Calpine Russell City Energy Center Restart

I am in complete agreement with Mayor Halliday, that his power plant not be allowed to restart until the failure has been determined and corrective measures in place. Though the debris from this explosion did not cause any injury, the potential is there if it happens in the future.

Calpine only wants to mitigate financial loss, and re-start the plant early. Typical of managers that only have profit and loss in mind.

Please keep this plant off-line till the cause is determined and required safeties are in place. When that happens and all inspections are satisfied, then permitting them to proceed is fine.
