WDS:

Name: DOUELLE TRUCKING
Address: 555 E Capitol Ave
City: MILPITAS
Facility ID: San Francisco Bay 43I006894
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 2
Facility Telephone: 4082637300
Facility Contact: ARMAND KUNDE
Agency Name: ARMAND KUNDE
Agency Address: PO Box 610190
Agency City,St,Zip: San Jose 951610190

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 10/19/1990
Comments: ON CORTESE LIST SAMPLE RESULTS ONE SOIL SAMPLE SHOWED ELEVATED TOTAL PETROLEUM HYDROCARBONS (HIGH BOILING POINT, 34000 PPM) AND OIL & GREASE (23000 PPM). NO BTXE & VERY LOW CONCEN- TRATIONS OF CR, PB, & ZN IN SOIL. SITE SCREENING DONE SITE HAS SURFACE SOIL CONATMINATED WITH OIL AND GREASE IN 2 AREAS. AREAS OBSERV- ED BY MILPITAS FIRE DEPT WHILE THE RP WAS REMOVING 2 UNDERGROUND FUEL TANKS. CONTAMINATION APPEARS TO BE LOCALIZED SURFACE SOIL CONTAMINATION WITH OIL AND GREASE. RECOMMEND PRELIMINARY ENDANGER- MENT ASSESSMENT (LOW PRIORITY).

Status: Completed - Case Closed
Status Date: 09/18/2014
Case Worker: Not reported
RB Case Number: 03-026
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 06S1E17L03f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: 9/87 - high vapor readings in tank monitoring wells and fp detected. Subsequent subsurface investigation (3 borings) found no soil contamination and low groundwater contamination. 11/89 USTs replaced. Groundwater and fp were encountered in the tank pit at 12.5 ft bgs. 2/90 - drilled 3 borings and 4 mws onsite. Found high concentrations in wells MW1 and MW4. 1/91 - 4 mws installed. Periodic groundwater monitoring began 2/91. 11/91 - Aquifer testing conducted. 6/92 - installed air sparge wells, vapor extraction wells, and 1 extraction well. Vapor extraction test concluded would be feasible at this site. 10/92 - customer hit impact valve and released product to the surface. Approximately 3,000 gals of water was removed from the stormdrains. 8/93 - dual completion air sparge/vapor extraction wells installed. 8/00 piping replaced. 6/01 - well MW7 destroyed due to expansion of Light Rail Line. 4/22/09 - requested CAP to reduce source remaining at the site. And revise site conceptual model - majority of wells are submerged. DPE test conducted followed by sulfate injection. Confirmation soil sampling conducted in May 2013.

Potential Contaminants of Concern: Gasoline, MTBE / TBA / Other Fuel Oxygenates
Site History: 1988 - a waste oil UST was removed following product being found in a nearby Pacific Bell utility vault. Soil concentration collected around the waste oil tank was 13 ppm TPHd. Monitoring wells (MW1 through MW3) were installed with total depths ranging from 27.5-28 feet below the ground surface (ft bgs). When wells were developed no free product or sheen was found. Between January and May 1989, 4 additional monitoring wells were installed on an adjacent property. Samples collected indicated 20 ppm TPHg in soil samples and 800 ppb TPHg in groundwater samples. In 1990, monitoring detected HVOC's. The maximum concentrations detected in groundwater collected was 1,100 ppb TPHg, 680 ppb TPHd, 180 ppb Benzene, 74 ppb Toluene, 24 ppb Ethylbenzene, 58 ppb Xylenes. During this year, MW3 and MW4 were destroyed due to commercial development of the adjacent lot. MW1 and MW2 remained; however, grading and landscaping inadvertently covered them. In November, 15 soil borings were drilled (B1 to B15) and 5 were converted to monitoring wells AW1 to AW5 with depths of 30-34 ft bgs. In 1992 a groundwater extraction system was installed, but only appears to have operated for a few months. No other information was available. In October 1995, 15 soil samples were collected from the base of the removed product line, each approximately 3 feet bgs. Up to 14,000 ppm TPHg and 27 ppm Benzene were detected. In November 2003, the Santa Clara Valley Water District closed the investigation at this site. In September, 2007, 7 soil borings (B1 through B7) were advanced onsite as part of a due diligence assessment. TPHd and TPHg were reported at maximum concentrations of 130 ppm and 250 ppm, respectively in boring B4 at a depth of 17 ft bgs. TPHg, Benzene and TPHd were detected in groundwater at maximum concentrations of 22,000 ppb, 1100 ppb and 1,000,000 ppb, respectively. On December 26, 2007, the fuel leak investigation case was re-opened. All USTs, fuel dispensers, and product lines were removed. The site is now a vacant, unpaved lot. In August, 2008, soil excavation was conducted. Confirmation soil samples were collected on the sidewalls and bottom of the excavation. TPHg and TPHd were reported at maximum concentrations of 440 ppm and 12 ppm, respectively. Additional excavation was conducted in October in this area. Excavation on the eastern portion of the site was conducted in December 2008 and February 2009. Other areas reported to have TPHg in soil above 320 ppm (site specific threshold level calculated by RBCA process) were excavated in March 2009. Approximately 2,854 tons of soil were removed from the site between August 2008 and March 2009. A soil gas survey was conducted in May 2009. Maximum concentrations were reported of 17,000,000 micrograms per cubic meter (ug/m3) TPHg, 3,300 ug/m3 Benzene, 100,000 ug/m3 Ethylbenzene, 390,000 ug/m3 Xylenes, 23,000 ug/m3 MtBE, and 270 ug/m3 Ethanol, which are above residential ESLs. Also at this time, borings were advanced across the site for collection of soil and grab groundwater samples. Maximum concentrations were reported in grab groundwater samples of 1,100,000 ppb TPHg, 200,000 ppb TPHd, 2,100 ppb Benzene, 9,400 ppb Ethylbenzene, 9,000 ppb Xylenes, 12 ppb Toluene, 100 ppb MtBE, 3,200 ppb TBA9.2 ppb DiPE, and 7.4 ppb TOG. In December 2012, additional soil was excavated from the site. This activity was followed by confirmation groundwater and soil vapor sampling.

Site Description: the RP's cleanup actions. DHS will recover 100 percent of its direct costs plus staff costs and overhead related to the project. The RP will continue to fund remedial investigation and cleanup actions.

Hazardous Waste Desc: This site is the location of an ongoing tile manufacturer. It is located in an industrial area of the City of Milpitas.

Threat To Public Health & Env: Approximately 600 cubic yards of lead-contaminated soil remains onsite. Ground water contamination has not been confirmed by samples taken and analyzed to date.

Site Activity Status: The Primary threats to the public health and environment are surface water migration and subsequent direct contact. The site is fenced, and access is limited to workers only. Lead absorption by both man and animals could occur through direct contact with the contaminated soils. Lead contaminated soil may migrate offsite with draining storm water.

Site soil sampling and removal has been conducted several times. This iterative approach is ongoing. Approximately 600 cubic yards of contaminated soil remain onsite. Ground water samplings show metals in normal concentrations. The RP is studying the feasibility of capping the site for commercial use.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

Violations:

Site ID: 97796
Site Name: BD BIOSCIENCES
Violation Date: 09-27-2018
Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes: Returned to compliance on 11/09/2018. Manifests 01043120FLE (shipped on 4/5/17) and 01043302FLE (shipped on 4/20/17) shipped-off a wastestream in line #1 that was identified as "UN2209, Waste Formaldehyde solutions, 8, PGIII". Manifests do not have the reportable quantity (RQ) identified on the manifest despite the RQ for a D002 characteristic waste is 100 pounds. Additionally, Formaldehyde has a RQ of 100 pounds. Per 49 CFR 172.203(c)(2), the letters "RQ" must be entered on the shipping papers either before or after the basic description or alternatively, the letters "RQ" may be placed in the 9a (HM) box.

Violation Date: 09-27-2018
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 11/09/2018. Observed 1 x ultrasonic cleaner in old instrument manufacturing area that was labeled IPA/water. Ultrasonic cleaner is plumbed with a release tube leading into neighboring sink. Make a hazardous waste determination on any spent IPA/water solution, and if found to be hazardous, begin managing it as a hazardous waste. Observed 1 x tray of chemical containers ranging in size from approximately 1 pint to 4 liters in the hallway outside of room C1L-016. Make a hazardous waste determination on these chemical containers, and if found to be hazardous, begin managing them as a hazardous waste. Observed hand solder stations utilizing lead-containing solder in the tech lab, instrument manufacturing area, and the old instrument manufacturing area. It could not be determined how solder scrap or spent sponges were being managed. Make a hazardous waste determination on solder scrap and spent sponges, and if found to be hazardous, begin managing them as a hazardous waste. [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-27-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. Consent to
inspect was granted by Dina Craw. Facility performs research and
development, testing, and manufacturing of medical devices. Hazardous
waste is generated in laboratories, and is managed under point of
generation (satellite accumulation) rules. The facility's hazardous
waste contractor consolidates hazardous waste weekly and moves it to
the hazardous waste storage shed located in the northwestern part of
the property. Hazardous waste is stored there until a pick-up occur.
FOLLOW-UP REQUIRED: 1) Provide a written explanation of how facility
personnel is trained to use 2-part epoxy, and how any used or spent
applicators are managed. NOTES: -When cleaning equipment, facility
generates a waste (BD Facsflow Sheath fluid-201) that according to the
safety data sheet is non-hazardous. -Monthly safety checks are
performed in labs to identify off-spec chemicals. Any off-spec
chemicals are then managed as a [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-16-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The facility used non-calibrated pH meter/strips and got low pH readings. After calibrating the pH meter and using the correct pH strips, the facility is in compliance with pH requirements. I did not observe any active discharge, stains on the ground and sediment tracking at this facility.

