Docket Number: 01-AFC-07C

Explosion on May 26, 2021

As of today's date, no cause has been determined for the explosion. How can that be? As a resident of the community who lives within a 2 mile radius of the power plant I am extremely concerned about the safety of my family and the quality of air that we breathe. Until the cause of the explosion is determined I will be communicating with the elected officials in Hayward and Alameda County to oppose the request for the Russell City Energy Plant to resume functioning. If you lived in this community, this would be totally unacceptable.
