Please commit to an all-electric standard in the 2022 code

I am writing to urge the adoption of an all-electric code to get the gas out of new buildings. An all-electric standard will reduce climate emissions and air pollution, benefit public health, and reduce the costs to build and operate new buildings, including new homes. This step is necessary for California to sufficiently cut greenhouse gas emissions.

Please commit to an all-electric standard in the 2022 code.