EXIDE CORPORATION (Continued)

S101482332

Alternate Address: 700 MONTAGUE EXPRESSWAY
Alternate City,St,Zip: MILPITAS, CA 95035
Background Info: Only sulfuric acid solution, used to recharge the batteries, was on-site after May 1981. The property was sold in 1983 and leased back to Exide until 1986. Sales and service operations (batteries and battery packs containing five gallons of sulfuric acid) moved to 3740 Depot Road, Hayward, California in January 1986. There was a surface impoundment pond that was closed in 1981 under oversight by Regional Water Quality Control Board (RWQCB). Waste settling ponds from the southeast corner of the seven and half acre site were excavated and filled with clean fill. This was originally under Interim Status but changed to generator only, after manufacturing ceased in 1981. The building was demolished in 1995 and new buildings were built on site. Currently on site is Central Storage, a self- storage unit business, which also sells packing supplies. The site is concreted with restricted access and landscaping on the street side along the building. The site is zoned as M2, heavy industrial, by the City of Milpitas. The site is bounded by Montague Expressway to the north, railroad tracks to the west and industrial properties to the east and south. There is residential property located to the southeast approximately one-quarter mile from the site on Gladding Court and Watson Court. The Globe Union Battery Plant occupied the site from 1956 to 1966. ESB, Incorporated (became Exide Corporation in 1983) operated a manufacturing facility of lead acid batteries from 1966 to 1981. All lead-acid battery manufacturing ceased by May 1981 and the facility was used for formulation, recharging and repairing batteries (primarily for forklift batteries and large power batteries) until it was closed.

Comments Date: 06011986
Comments: The closure in 1986 was under a DHS approved closure plan, which
Comments Date: 06011986
Comments: included contaminated soil removal (for lead) and groundwater
Comments Date: 06011986
Comments: testing. The cleanup level was set at less than (<) 1000 parts
Comments Date: 06011986
Comments: per million (ppm) of lead at a minimum depth of one foot below
Comments Date: 06011986
Comments: ground level. Most of the area was excavated to the depth of

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 04/12/2018
Comments: DTSC requested files from Santa Clara County's Department of Environmental Health (DEH) to perform a Site Screening. The PDF file received from DEH included documentation that showed 1503 Gladding Court was a portion of the building located at 720 Montague Expressway, closure plans, waste manifests, hazardous waste generator permit applications, and other records used to identify the operations conducted at 1503 Gladding Court.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 12/21/2009
Comments: A Closure Plan for the waste water treatment system at BJS Electronics was submitted to Santa Clara County's Department of Environmental Health on December 21, 2009, which contained a Tank Assessment and Removal Report as well as a closure application for above-ground hazardous materials storage facilities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1 Addendum
Completed Date: 02/05/2007
Comments: Ceres Associates sent a February 5, 2007 letter to Far East National Bank with the conclusion of their third party review of a Phase I Environmental Site Assessment report prepared by ERAS and Phase II Subsurface Investigation report prepared by Tetra Tech. Ceres

Associates concurred with Tetra Tech's recommendations that no further investigation was needed at the site and the wastewater treatment system should be closed in accordance with applicable regulatory guidelines. The executive summary from Tetra Tech's report and the majority of the ERAS Phase I Environmental Site Assessment are attached to the copy of the letter that DTSC obtained from the County of Santa Clara Department of Environmental Health's records.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 01/29/2007
Comments: A Phase I Environmental Site Assessment was prepared for 720 Montague Expressway by ERAS Environmental. The report concludes that there is no evidence of contamination to soil or groundwater at the property from historical uses.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/14/2004
Comments: Vertex Engineering Services, Inc. prepared a Phase II Subsurface Investigation for 720 Montague Expressway. Only the executive summary is available, which recommends no further investigation at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 05/21/2018
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective action. Integrated Packaging Assembly Corp. (IPAC) operated at the Site from 1997 until 2004, manufacturing semiconductors and used lead finishing and electroplating in their manufacturing processes. The facility was located in a portion of the building located at 720 Montague Expressway. Phase I and Phase II investigations were conducted at the Site after IPAC ceased operations, and no evidence of historical activities at the Site contributing to contamination of soil or groundwater was found. There were no documented chemical releases at the Site. Closure of the permit by rule units at the Site were done under the oversight of the Santa Clara County Department of Environmental Health. DTSC concluded that no further action is required at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 05/27/2011
Comments: The County of Santa Clara's Department of Environmental Health issued a letter to BJS Electronics, formerly Integrated Packaging Assembly Corp, stating that they received and reviewed the post closure report and that the permit by rule units were considered closed and no longer subject to operating standards.

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Description: Failure to determine if the waste generated is a hazardous waste.

Violation Notes: Returned to compliance on 04/17/2018. Facility generates two waste oxidizers consisting of nitric acid or micro etch (Potassium peroxymonosulfate). 1x55 gal drum of waste micro etch that was undergoing gravity separation of metals was tested using a potassium starch iodide test strip and yielded a positive test result. Determine if these etchants/strippers are RCRA regulated oxidizers per 261.21/66261.21. If they are determined to be RCRA regulated oxidizers at point of generation, they are prohibited from being treated under the Permit-by-rule permit. No RCRA regulated oxidizers are allowed to be treated under any tiered permit. If they are determined to be non RCRA regulated oxidizers, provide reasoning.

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 04/17/2018. Observed significant amounts of drag-out and crystallized solids around many of the plating baths. Ensure drag-out is not going directly on the floor or secondary containment and perform routine cleaning of any spilled solutions. Also observed significant solid build up in fume hoods above the plating baths. Clean these more frequently to avoid storing hazardous waste in an unpermitted location. REPEAT VIOLATION FROM 2015 INSPECTION. Additionally, observed cyanide bath and rinse on-site in corner of plating area that hasn't been used for over 3 years with no future plans to use this material. Continued presence on-site may result in unintended consequences including accidental mixing with near by acid waste streams. Ensure a licensed contractor removes this waste for proper disposal.

Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)

Violation Description: Failure to maintain the required documents, including waste analysis plan, contingency plan, training documents, Phase I Environmental Assessment, written inspections schedules, etc. at the facility where the FTU is operating and upon request make these documents available to the authorized agency, DTSC, the CUPA, or EPA, or local government agency.

Violation Notes: Returned to compliance on 05/08/2018. Facility is currently using a daily checklist to monitor containers/drums. You must additionally conduct inspections specific to the treatment system. Include information regarding maintenance on system such as probe calibration and filter cleaning. REPEAT VIOLATION FROM 2015 INSPECTION

Violation Date: 04-07-2015
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 05/13/2015. Observed the following containers of unknown liquids for which a hazardous waste determination must be made: 1x 1 gal container labeled acetone containing an oily solution - in scrubbing area near press. 1x1 gal container unlabeled containing an oily solution - in the shed in rear of property. 4x 55 gal containers labeled non hazardous containing vacuum dust/debris containing copper - outside in rear of property.

Violation Date: 04-07-2015
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/13/2015. Observed significant amounts of drag-out and crystallized solids around many of the plating baths. Ensure drag-out is not going directly on the floor or secondary containment and perform routine cleaning of any spilled solutions. Also observed significant solid build up in fume hoods above the plating baths. Clean these more frequently to avoid storing hazardous waste in an unpermitted location.

Site ID: 390568
Site Name: CORDOVA CIRCUITS INC
Violation Date: 04-07-2015
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 05/13/2015. It was made evident that some employees involved in the management of hazardous waste are not sufficiently trained in hazardous waste management responsibilities (eg container marking).

Citation: 22 CCR 15 66265.192(k) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(k)
Violation Description: Failure of the new hazardous waste tank assessment to include all of the following information: 1) Tank configuration (i.e., horizontal, vertical), material of construction, and gross capacity (in gallons); 2) Design standard(s), if available, according to which the tank and ancillary equipment were or will be constructed and all of the following information; A) Material of construction; B) material thickness and the method used to determine the thickness; C) description of tank system piping (material, diameter); D) description of any internal and external pumps; and E) sketch or drawing of tank including dimensions. 3) Documented age of the tank system (if tank was previously used), if available, (otherwise, an estimate of the age); 4) Description and evaluation of any leak detection equipment; 5) Description and evaluation of any corrosion protection equipment, devices, or material; 6) Description and evaluation of any spill prevention or overfill equipment; 7) Description and evaluation of secondary containment for the tank system (secondary containment must meet minimum standards as specified in subsections (j)(1) through (j)(3) of this section) including applicable secondary containment for ancillary equipment as required in subsection 66265.193(f); 8) Hazardous characteristics of the waste(s) that have been or will be handled; 9) Prior to placing a new tank system or component in use, an independent, qualified installation inspector or an independent, qualified, professional engineer, registered in California, either of whom is trained and experienced in the proper installation of tank systems, shall inspect the system or component for the presence of any of the following items and document in writing the results of the inspection: A) Weld cracks or breaks; B) scrapes of protective coatings; C) corrosion; D) any structural damage or inadequate construction or installation such as cracks, punctures, damaged fittings. All discrepancies shall be documented in the assessment and remedied before the tank system
Violation Notes: Returned to compliance on 04/17/2018. There is no documentation on-site or with county records indicating a hazardous waste tank system assessment was ever performed. Repeat violation from 2010 inspection. Ensure assessment includes all parts of the treatment system including holding tanks and ancillary piping.

Eval Notes: Note1: Per manifests and data from state tracking website, facility generates between 3,500 and 4,000 lbs/month of RCRA waste. Most of this waste is from D004, arsenic bearing waste. Per owner, no arsenic is used in his process and safety data sheets from products used do not disclose presence of arsenic. Speak to waste haulers and determine whether or not D004 should apply to the waste. Note2: A new gold line

has been created approximately 2 years ago. Containerized drag-out (gold and cyanide) from this line has not yet been disposed of. Note 3: Broken grate flooring was observed during the tour which may present a significant safety hazard for the workers and anybody walking in this area. Ensure floor is replaced and manage old flooring as hazardous waste. Note 4: Waste treatment system has various support components that are significantly degraded including the steps and hand rail leading up to the treatment system. Ensure this is addressed immediately.

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Not reported
Site History: Site is a former transformer factory with volatile organic compounds (VOC) and polychlorinated biphenyl (PCB) impacts. Site has been remediated but a deed restriction requires installation of vapor barriers under new structures. Site is being redeveloped into housing.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D011
Waste Description: SILVER

Waste Code: D018
Waste Description: BENZENE

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 11-12-2014
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 12/16/2014. While some facility personnel are trained adequate to their respective job responsibilities, not all workers who may potentially handle hazardous waste have been sufficiently trained.

Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)
Violation Description: Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act.
Violation Notes: Returned to compliance on 12/16/2014. Waste Analysis plan was provided at time of inspection but found to be incomplete. Plan states a composite samples is taken and analyzed for the metals and pH. Facility personnel confirmed that this is not being done. Facility is unsure as to why certain metals are stated in manifests, profiles and LDRs to be in the treated waste (eg. lead). Facility generates waste microetch (Sodium monopersulfate) with sulfuric acid in a 55 gal drum which is then emptied into the treatment system. Facility is unsure as to the oxidizing potential of this waste and whether or not it is a regulated oxidizer as defined in 261.21(a)(4).

Hazardous Waste Summary:

Waste Code: D001

Waste Description: IGNITABLE WASTE

Waste Code: D002

Waste Description: CORROSIVE WASTE

Waste Code: D003

Waste Description: REACTIVE WASTE

Waste Code: D007

Waste Description: CHROMIUM

Waste Code: F006

Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil Vapor

Potential Contaminants of Concern: Not reported
Site History: JCI Jones operated a chemical packaging and distribution facility at the Milpitas location from the early 1960s through 1999. Historically, the facility received bulk chemicals, including chlorine gas, sulfur dioxide, anhydrous ammonia, various acids and bases, and volatile organic compounds (VOCs) by rail or tank truck and repackaged these chemicals into cylinders or drums. On July 2, 1982, a partially filled aboveground storage tank containing an estimated 2,000 to 4,000 gallons of chlorinated solvent exploded, releasing its contents to the land surface and to the adjacent Berryessa Creek via a storm drain. Initial cleanup of the spill involved pumping and disposing of liquid from the storm drain and creek and excavating approximately 280 cubic yards of sediment from the creek bed. Since that time, JCI Jones has been engaged in an ongoing groundwater investigation, cleanup, and monitoring program under the oversight of the RWQCB. Soil vapor sampling occurred in 2009 and 2014 indicating that there is TCE and PCE vapor present above residential and commercial ESLs (Off-Site Soil-Vapor Investigation Report, Arcadis, 2014).

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/05/1995
Comments: No further action (NFA). In January 1990, an underground storage tank was removed as part of remedial activities. Soils contaminated with TPH (620 ppm), benzene (0.61 ppm), toluene (0.45 ppm), ethylbenzene (1.5 ppm), xylene (25 ppm), and total DDT (8.98 ppm avg.) were excavated and disposed in June 1991 and August 1991 as part of ust removal activities under direct supervision by the Santa Clara Valley Water District. A Preliminary Endangerment Assessment (PEA) was conducted to address potential threat to human health and the environment with a target cleanup level for total DDT of less than 0.9 ppm. Based on our review of submitted information, no significant threat to human health exists at present and no further action is necessary.

Comments: No further action (NFA). In January 1990, an underground storage tank was removed as part of remedial activities. Soils contaminated with TPH (620 ppm), benzene (0.61 ppm), toluene (0.45 ppm), ethylbenzene (1.5 ppm), xylene (25 ppm), and total DDT (8.98 ppm avg.) were excavated and disposed in June 1991 and August 1991 as part of ust removal activities under direct supervision by the Santa Clara Valley Water District. A Preliminary Endangerment Assessment (PEA) was conducted to address potential threat to human health and the environment with a target cleanup level for total DDT of less than 0.9 ppm. Based on our review of submitted information, no significant threat to human health exists at present and no further action is necessary.

Comments: PCE and gasoline spills in June '84 and December '85 recently triggered county involvement. Preliminary assessment of 1987 recommended DTSC (then DHS) and city of San Jose review permit to upgrade spill containment. But also says No Further Action (NFA). No

further action per EPA preliminary assessment for the site only determined that the hazard ranking score (HRS) would not admit it into National Priority List (NPL). DTSC's recommendation on re-evaluation of the site reflects the departments own criteria. Recommendation is County Lead. Limited DTSC involvement anticipated.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Benzene, Other Chlorinated Hydrocarbons, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline

Site History: The Equilon site (formerly Shell Oil) is an operating petroleum product distribution terminal, which is used to store gasoline, diesel fuel, and fuel additives. The 9.6-acre site is located on the northeast side of Coyote Creek in a commercial area of San Jose. The site began operation in the mid 1960s, as it was constructed from 1964 to 1965. The site includes four (4) aboveground fuel tanks, three (3) aboveground fuel additive tanks, a (1) below-grade 4,000-gallon transmix tank, a four-lane fuel loading rack, three (3) aboveground wastewater tanks, and several buildings. The plant stores and distributes three (3) grades of gasoline from the truck loading rack.

Title:	13267 Requirement for Technical Reports/Information for Shell San Jose Terminal
Description:	13267 letter requires 5 report submittals aimed at achieving and demonstrating full delineation of TPH, BTEX, and MTBE impacts to groundwater, source identification and evaluation, and a comprehensive remedial action plan for all impacts. The letter also requires a report documenting storm water sampling to better evaluate storm water discharge threats and BMP appropriateness. Submittal due dates range from January 15, 2007 through August 15, 2007.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1 Addendum
Completed Date: 02/07/2017
Comments: DTSC performed a site screening to determine whether any release of hazardous substances or wastes have occurred at the site that require corrective actions. Based on a review of the Subsurface Investigation Report and other reports prepared by Applied Geosciences, the Regional Water Quality Control Board issued a No Further Action letter to Union Bank in 1994. The site has been the focus of several past environmental site assessments and investigations where groundwater and soil sampling have been conducted and no significant releases of hazardous substances were identified.

Completed Document Type: Voluntary Cleanup Consultation
Completed Date: 05/10/2001
Comments: Completed VCA Consultation. DTSC provided consultation on soil removal activities overseen by the Milpitas Fire Department (MFD). Approximately 28 tons of contaminated soils with elevated levels of metals were excavated and disposed offsite. Groundwater underlying the site is contaminated from an upgradient source currently under the oversight of the SF Regional Water Quality Control Board. The Santa Clara County Department of Environmental Health provided direct oversight on the closure of the site's wastewater treatment facility. No further action was recommended by DTSC.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2021	Source: EPA

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 05/03/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 07/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Microchip Fab Plant

1849 Fortune Drive
San Jose, California 95131

Report Date: April 11, 2017
Partner Project No. 17-183154.1

Prepared for:

HC 1849 Fortune, LLC

c/o Hackman Capital Partners
11111 Santa Monica Boulevard, Suite 1100
Los Angeles, CA 90025

April 11, 2017

Mr. Mike Racine
HC 1849 Fortune, LLC
c/o Hackman Capital Partners
11111 Santa Monica Boulevard, Suite 1100
Los Angeles, CA 90025

Subject: Phase I Environmental Site Assessment
Microchip Fab Plant
1849 Fortune Drive
San Jose, California 95131
Partner Project No. 17-183154.1

Dear Mr. Racine:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (818) 337-1203.

Sincerely,

Misty Ponce
Principal

cc: Timothy Wood, GSI Environmental Inc.

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by HC 1849 Fortune, LLC and GSI Environmental Inc. (GSI) for the property located at 1849 Fortune Drive in the City of San Jose, Santa Clara County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide HC 1849 Fortune, LLC with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the north side of Fortune Drive in a mixed commercial/industrial area of the City of San Jose in Santa Clara County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address:	1849 Fortune Drive, San Jose, California
Property Use:	Industrial
Land Acreage (Ac):	3.68 Ac
Number of Buildings:	1
Number of Floors:	1 with mezzanine
Gross Building Area (SF):	57,000 SF (Total)
Net Rentable Area (SF):	57,000 SF (Total)
Date of Construction:	1981/1982
Assessor's Parcel Number (APN):	244-17-009
Type of Construction:	Concrete
Current Tenants:	Microchip Technologies for the fabrication of semi-conductor microchips
Site Assessment Performed By:	Kathy Lehnus of Partner
Site Assessment Conducted On:	March 27, 2017

The subject property has been used for the fabrication of semiconductor microchips since 1982. The subject property currently is occupied by Microchip Technologies, although it is currently being vacated for plant closure. The building consists of a slab-on grade factory floor with a second-story mezzanine used to house a significant amount of piping to transport virgin materials, waste materials, and air handling/scrubbing equipment. Onsite operations recently consisted of the fabrication of semi-conductor microchips by applying of a thin layer of material to a six-inch diameter silica block (wafer) and then etching into the layer before reapplication/re-etching. The process was conducted in a series on one wafer of semiconductors over a period of several weeks until up to 20 individual etched layers had been applied. At the time of the site visit, the operations had been shut down and much of the equipment had been removed. In addition to the current structure, the subject property is also improved with several

small storage sheds, hazardous materials storage bunkers, aboveground storage tanks (ASTs), asphalt-paved parking areas, associated landscaping, and surface water drainage features.

According to available historical sources, the subject property was formerly developed with farmland/orchards as early as 1939 and developed with the current building in 1981/1982. Occupants on the subject property have included SEEQ Technology Incorporated (1982-1995); Micrel Semiconductor/Inc. (1995-2015); and Microchip Technologies (2015-Present). These companies used the building to fabricate semiconductor microchips.

The immediately surrounding properties consist of an industrial building occupied by Olympus America to the north, offices occupied by Microchip Technologies to the east, commercial buildings to the south (Fortune Business Center, GenX Mobile, and Silicon Valley University), and a multi-unit industrial building at 2290 Ringwood Avenue to the west.

According to 2009 subsurface investigation conducted on a nearby property (Shell Station at 1780 South Main Street, Milpitas, 2,400 feet northwest of the subject property), the depth of groundwater in the vicinity of the subject property was measured between 7 to 11 feet below ground surface (bgs) and flowed to the northwest.

Findings and Opinions

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following RECs were identified during the course of this assessment:

- Bay Area Air Quality Management District (BAAQMD) records included a summary of two applications for vapor degreasers; one in 1985 and one in 2000. In addition, BAAQMD records also included a 1992 violation for a liquid solvent leak at a vapor degreaser. No additional information was available from the BAAQMD regarding the degreaser applications or violation; however, records from the City of San Jose Fire Department (SJFD) include a record of inspection dated May 9, 1992, which indicates that a degreaser “that had been relocated to Building 2 leaked”. The leak was reportedly within secondary containment and was cleaned up. The leak was associated with a recirculation pump seal. An August 1991 Hazardous Materials Management Plan (HMMP) for SEEQ Technology, Inc. lists a Vapor Degreaser Room, identified as “Area T”, with the quantity of chemicals identified as 35 gallons, including isopropyl alcohol, acetone, and trichlorotrifluoroethane (Freon 113). The Freon 113 is identified with the trade name “Blaco Tron TMS+” and is presumed to be the solvent used in the vapor degreaser at that time. Earlier records of vapor degreaser solvent use or location, or records associated with the 2000 vapor degreaser application were not observed in the SJFD files. The 1991 HMMP also identifies a Quality Assurance/Reliability Lab with 22 gallons of chemicals (Area U), including 1,1,1-trichloroethane (1,1,1-TCA). Additional chemical inventory records in the 1991 HMMP indicate the max quantity of 1,1,1-TCA was 1 gallon and the max quantity of Freon 113 was 35 gallons.

