All Electric is the right thing for our children and grandchildren

This is no time to build homes that will make it harder on the consumer to convert to an all electric grid of the future. We must stop relying on fossil fuels altogether. Please take this opportunity to do the right thing for the children and their children. Short sightedness in the pursuit of saving a few dollars or bowing to political or financial power will be paid for in the end, just remember who you are passing that debt to and know they won't pay with dollars. They will pay with food and water scarcity that dollars won't fix.
