RE: Comments in Response to Introduction to Flexible Demand Appliance Standards
[Docket Number 20-FDAS-01]

LG Electronics appreciates the opportunity to submit comments to the CEC Flexible Demand Appliance Standards Docket number: 20-FDAS-01. Senate Bill 49. We appreciate the collaboration that continues to be encouraged by the California Energy Commission and shared between its stakeholders.

LG Electronics is the world's leading consumer and commercial electronics company with approximately \$56 billion in annual sales in 2020, 40,000 employees and over 20 manufacturing and technology research centers around the globe. LG Electronics launched its first connected refrigerator in 2002. Since then, we have launched wider range of new generation connected appliances, including smart air conditioners, smart ranges, smart microwaves, smart dishwashers, smart washers and dryers, and smart water purifiers under a single platform named ThinQ. We continue to be a leader and innovator of connected and energy saving technologies. We, also, have been working with various partners to bring energy saving opportunities with our demand response ready products.

LG Electronics looks forward to participating in the stakeholder process as this proceeding develops. If we can offer any technical assistance during the process, please let us know.

Sincerely,