Hazardous waste disposal records indicate that 1.6 tons of hazardous waste with the California State Waste Code 211 for "Halogenated Solvents" were disposed from the Site in 1996. Waste records also indicate that 0.02085 tons (41.7 pounds) of California State Waste Code 741 for "Liquids with halogenated organic compounds ≥ 1000 mg/L" were disposed from the Site in 2014.

These records indicating the use of halogenated solvents in vapor degreasers, including a liquid solvent leak during a regulatory inspection, represent a REC.

- The subject property has been used for the fabrication of semiconductor microchips since 1982. The bulk of the processes used throughout the plant included dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning (presented in no particular order). Raw materials used in the process included various gases and acids, and a posistrip positive photoresist remover (solvent) manufactured by EKC Technology referred to as "EKC" (discussed separately below).

As part of operations, acid wastewater was piped throughout the plant in a sub-slab trench and treated with calcium hydroxide in a covered exterior extension (on the western building border) before being discharged to the sanitary sewer. Waste hydrofluoric acid (HF) from the process was piped overhead in the plant, under the ground outside the western building border, and to a 2,500-gallon waste HF AST located to the west of the subject property building (noted as 2,000-gallons in Health Department records). Based on a 2002 Hazardous Waste Application, the following wastes were generated on the subject property on an annual basis: waste process acid (125,000,000 gallons), waste hydrofluoric acid (HF) and water (82,000 gallons), mixed solvent waste (45,000 pounds), waste resistant strip (86,884 pounds), acid contamination solid probes (3,000 pounds), debris contaminated with arsenic (490 pounds), debris contaminated with resistive strip (1,460 pounds), waste paint (250 pounds), and lab packs (250 pounds).

Partner reviewed files maintained by the Santa Clara County Consumer and Environmental Health Agency (CEHA), which contained discharge permit information, inspection reports (with violations), and miscellaneous file information for the subject property. Specifically, a 2012 Assessment Report on the Waste HF system by Chow Engineering noted the piping to the HF tank was in "very poor condition;" two 2008 County Inspection Forms noted violations for improper labeling and materials grouping (no releases or staining noted); a 2001 inspection with secondary containment violations was included in the file (indicating that no secondary containment was present to capture potential releases). In addition, an October 29, 1993 SJFD Record of Inspection notes liquid spillage under sinks and waste piping and indicates waste piping needs leaks repaired.

The extent of hazardous materials and wastes used, transported, and/or stored throughout the Site, including being piped in trenches and subsurface piping, along with the observations of

waste HF piping being in very poor condition, observed spillage, and noted violations for lack of secondary containment, are considered a REC for the subject property.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following were identified during the course of this assessment:

- Partner did not identify controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following environmental issues were identified during the course of this assessment:

- The EKC solvent used in the plant was piped from a 55-gallon drum formerly located in an exterior covered area west of the subject property building in overhead pipes throughout the plant to various equipment, and waste EKC was piped back to a waste EKC 55-gallon drum stored in the same area. Partner did not observe significant staining or indications of recent releases in this area during the Site reconnaissance portion of this ESA. Partner was not able to obtain a site-specific Material Safety Data Sheet (MSDS) from the site contact, but based on generic MSDS for the solvent EKC, the hazardous components are n-methylpyrrolidone and 2-(2-Aminoethoxy)Ethanol, and the Department of Transportation (DOT) shipping name for EKC is "Corrosive Liquid, Basic, Organic, N.O.S (contains 2-(2-Aminoethoxy)Ethanol)." According to the site contact, during Microchip/Micrel's operations, approximately 20 to 30 55-gallon drums of waste EKC were removed from the subject property every 90 days, and EKC was the only solvent used in this process since Micrel occupied the property in 1995. A 2008 County Inspection Form maintained by CEHA indicated the need for secondary containment at "the waste EKC drum" (no releases or staining, however, were noted on the inspection form). Although no documented releases of EKC were identified during this ESA that would present a REC, the period of use and volume of EKC solvent used presents some risk for the potential release of EKC solvent to the subsurface.

- The subject property is located in a highly industrialized area with multiple properties listed on numerous environmental databases, some of which detail releases or the potential for releases. While no specific groundwater plumes have been identified in the area, groundwater contamination associated with off-site sources cannot be ruled out. It is additionally noted that the subject property is located within an area known to be used for semiconductor microchip manufacturing, and that long term use of this nature has been known, in Partner's experience, to lead to releases to the subsurface. The historical industrial use of the general Site vicinity is therefore considered a potential environmental issue.
- During the Site visit Partner observed two active diesel-fuel powered emergency generators with diesel day tanks at the subject property, and Building files indicate that two additional emergency generators were present on the subject property in the past. No record of releases was found associated with the emergency generators and no evidence of release was noted during the site visit. Therefore, the on-site emergency generators are not a significant environmental concern for the subject property.
- According to Community Panel Number 06085C0069H, dated May 18, 2009, the subject property appears to be located in Zone AO, defined as areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are between one and three feet. Average flood depths derived from detailed hydraulic analyses are shown in this zone. Mandatory flood insurance purchase requirements and floodplain management standards apply.
- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

The following data gaps were identified during the course of this assessment; a data gap is a lack of information that affects the ability of the consultant to identify RECs:

- The database report lists the subject property on the CA Historical underground storage tank (UST) database, and the site listing is linked to associated online documentation by the State Water Resources Control Board (SWRCB) Hazardous Substance Container Information for Santa

Clara County. Two containers are listed as installed in 1982 for SEEQ Technology at the subject property. The first container type is noted as a "sump" that stores waste, and is further listed as ½-inch thick, epoxy-lined fiberglass, 375 gallons, single-walled, and in concrete vaulting. Leak detection is noted as visual, GW Mon. Wells, and internal inspection, and the contents are not listed. The second container type is "tank" that stores waste, ½-inch thick epoxy-lined "polyporplynene" (sic), 350 gallons, double lined with leak detection noted as visual, sensor instrument, GW Mon. Wells, and internal inspection. Substances stored in the second container are noted as hydrofluoric acid, nitric acid, and ammonium fluoride. The records suggest both containers (the "sump" and "tank") have underground piping associated with them. Partner asked the Site contact, who believed that the historical UST database listing likely referred to the underground wastewater sump used to accumulate wastewater from the interior sub-slab trenches and direct it to the aboveground wastewater treatment ASTs (located to the west of the southwestern portion of the building). The wastewater sump was observed to have what appeared to be a plastic liner in the bottom portion of it, in which wastewater was observed. No groundwater monitoring wells were observed on the subject property and the site contact reported that he is not aware of any wells at the site. In addition, no records of USTs were found in the Building Department files, which contained records from when the building was constructed and records from the SJFD include Hazardous Materials Management Plans (HMMPs) that indicate no USTs are present on Site. No records from the SJFD were identified indicating USTs are present. While it is possible that the listing on the CA Historical UST database for the hazardous substance containers refers to one or more actual USTs and not the existing wastewater sump and related underground wastewater lines, the lack of UST records in the SJFD files and information in the HMMPs indicating that no USTs are on Site suggest the historical UST database listing may be associated with the wastewater system. The potential for this listing to be associated with actual USTs, however, represents a data gap.

- Several virgin hazardous materials storage sheds (referred to as bunkers) were observed west of the building; these were locked and inaccessible during Partner's site visit. The main storage shed was located on a concrete pad, and was raised so the underside was inspected during the site visit, and Partner did not see evidence of stains or releases. Since this area could not be inspected to determine the status with regard to potential release, the lack of inspection is considered a data gap.

Conclusions

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1849 Fortune Drive in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions, environmental issues, and data gaps in connection with the subject property, as listed above.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 1849 Fortune Drive in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

This ESA was performed to permit HC 1849 Fortune, LLC, the "User" of this Phase I ESA, to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; 5) a review of a regulatory database report provided by a third-party vendor, and 6) a review of an incomplete copy (text only) of a 2015 Draft Phase I ESA prepared by Northgate Environmental Management, which was received by GSI Environmental Inc. (GSI) from HC 1849 Fortune, LLC (reportedly provided by Microchip Technologies) and provided by GSI to Partner. Partner contacted local agencies, such as environmental health departments, fire departments, and building departments in order to determine any current and/or former hazardous substances usage, storage, and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at local and state regulatory agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

GSI Environmental Inc. on behalf of HC 1849 Fortune, LLC engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope, and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are intended only for the use and benefit of, and may be relied upon by GSI Environmental Inc., HC 1849 Fortune, LLC, any affiliate of HC 1849 Fortune, LLC which acquires the subject property, any lender who provides financing for the subject property, and any of such lender's participants, affiliates, agents, advisors, successors, and assign in connection with the origination of the loan to be secured by the subject property. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, GSI Environmental Inc. and HC 1849 Fortune, LLC and their respective

officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators, and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner received over 2,000 pages of documentation from the San Jose Fire Department and San Jose Health Departments combined, and reviewed over 1,000 pages of on-line Building Department files. Many of the records were handwritten and/or of poor copy quality. Partner's summary of those records is limited by the quality of the materials reviewed.
- Partner's view of the building floor during the site assessment was obstructed due to the presence of excessive equipment. In addition, several storage sheds and gated ASTs were locked and inaccessible during the site visit. Where possible, areas were viewed and photographed through openings in fencing.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 1849 Fortune Drive in San Jose, California is located on the north side of Fortune Drive. According to the Santa Clara County Assessor, the subject property has an Assessor's Parcel Number (APN) of 244-17-009 and ownership was last transferred in 2002.

