## **We need 100% Clean Energy by 2030**

As a young student, I have witnessed my friends have class cancelled due to the excessive fires. I live in Bakersfield and I have experienced extremely warm weathers passing 100 degrees. Climate change continues to decline putting the public at risk. Unfortunately, the scary effects is something I am going to have to witness as I get older and the negative effects with that as well. It is only going to get worse. That is why the state should commit to 100% clean energy.
