I strongly encourage the CEC to mandate 100% electric homes for all of California. The time has come for us to stop installing fossil fuel infrastructure in our state. Let's avoid the stranded costs of gas lines and gas appliances. Let's save homeowners money and provide them clean and healthy homes. Let's reduce our climate emissions by shifting to our ever

cleaner California electricity. There is no reason to wait. The economics are clear - this will save consumers money. The health impacts are clear. The climate impacts are clear.

Let's keep California a leader on electrification and on climate.