Please refer to Figure 1: Site Location Map, Figure 2A: Site Plan Overview, Figure 2B: Site Plan Detail, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is occupied by Microchip Technologies for industrial use, although is currently being vacated for plant closure. The building consists of a slab-on grade factory floor with a second-story mezzanine used to house a significant amount of piping to transport virgin materials, waste materials, and air handling/scrubbing equipment. Onsite operations recently consisted of the fabrication of semiconductor microchips by applying of a thin layer to a six-inch diameter silica block (wafer) and then etching into the layer before reapplication/re-etching. The process was conducted in a series on one wafer over a period of several weeks until up to 20 individual etched layers had been applied. At the time of the site visit, the operations had been shut down and much of the equipment had been removed. In addition to the current structure, the subject property is also improved with several small storage sheds, hazardous materials storage bunkers, aboveground storage tanks (ASTs), asphalt-paved parking areas, and associated landscaping.

The bulk of the processes used throughout the plant included dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning (presented in no particular order). The floor of the process areas was tiled, and only minor staining was noted in the wet processing areas (and no staining observed in the dry process areas), although it is noted that the presence of equipment throughout the building interior limited Partner's inspection of the floor. Raw materials used in the process included various gases and acids, and a posistrip positive photoresist remover (solvent) manufactured by EKC Technology referred to as "EKC." As part of operations, acid wastewater was piped throughout the plant in a sub-slab trench and treated with calcium hydroxide in a covered exterior extension (on the western building border) before being discharged to the sanitary sewer. In addition, EKC solvent was piped from a 55-gallon drum in this exterior covered area overhead throughout the plant to various equipment, and waste EKC was piped back to a waste EKC 55-gallon drum stored in the same area. The drums were stored in a concrete bermed area, and secondary containment pallets were observed stacked in the corner (which were likely in use when the plant was operational). Minor staining indicative of prolonged industrial use was observed throughout the area. According to the site contact, during operations approximately 20 to 30 55-gallon drums of waste EKC were removed from the subject property every 90 days. In addition, waste hydrofluoric (HF) acid from the process was piped overhead in the plant, under the ground on the western building border, and to a 2,500-gallon waste HF AST located to the west of the subject property building.

Several ASTs used to generate deionized water for plant use, filter the acid wastewater, supply hydrogen, and contain waste HF were observed during the site visit, the majority of which were located on the western building border (in the covered/exterior area) on concrete pads. In addition, several virgin hazardous materials storage sheds (referred to as bunkers) were observed west of the building; these were locked and inaccessible during Partner's site visit. The bunker buildings appeared to provide secondary containment for liquid materials. The main storage shed was located on a concrete pad, and was raised so the underside was inspected during the site visit. Partner observed no evidence of stains or releases in the vicinity of the main storage shed.

The subject property is designated Industrial Park (IP) by the City of San Jose.

The subject property is identified under Micrel as a CA HAZNET, CA Historical Underground Storage Tank (UST), CA National Pollutant Discharge Elimination System (NPDES), CA Wastewater Discharge (WDS), Toxic Release Inventory System (TRIS), CA Hazardous Waste Permit (HWP), Resource Conservation and Recovery Act (RCRA) Treatment Storage and Disposal Facility (TSDF), RCRA Large Quantity Generator (LQG), CA EnviroStor, Facility Index System (FINDS), California Certified Unified Program Agency (CA CUPA), CA Emissions (EMI), NY Manifest, CA San Jose HAZMAT, and Environmental Compliance History (ECHO) site in the regulatory database report, as, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial/ industrial area of Santa Clara County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Olympus America at 2400 Ringwood Avenue

South: GenX Mobile at 2030 Fortune Drive, Fortune Business Center at 1701 Ringwood, and Silicon Valley University at 2010 Fortune Drive

East: Microchip Technologies offices at 1931 Fortune Drive

West: A multi-unit industrial building at 2290 Ringwood Avenue

The adjacent property to the north is identified as a CA CUPA Listing, and a California San Jose HAZMAT site; the adjacent property to the west is identified as a California Facility and Manifest Data (CA HAZNET) site, a California San Jose HAZMAT site, a Resource Conservation and Recovery Act-Small Quantity Generator (RCRA-SQG) site, a FINDS site, an ECHO site, and an Environmental Data Resources (EDR) Historical Auto Station (EDR HIST AUTO) site; and the adjacent property to the south is identifies as a California Above Ground Storage Tank (CA AST) site, a CA CUPA Listing, a California Emissions Inventory System (CA EMI) site, a RCRA-SQG site, a FINDS site, and an ECHO site in the regulatory database report, discussed further in Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) Milpitas, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 45 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the northwest. The 2012 mapping does not capture building or site features.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the northwest. The nearest surface water in the vicinity of the subject property is the Coyote Creek located approximately 1 mile west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the San Jose Water Company (SJWC) serves the subject property vicinity. According to their 2015 Annual Water Quality Report, the sources of public water for the City of San Jose are from three major sources, including the use of groundwater, which is pumped from over 100 wells that draw water from the Santa Clara Groundwater Subbasin. In the Santa Clara Subbasin, aquifers extend to depths of over 1000 feet in places. Principal aquifers in the area are defined as greater than 150 feet bgs.

According to the SJWC records provided to Partner, no active public drinking water wells are located within a 0.25-mile radius of the subject property. Since no public or private drinking water wells are located on or near the subject property, it can be concluded that groundwater beneath the subject property is not used for drinking water.

According to a 2009 subsurface investigation conducted on a nearby property (Shell Station at 1780 South Main Street, Milpitas, 2,400 feet northwest of the subject property), the depth of groundwater in the vicinity of the subject property was measured between 7 to 11 feet below ground surface (bgs) and is inferred to flow to the northwest.

2.4.3 Geology/Soils

The subject property mapped on the California Geology Map as Marine and Non-marine (Continental) Sedimentary Rocks (Q), described as alluvium, lake, playa, and terrace deposits, unconsolidated and semi-consolidated. Mostly non-marine, but includes marine deposits near the coast.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urbanland-Campbell Complex, 0 to 2 percent slopes and Urbanland-Landelspark Complex, 0 to 2 percent slopes. Urbanland-Landelspark Complex consists of 16 to 40 inches to strongly contrasting textural stratification in well drained soils.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06085C0069H, dated May 18, 2009, the subject property appears to be located in Zone AO, defined as areas subject to inundation by 1-percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are between one and three feet. Average flood depths derived from detailed hydraulic analyses are shown in this zone. Mandatory flood insurance purchase requirements and floodplain management standards apply.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information

Period/Date	Source	Description/Use
At least 1939- at least 1979	Aerial Photographs, Topographic Maps	Farmland (with orchards)
1982-1995	Aerial Photographs, City Directories, Regulatory Records, City Records	SEEQ Technology Incorporated
1995-2015	Aerial Photographs, City Directories, Interviews, Regulatory Records, City Records, Online Research	Micrel Semiconductors, Inc.
2015-Present	Aerial Photographs, Interviews, Regulatory Records, City Records, Online Research	Microchip Technologies

Occupants on the subject property have included SEEQ Technology Incorporated (1982-1995); Micrel Semiconductor/Inc. (1995-2015); and Microchip Technologies (2015-Present). Potential environmental concerns were identified in association with the current or former use of the subject property, as further discussed in Sections 4.2 and 5.1.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from EDR on March 20, 2017. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date:	1939, 1940, 1948, 1950	Scale:	1"=500'
Subject Property:	Occupied by row crops in close proximity to a homestead to the east, which may have been partially located on the subject property (the photograph scale and lack of landmarks make the determination of the exact property boundary difficult).		
North:	Occupied by row crops		
South:	Occupied by row crops		
East:	Occupied by row crops and the remainder of the on-site homestead structures followed by a street		
West:	Occupied by row crops		

Date:	1956, 1963, 1974	Scale:	1"=500'
Subject Property:	Occupied by row crops on the southern border, and an orchard on the northern border		
North:	Occupied by an orchard		
South:	No significant changes noted		
East:	Occupied by row crops, an orchard, and a homestead		
West:	Occupied by row crops and an orchard		

Date:	1979	Scale:	1"=500'
Subject Property:	The land use remains unchanged, but the homestead is no longer present		
North:	No significant changes noted		
South:	Fortune Drive is now in place with undeveloped land further south		
East:	The homestead is no longer present, and large industrial/commercial buildings have been constructed further to the east		
West:	Ringwood Avenue is now present and populated with the commercial/industrial that appear today		

Date:	1982	Scale:	1"=500'
Subject Property:	The subject property building is now in place; equipment/piping can be seen along the western building border and on top of the building, consistent with other information reviewed during this ESA indicating construction of a building for microchip fabrication at this time		
North:	Appears to have been cleared and possibly paved		
South:	No significant changes noted		
East:	Appears to have been cleared and possibly paved		
West:	No significant changes noted		

Date:	1993, 1998, 2005, 2006, 2009, 2010, 2012	Scale:	1"=500'
Subject Property:	No significant changes noted, except additional rooftop equipment appears to have been added by 2005		
North:	No significant changes noted		
South:	The current commercial buildings are now in place beyond Fortune Drive		
East:	The eastern abutting office building, is now in place		
West:	No significant changes noted		

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on March 17, 2017. Sanborn map coverage was not available for the subject property.

A copy of the "No Coverage" letter is attached in Appendix B.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on March 21, 2017 for past names and businesses that were listed for the subject property and adjacent properties. City directories were reviewed from between 1922 and 2014 at approximately 5-year intervals. The findings are presented in the following table:

City Directory Search for 1849 Fortune Drive (Subject Property)	
Year(s)	Occupant Listed
1985, 1991	SEEQ Technology Incorporated
1996, 2000	Micrel Semiconductor
2010	Micrel Incorporated/SEEQ Tech
2014	Micrel Incorporated

Based on on-line research, SEEQ Technology Incorporated manufactures data communications semiconductor products. Therefore, according to the city directory review, the subject property has been used for semiconductor manufacturing since it was first listed in 1985, and based on additional findings of this ESA, back to construction of the Site building in 1982.

