## **Explosion at Russell power plant**

If I didn't work at Chabot College I wouldn't have know about a explosion on May 28,2021. I don't remember hearing about it on the news either or getting an alert through my phone. This is concerning that pollution from the explosion & debris flying through the air isn't warrant an alert. I work in the athletic department at Chabot if this had happened during the day with athletes running during practice or games they would have breath this in. We are to close to this power plant not to be notified with a text alert. It shows this company doesn't care if it affect the community around them. If this area was an higher economic area & not concerned lower economic this plant wouldn't be here in the 1st places . This company wants to ignore issue with the plant over profit it can gain. Please investigate before they restart & have protocol in place before allowing them to restart .
