valley, I have been in the heat of recent wildfires and experienced the toxic air the results from them. Therefore, I am asking the state to set a more ambitious goal to accelerate the production of 100% Clean Electricity by 2030! We need to target the nonrenewable and wasteful energy sources and make our buildings, cars, home lights, and more 100% clean electricity. While having the goal set to 2045 was a good start, we have witnessed that time is a pressing manner that needs to be addressed as soon as possible. Please take what I have said into consideration. Thank you.