City Directory Search for Adjacent Properties (1701, 2400, and 2290 Ringwood Avenue, and 1931, 2010, and 2030 Fortune Drive)

Year(s)	Occupant Listed
1991	Multiple industrial listings* (1701 and 2290 Ringwood Avenue), SEA Corp (2010 Fortune Drive), Comp Serv Sales, Zuvic Juan, Zyvex Corporation (2030 Fortune Drive)
1996	Multiple industrial listings* (1701 and 2290 Ringwood Avenue), B Smarttool Technology, A LGC (2030 Fortune Drive)
2000	Multiple industrial listings* (1701 and 2290 Ringwood Avenue), MT International, LGC, Los Gatos Circuits, Qwest Analytical, Smarttool Technology, Wedge Innovations (2030 Fortune Drive)
2006	Multiple industrial listings* (1701 and 2290 Ringwood Avenue), Laird Technologies, Limited, Microland, CRC Health Corp, Infogain Corporation (2030 Fortune Drive), Olympus America (2400 Ringwood)
2010	Micrel (1931 Fortune Drive), Olympus America (2400 Ringwood)
2014	Micrel (1931 Fortune Drive)

*A full listing of historical occupants between 1980 and 2006 is provide in the city directory report attached in Appendix B.

According to the city directory review, the adjacent properties have been occupied by multiple commercial and manufacturing businesses. Environmental issues related to adjacent properties are discussed in Section 5.2.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on March 17, 2017. No areas of pits, ponds, lagoons, or areas of significant fill were noted in the topographic mapping. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1889, 1897, 1899

Subject Property:	Undeveloped land (grassland, woodland, dirt)
North:	Undeveloped land (grassland, woodland, dirt)
South:	An unnamed street (not Fortune Drive) followed by undeveloped land (grassland, woodland, dirt)
East:	Undeveloped land (grassland, woodland, dirt)
West:	Undeveloped land (grassland, woodland, dirt)

Date: 1953, 1961, 1965, 1973

Subject Property: Undeveloped land (grassland, woodland, dirt), with a gently-sloping northwestern slope (orchard present on the subject property in all but the 1953 topographic map)

North: Orchards are present to the north

South: The unnamed street is now incorporated into the undeveloped land

East: A residence is now present followed by a street (not currently present)

West: No significant changes noted

Date: 1980

Subject Property: Undeveloped land

North: Undeveloped land

South: Fortune Drive is now in place

East: The residence and nearby street are no longer present

West: No significant changes noted

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency:	California Department of Toxic Substances Control (DTSC), Envirostor, and Hazardous Waste Tracking System (HWTS)
Source:	Berkeley File Room (Carl Rose) http://www.envirostor.dtsc.ca.gov/public/ and http://hwts.dtsc.ca.gov/report_list.cfm
Agency Phone Number:	(510) 540-3800
Date of Contact:	March 16, 2017
Method of Communication:	e-mail / on-line search
Summary of Communication:	<p>The HWTS on-line database listed two separate generator reports for the subject property: an inactive record for Micrel Incorporated under ID Number CAL000082437 and an active record for Micrel, Inc. under ID Number CAD056366289. The inactive record was initiated in 1993 and last updated in 1999. No hazardous waste manifest information was captured in the file. The active record for Micrel, Inc. under ID Number CAD056366289 was first entered in 1982 and last updated in 2016. Total volumes of hazardous waste shipped from the subject property were provided annually from 1993 through 2019 (assumed to be tracked in error for 2018 and 2019 records). The total waste tonnage appears to have peaked at 484 tons in 2000. No waste was listed as shipped under the Transport, Storage, and Disposal facility (TSDF) category (although the database report lists the subject property as a TSDF, as discussed in Section 4.2).</p> <p>The EnviroStor database listed the presence of a permit file for the subject property, but listed the status as "Protective Filer" and provided no information pertaining to the subject property. The summary listed the property as "Inactive-Needs Evaluation"</p> <p>Partner submitted a Freedom of Information Act (FOIA) Request to the Berkeley DTSC file room and was able to obtain a copy of the available file for 1849 Fortune Drive in San Jose. However, the entire file appears to be related to a separate Micrel facility located at 639 North Pastoria Avenue in Sunnyvale, CA (CAD061621553). No further information was available in the file.</p>

For completeness, the entire DTSC file has been attached in Appendix B.

4.1.2 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	Online database
Agency Address:	320 W. 4th Street, Suite 200, Los Angeles
Agency Phone Number:	(213) 576-6600
Date of Contact:	March 23, 2017
Method of Communication:	Online review of records http://geotracker.waterboards.ca.gov/
Summary of Communication:	No records regarding hazardous substance use, storage, or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

Copies of pertinent documents are attached in Appendix B.

4.1.3 Health Department

Regulatory Agency Data

Name of Agency:	Santa Clara County Consumer and Environmental Health Agency (CEHA)
Point of Contact:	File Clerk
Agency Address:	1553 Berger Drive, Suite 300 San Jose, CA 95112-2716
Agency Phone Number:	(408) 918-3400
Date of Contact:	March 16, 2017
Method of Communication:	Email
Summary of Communication:	<p>CEHA provided Partner with over 400 pages of scanned files for the subject property. The file is summarized below:</p> <ul style="list-style-type: none">• A 2016 California Environmental Reporting System (CERS) Business Activities form submitted by Micrel Semiconductors. Processes were noted as phase separation by filtration, centrifugation or gravity settling, but excluding super critical fluid extraction, adsorption, distillation, biological processes, photodegradation using ultraviolet light with hydrogen peroxide or ozone), air stripping or steam stripping. A site plan with some process locations was provided in the report;• Several internal Data Input Document forms with internal element codes dated 1999 through 2002 (2002 noted as "inactive");• An undated Environmental Compliance Plan (noting the discharge of less than 800 gallons per month of waste acids and caustics from the wet etch/rinse operations from 3 tanks and less than 500 gallons per month of waste sodium hydroxide and hydrochloric acid from 2 tanks);• Several Environmental Health Permits (generates 5 to less than 25 tons per year) dated in the 1990s;• Onsite Hazardous Waste Treatment Notifications / Business Owner Operation Identifications (1994 and annually from 2002 through 2012);• A 2002 and 2009 Waste Tank Integrity and Acceptability Statement (inspection of wastewater tanks; no failures noted);• Diagrams of the wastewater system note a 3,000-gallon calcium hydroxide AST, and three 1,800 gallon filtration tanks before discharge of 125,000,000 gallons per year to the Publicly Owned Treatment Works (POTW);

Regulatory Agency Data

- A February 23, 1996 letter from DTSC indicating that legal changes in requirements the treatment of spent copper cleaners and conditioners (no action required);
- DTSC Settlement of Enforcement Order Docket No. NNO 93/94 2-002, noting settlement of the April 29, 1994 Enforcement Order (which was attached and noted that the Respondent is not authorized by the Department to manage hazardous waste);
- An inspection report dated 1994 indicted the illegal treatment of hazardous waste (inspecting agency not noted);
- 1993 Hazardous Waste Generator Permit Application submitted to the County of Santa Clara Health Department for between 5 and less than 25 tons per year to be treated per the discharge permit. A waste inventory table in the application notes waste pump oil (500-gallons), waste oil filters (2,000 pounds), waste flammable liquids (900 gallons), waste corrosive liquids (1,800 gallons and 200 gallons);
- Several financial assurance documents related to the discharge permit;
- 1998 notice from DTSC that the annual Permit-By-Rule report had not been submitted;
- A 2012 Assessment Report on Tank System Integrity of the Waste HF Acid Tank and the Acid Waste Neutralization System Tanks by Chow Engineering noting the tank configuration and design of the wastewater treatment. In the report it was noted that the final pH range of treated waste acid mix by permit is 6.0 to 12.5. The waste HF acid storage tank was noted as 2,000-gallons fiber reinforced plastic (FRP) AST located in a concrete vault system with epoxy coating. The piping to the tank was noted in "very poor condition";
- A 2012 County Inspection Form (no violations noted);
- Two 2008 County Inspection Forms, violations noted for improper labeling and materials grouping as well as the need for secondary containment at the waste EKC drum. No releases or staining noted;
- A 2005 letter from Micrel addressing administrative violations (codes 2169, 2164, 2253, 2222/2206, 2201, 2277, and 2160);
- A 2005 inspection noting administrative violation codes 2169, 2164, 2253, 2222/2206, 2201, 2277, and 2160;
- A 2004 inspection with labeling violations (with subsequent 2004 correction response letter from Micrel);
- A 2001 inspection with labeling and secondary containment violations;
- A 2002 Hazardous Waste Application, noting the following waste generated on an annual basis: waste process acid (125,000,000 gallons), waste HF acid and water (82,000 gallons), mixed solvent waste (45,000 pounds), waste resistant strip (86,884 pounds), acid contamination solid probes (3,000 pounds), debris contaminated with arsenic (490 pounds), debris contaminated with resistive strip (1,460 pounds), waste paint (250 pounds), and lab packs (250 pounds);
- A 2001 inspection with manifest and labeling violations;
- A 1998 inspection with "minor violations," requiring labeling and test of waste filters for metals and noting that two drums were open and must be closed; and
- A 1993 inspection with administrative violations.

A copy of pertinent documents is included in Appendix B of this report.

4.1.4 City Fire Department

Regulatory Agency Data

Name of Agency:	San Jose Fire Department (SJFD) & San Jose Department of Fire Prevention (SJDFP)
Point of Contact:	www.sjpermits.org via www.sanjoseca.gov
Agency Address:	200 East Santa Clara Street, San Jose, California
Agency Phone Number:	(408) 535-3500
Date of Contact:	March 24, 2017, March 30, 2017
Method of Communication:	Online
Summary of Communication:	The City of San Jose maintains Fire Prevention Inspection, Permit, and Installation records within the online permit viewer database. Relevant permits pertaining to the subject property are summarized in the table below.

In addition, SJFD Partner obtained 1,878 pages of scanned file materials from the SJFD. Partner conducted a preliminary review of the materials to determine if information in the file related to releases, violations, or the presence of underground storage tanks. Partner did not find records of USTs in the file materials.

