Oppose restarting Russell City Energy Power plant, I work on Bay Center Place in Hayward

Good day,

I work in Hayward off of Whitesell St. I also own a private business - I reside in and have purchased a family home elsewhere in the city.

I support the City of Hayward in their opposition to restarting the 'RUSSELL CITY ENERGY' power plant without further investigation and/or review. This possible reopening was necessitated and preceded by a catastrophic event: An explosion event where *shrapnel* was launched into the air of the surrounding neighborhood - and it is a neighborhood, This area is not just daytime-use industrial buildings.

If the company is truly in compliance then how could there have been a catastrophic explosion event of this magnitude - one that sent shrapnel far away and outside the confines of the plant and its properties? Commissioners, metal SHRAPNEL flew into the air and landed. This event should not be minimized.

Why would this power plant or any other be rubber-stamped to reopen without more information? Please investigate this explosion first. Common sense should prevail, nothing less than common sense. There was an explosion with shrapnel!

Thank you for reading.
