**Subject:** Question RE: Fracking for Geothermal?????

Good morning,

The California Energy Commission's, Docket Office has received your e-mail. To appropriately handle your e-mail, please provide a proceeding number to reference.

Thank you,

Chester Hong

In Mr Koslowsky's latest missive, he proposes his latest supposed PV and wind killer: fracking for geothermal sources. I have questions about this, and this Baseload Capital corporation Koslowsky mentions would do well to examine such questions. One of the better-known "features" of hydraulic fracturing in locations such as Oklahoma has been an eruption of earthquakes where they were previously very rare. Just what then is the likely result of excavating deep caverns with the hope of harnessing geothermal energy here in our state, where we are all told on the regular that the question of "the big one" is "not if, but when"?