Fire Prevention Records Reviewed for 1849 Fortune Drive (Subject Property)

Year(s)	Owner/Applicant	Description
1994-2001	None Listed	Closed Hazardous Materials Compressed Gas/Cryogenic System Records
2004	Micrel Inc.	Permit to install above ground refrigerant system for HVAC
2006	Micrel Inc.	Tenant Improvement- Alteration to and hazardous material storage permit and inspection of materials storage cabinet
2008	Micrel Inc.	Tenant Improvement- Hazardous Compressed Gas/Cryogenic System with Modification to the phosphine system
2008	Micrel Inc.	Tenant Improvement- Hazardous Compressed Gas/Cryogenic System with Modification to the tetraethylorthosilicate (TEOS) system
2010/2011	Micrel Tool	Permit Approved for CO2 Fire Suppression System
2012	Micrel Inc.	Expired permit to install sulfuric Sink with 98% sulfuric acid baths
2015	Micrel Inc.	Fire inspection records regarding newly installed AST for waste containment
2015	Micrel Inc.	Proposed alteration of solvent waste blanket AST

Records from the SJFD include a record of inspection dated May 9, 1992, which indicates that a degreaser "that had been relocated to Building 2 leaked". The leak was reportedly within secondary containment and was cleaned up. The leak was associated with a recirculation pump seal. An August 1991 Hazardous Materials Management Plan (HMMP) for SEEQ Technology, Inc. lists a Vapor Degreaser Room, identified as "Area T", with the quantity of chemicals identified as 35 gallons, including isopropyl alcohol, acetone, and trichlorotrifluoroethane (Freon 113). The Freon 113 is identified with the trade name "Blaco Tron TMS+" and is presumed to be the solvent used in the vapor degreaser at that time. Earlier records of vapor degreaser solvent use or location, or records associated with the 2000 vapor degreaser application

were not observed in the SJFD files. The 1991 HMMP also identified a Quality Assurance/Reliability Lab with 22 gallons of chemicals (Area U), including 1,1,1-trichloroethane (1,1,1-TCA). Additional chemical inventory records in the 1991 HMMP indicate the maximum quantity of 1,1,1-TCA was 1 gallon and the maximum quantity of Freon 113 was 35 gallons in that year. An October 29, 1993 SJFD Record of Inspection notes liquid spillage under sinks and waste piping and indicates waste piping needs leaks repaired. No records of USTs were identified in the SJFD records and HMMPs specifically indicate that no USTs were present on the Site.

Due to the size of the files, copies of only select permits are included in Appendix B of this report.

4.1.5 State Fire Department

Regulatory Agency Data	
Name of Agency:	Office of the State Fire Marshal (OSFM)
Point of Contact:	File Clerk
Agency Address:	3950 Paramount Blvd. #210 Lakewood, CA 90712
Agency Phone Number:	(562) 497-9100
Date of Contact:	March 24, 2017
Method of Communication:	pra.request@fire.ca.gov
Summary of Communication:	The OSFM indicated that three underground oil transport pipelines are located within 1 mile of the subject property (the closest located greater than 1,493 away). According to the OSFM, none of the pipelines have been reported to have leaked.

A copy of pertinent records is attached in Appendix B.

4.1.6 City Environmental Services Department

Regulatory Agency Data	
Name of Agency:	City of San Jose Environmental Services Department
Point of Contact:	John Fosnaugh
Agency Address:	200 East Santa Clara Street, 7 th Floor, San Jose, CA 95113
Agency Phone Number:	(408) 793-5386
Date of Contact:	March 29, 2017
Method of Communication:	John.fosnaugh@sanjoseca.gov
Summary of Communication:	Mr. Fosnaugh indicated that he does not have records for chemical usage/storage for the subject property.

No violations are open with the City of San Jose, according to the records search conducted on-line at www3.sanjoseca.gov/codeenforcement/cets/form.index.asp.

A copy of pertinent records is attached in Appendix B.

4.1.7 Water District

Regulatory Agency Data

Name of Agency:	Santa Clara Valley Water District (SCVWD)
Point of Contact:	Mark Bilski
Agency Address:	5750 Almaden Expy, San Jose, CA 95118
Agency Phone Number:	(408) 630-2830
Date of Contact:	March 17, 2017
Method of Communication:	mbilski@valleywater.org
Summary of Communication:	The SCVWD does not maintain files for the subject property. However, according to the February 2017 Water Quality Report available online with the SCVWD, water supplied to the area is in compliance with all state and local regulations.

A copy of the SCVWD response provided to Partner is attached in Appendix B.

4.1.8 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency:	Bay Area Air Quality Management District (BAAQMD)
Point of Contact:	Clerk
Agency Address:	375 Beale Street, Suite 600, San Francisco, CA 94105
Agency Phone Number:	(415) 749-4900
Date of Contact:	March 16, 2017
Method of Communication:	https://cwp-baaqmd.secureprtportal.com/default.aspx
Summary of Communication:	The BAAQMD provided Partner with a summary of their files that included 21 permits/applications filed between 1982 and 2013 issued to SEEQ Technology, Inc. and Micrel Semiconductor, Inc. The applications note acid, solvent sinks, bake oven, solvent recycling, wet scrubbers, two vapor degreasers (1985 and 2000), fabrication, distillation unit, photoresist, generators, fume scrubbers, new NSR, Thermal oxidizer system, and semiconductor manufacturing. Partner has followed up with BAAQMD in an attempt to obtain physical copies of files related to the "vapor degreaser" references however has been unable to obtain further information. In the April 27, 2015 DRAFT Phase I ESA prepared by Northgate and provided to HC 1849 Fortune, LLC by the Site owner, BAAQMD records also included a violation in 1992 for a liquid solvent leak on a vapor degreaser; however, no violations were provided to Partner by BAAQMD during this ESA (BAAQMD indicated that inactive records have been destroyed).

A copy of the BAAQMD file provided to Partner is attached in Appendix B.

4.1.9 Building Department

Regulatory Agency Data

Name of Agency:	City of San Jose Development Services Department-Building Division (SJDSD)
Point of Contact:	www.sjpermits.org via www.sanjoseca.gov
Agency Address:	200 East Santa Clara Street, San Jose, California
Agency Phone Number:	(408) 535-3555
Date of Contact:	March 24, 2017
Method of Communication:	Online
Summary of Communication:	Partner reviewed the San Jose online database of building and planning records pertaining to the subject property. According to the database, 61 active permits are on file with the city of San Jose, and an additional 241 closed permit records were available for review. Pertinent building records pertaining to potential environmental conditions on the subject property are summarized in the table below:

Building Records Reviewed for 1849 Fortune Drive (Subject Property)

Year(s)	Owner/Applicant	Description
1981	Intl. Business Park	Multiple building permits for original construction of entire business park
1981	Intl. Business Park	Multiple building permits relating to original construction
1981	Intl. Business Park	Certificate of Occupancy- light manufacturing
1982	SEEQ	Application for building permit to construct a building comprised of two levels with a mezzanine area
1985	Union Carbine Corp.	Certificate of Occupancy Permit (equipment only)
1995	Micrel Inc.	Permit to add 729 SF of storage space to an existing storage room
1997	Micrel Inc.	Install new volatile organic compound (VOC) abatement system
2000	Micrel Inc.	Permit to install one new air handler and four HEPA filters
2001	Therma Corp.	Permit to install new gas cabinets
2002	Therma Corp.	Tenant Improvement- permit to reinforce and install bracing to roof and structure foundations
2003	Therma Corp.	Permit to construct new 370SF building shell for hazardous material storage
2003	Therma Corp.	Occupancy Permit for new construction of Micrel Production Material Storage Facility
2004	Therma- Michael Hite	Permit to install 157HP emergency generator
2005	Therma- Michael Hite	Permit to install a new VOC abatement system and support frame
2005	Micrel Inc.	Permit to install new Centra Tool, gas cabinet, and pumps
2006	Micrel Inc.	Tenant Improvement- permit to install 1,000 feet of chemical waste piping
2006	Micrel Inc.	Permit to add 310 SF chemical drum storage area (concrete pad and tank installation permit)
2007	Micrel Inc.	Permit to demo interior walls, change occupancy code from B to F-2, and install a new air handler unit
2007	Micrel Inc.	Permit to add connections/tools to VOC exhaust and chemical delivery systems

Building Records Reviewed for 1849 Fortune Drive (Subject Property)

Year(s)	Owner/Applicant	Description
2008	Micrel Inc.	Permit to Install, and Inspection records for Canon laser with supporting equipment in clean room
2009	Micrel Inc.	Tenant Improvements (multiple)- Install new non-load bearing sheetrock walls and suspended acoustic ceiling tiles
2010	Micrel Inc.	Closed Permit- install a bulk chemical delivery system with direct flow to four existing tools within existing cleanroom
2011	Micrel Inc.	Final Permit to Install- bulk chemical delivery system with direct flow to four existing tools within existing cleanroom
2012	Micrel Inc.	Permit to Install- 1,500 LBS tool, a sulfuric acid sink, and perform service upgrades
2012	Micrel Inc.	Installation of a recycled water system for a cooling system
2015	Micrel Inc.	Installation of closed-system product cleaning sink with a waste collection system

Due to the size of the files, copies of only select permits are included in Appendix B of this report.

4.1.10 Planning Department**Regulatory Agency Data**

Name of Agency:	San Jose Planning Department (SJPD)
Point of Contact:	www.sjpermits.org via www.sanjoseca.gov
Agency Address:	200 East Santa Clara Street, San Jose, California 95113
Agency Phone Number:	(408) 535-3555
Date of Contact:	March 27, 2017
Method of Communication:	Online
Summary of Communication:	Partner reviewed the San Jose online database of building and planning records pertaining to the subject property. The property is zone IP, industrial park. According to the database, 61 active permits are on file with the city of San Jose, and an additional 241 closed permit records were available for review. Pertinent planning records pertaining to potential conditions on the subject property are summarized in the table below.

Planning Records Reviewed for 1849 Fortune Drive (Subject Property)

Year(s)	Owner/Applicant	Description
2001	Tom Wenger	Permit to install automatic switch equipment/electrical transformer, screen, and landscaping only
2001	Tom Wenger	Permit to install cooling tower, chiller, and canopy for HVAC
2001	Tom Wenger	Permit to install and assess environmental impact of four (4) emergency generators on entire property
2003	Tom Wenger	Addition to gas storage building with containers no larger than 100-gallons
2003	Tom Wenger	Permit to replace 4,500 gallon above ground hydrogen tank and maintenance system.
2004	Micrel Semi-Conductor Inc.	Replacement of existing VOC exhaust abatement equipment
2004	Michael Mena	Administrative permit to install a 157-HP Caterpillar emergency back-up generator for a manufacturing business on a 3.57 acre

Planning Records Reviewed for 1849 Fortune Drive (Subject Property)

Year(s)	Owner/Applicant	Description
2006	Thomas F Wenger	property Add two (2) chemical storage containers
2017	N/A	APN 244-17-009-Zoned: Industrial Park – IP

Due to the size of the files, copies of only select permits are included in Appendix B of this report.

