## **Title 13A**

We at Winston Cone Optics, along with the University of CA Merced, are privileged to embark on a major CEC project to bring our green technology to market. Nearly 20 years ago, we came to California and establish our relationship with the CEC through the great Art Rosenfeld whom I had previously known at the Univ of Chicago. We were fortunate to have won our first opportunity to begin research projects that demonstrate our non-tracking high-temperature technology with solar thermal. With this newest project, we hope to bring it to market.
