As a California resident who is extremely concerned about the climate crisis, I strongly urge the Commission to adopt an all electric standard for buildings and to make that standard effective in 2022. All electric retrofit is costly and time consuming and the faster an all electric standard is adopted, the fewer buildings will need to be retrofitted.

I am glad that many California jurisdictions have adopted all electric Reach Codes. Now we need a state wide standard. Thank-you.

Karen Jacques, Resident - City of Sacramento
