Hello,

Related to classroom CO2 monitors, AB 841 Section 1625 (a) (4):

“The monitor maintains a record of previous data that includes at least the maximum carbon dioxide concentration measured.”

Please clarify the record requirements. Will the record also include date and time? How many records are to be kept and for how long? Will only a single record of the maximum CO2 observed be required?

Clarification will allow the correct CO2 monitor and configuration to be specified.

Regards,

**Santa Maria Joint Union
High School District**