4.1.11 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	Online Database
Agency Address:	5816 Corporate Ave., Suite 200, Cypress, California
Agency Phone Number:	(714) 816-6847
Date of Contact:	September 18, 2016
Method of Communication:	http://maps.conservation.ca.gov/doggr/index.html
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

A copy of pertinent documents is included in Appendix B of this report.

4.1.12 Assessor's Office

Regulatory Agency Data

Name of Agency:	Santa Clara County Assessor
Point of Contact:	On-line
Agency Address:	70 W. Hedding Street, San Jose, CA 95110
Agency Phone Number:	(408) 299-5500
Date of Contact:	March 23, 2017
Method of Communication:	Online
Summary of Communication:	According to the Santa Clara County Assessor, the subject property is has an APN of 244-17-009 and ownership was last transferred in 2002.

A copy of pertinent documents is included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor migration.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	Y	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	Y	Y	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	N	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	Y	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	Y	N
EDR US Hist Cleaners	Varies	N	N	N
Toxic Chemical Release Inventory System (TRIS)	Varies	Y	N	N
CA CUPA, CA EnviroStor, CA San Jose HAZMAT	Varies	Y	Y	N
FINDS, ECHO, CA EMI	Varies	Y	Y	N
CA WDS, CA NPDES	Varies	Y	N	N
CA Manifest	Varies	Y	N	N

4.2.2 Subject Property Listings

The subject property is identified under Micrel as a CA HAZNET, CA Historical UST, CA NPDES, CA WDS, TRIS, CA HWP, RCRA TSDF, RCRA LQG, CA EnviroStor, FINDS, CA CUPA, CA EMI, NY Manifest, CA San Jose HAZMAT, and ECHO site in the regulatory database report, as discussed below:

- The subject property, identified as Micrel at 1849 Fortune Drive, is listed on several databases related to their use of hazardous materials, generation of hazardous waste, and treatment of wastewater with subsequent permitted discharge to the sanitary sewer. An extensive summary of the materials used at the subject property, and regulatory inspections/violations, is presented in Section 4.1. However, four items in the database report warrant further discussion in this section:
 - RCRA TSDF: The database report lists Micrel as a RCRA TSDF; however, "cleanup status" and "event description" are described as a protective filer with protective filer status listed

as approved January 1, 1995. RCRA's on-line records do not identify the subject property as a TSDF.

- RCRA LQG: The RCRA LQG records list D001 ignitable waste, D002 corrosive waste, D003 reactive waste, D018 benzene, F003 and F005 non-halogenated solvents, and D004 arsenic waste as generated from the subject property. The arsenic waste accumulations are from the use of arsenite in fabrication processes. State violations were noted for the facility based on on-site compliance evaluation inspections conducted in 2008 and 2015; all violations have been noted to have achieved compliance. Details of the violations were not provided in the records.
- HAZNET: The database Facility Summary Report summarized the 415 HAZNET listings, and provided two records of the removal of halogenated waste from the subject property. The removals included the 2014 removal of "0.02085 tons" (41.7 pounds) of the "liquids with halogenated organic compounds greater than or equal to 1,000 milligrams per liter (mg/l)" waste category; and the 1996 removal of 1.6 tons of the "halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc.)." The site contact interviewed during the site reconnaissance was not aware of these listings related to the disposal of liquids with halogenated organic compounds or halogenated solvents.
- CA Historical UST: The database report lists the subject property on the CA Historical underground storage tank (UST) database, and the site listing is linked to associated online documentation by the State Water Resources Control Board (SWRQCB) Hazardous Substance Container Information for Santa Clara County. Two containers are listed as installed in 1982 for SEEQ Technology at the subject property. The first container type is noted as a "sump" that stores waste, and is further listed as ½-inch thick, epoxy-lined fiberglass, 375 gallons, single-walled, and in concrete vaulting. Leak detection is noted as visual, GW Mon. Wells, and internal inspection, and the contents are not listed. The second container type is "tank" that stores waste, ½-inch thick epoxy-lined "polypropylene" (sic), 350 gallons, double lined with leak detection noted as visual, sensor instrument, GW Mon. Wells, and internal inspection. Substances stored in the second container are noted as hydrofluoric acid, nitric acid, and ammonium fluoride. The records suggest both containers (the "sump" and "tank") have underground piping associated with them. Partner asked the Site contact, who believed that the historical UST database listing likely referred to the underground wastewater sump used to accumulate wastewater from the interior sub-slab trenches and direct it to the aboveground wastewater treatment ASTs (located to the west of the southwestern portion of the building). The wastewater sump was observed to have what appeared to be a plastic liner in the bottom portion of it, in which wastewater was observed. No groundwater monitoring wells were observed on the subject property and the site contact reported that he is not aware of any wells at the site. In addition, no records of USTs were found in the Building Department files, which contained records from when the building was

constructed. Additionally, no records from the SJFD were identified indicating USTs are present; records from the SJFD include HMMPs that indicate no USTs are present on Site. While it is possible that the listing on the CA Historical UST database for the hazardous substance containers refers to one or more actual USTs and not the existing wastewater sump and related underground wastewater lines, the lack of UST records in the SJFD files, reference to "sump" on one of the registration forms, and information in the HMMPs indicating that no USTs are on Site suggest the historical UST database listing may be associated with the wastewater system.

4.2.3 Adjacent Property Listings

The adjacent property to the north is identified as a CA CUPA Listing, and a California San Jose HAZMAT site; the adjacent property to the west is identified as a CA HAZNET site, a California San Jose HAZMAT site, a RCRA-SQG site, a FINDS site, an ECHO site, and an EDR Historical Auto Station (EDR HIST AUTO) site; and the adjacent property to the south is identified as a CA AST site, a CA CUPA Listing, a CA EMI site, a RCRA-SQG site, a FINDS site, and an ECHO site in the regulatory database report, as discussed below:

- The adjacent property to the north, occupied by Olympus America and addressed 2400 Ringwood Avenue, was identified as a business which generates more than 100 kilograms, but no more than five (5) tons of potentially hazardous materials on an annual basis. The program description indicates that Olympus America operates with a Hazardous Materials Business Plan and utilizes four to six chemicals during typical operations. No information pertaining to releases, violations, or disposal of potentially hazardous materials was included in the regulatory database report. Based on the lack of information indicating a release has occurred on the property, the distance of the structure from the subject property, the presence of regulatory oversight, and the relatively small quantities of hazardous substances generated, this listing is not expected to represent a significant environmental concern for the subject property.
- The adjacent property identified in the regulatory report as Angular Machining, Inc., Quarmex Corporation, and Pro Engineering, is located to the west of the subject property and is addressed 1751 Fortune Drive. According to the HAZNET database and the regulatory report, Angular Machining Inc. reportedly generated between zero (0) and eight (8) tons of waste or mixed oils on 13 separate occasions between 2004 and 2008. The hazardous materials were reportedly disposed of at an off-site location or recycled under manifest, and no treatment or recovery reportedly took place on site. No information pertaining to releases, illegal disposal, or compliance violations was included in the regulatory report. Mr. Keith Nguyen, president of Angular Machining, Inc. is listed as the contact in the HAZNET database. In addition, Quarmex Corporation was listed as a RCRA-SQG site in 1994 as a generator of waste oils only. The site was issued a FINDS identification number 110002619328 and no violations, releases, or illegal disposal of hazardous materials was reported. Based on the lack of information indicating releases have occurred on the property, the down-gradient location of operations, and the distance from the

subject property, the listings associated with 1751 Fortune Drive are not expected to represent a significant environmental concern for the subject property.

- Across Fortune Drive to the south, the adjacent property addressed 2030 Fortune Drive is recorded in the regulatory database report as occupied by MCI dba Verizon Business, MCI WorldCom, and ZYVEX Corporation. This site reportedly maintains ownership of an above ground storage tank (AST), and is identified in the FINDS, ECHO, RCRA, and Bay Area Air Quality EMI databases. According to information included in the regulatory report, the business operates with a Hazardous Materials Business Plan (HMBP) and utilizes a 10,000 gallon AST on site. No information pertaining to the install date, construction, contents, or condition of the AST was included in the regulatory report. The operations on site are listed in the EMI database as a point source for small quantities of air emissions between at least 2006 and 2014. No violations pertaining to the operations on site were included in the regulatory report. Based on the presence of regulatory oversight, the distance from the subject property, the permitted status of the materials on site, and the lack of violations on file with the regulatory agencies, the listings associated with 2030 Fortune Drive are not expected to represent a significant environmental concern for the subject property.
- 2290 Ringwood Drive, located hydraulically downgradient from the subject property, is listed as a CA CUPA site and CA San Jose HAZNET facility for three separate entities. Due to the downgradient orientation of this property with respect to the subject property, an in depth discussion of these listings is not warranted. Based on Partner's review of the database records and downgradient location of this property, these listings are not expected to represent a significant environmental concern for the subject property.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report that warrant discussion in this section. However, it is noted that the subject property is located in a highly industrialized area with multiple properties listed on with numerous environmental databases, some of which detail releases or the potential for releases. While no specific groundwater plumes have been identified in the area, groundwater contamination associated with off-site sources cannot be ruled out. It is additionally noted that the subject property is located within an area known to be used for semiconductor microchip manufacturing, and that long term use of this nature has been known, in Partner's experience, to lead to releases to the subsurface. The historical industrial use of the general Site vicinity is therefore considered a potential environmental issue.

4.2.5 Orphan Listings

One orphan listing is noted in the regulatory database report: the Milpitas Garbage Dump. This property does not appear to be in the immediate vicinity of the subject property.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

Pursuant to ASTM E1527-13, Partner requested the following site information from HC 1849 Fortune, LLC through correspondence with GSI (HC 1849 Fortune, LLC is the User of this report).

Valuation Reduction for Environmental Issues	X		X	
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports	X		X	

5.1 Interviews

5.1.1 Interview with Owner

Partner was not able to identify the owner of the subject property in the available records; however, was informed by the site contact that Micrel LLC, a subsidiary of Microchip Technologies, is the owner of the subject property.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. It is understood that the Report User does not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Dave Pulizzi, key site manager and Microchip Technology employee, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Pulizzi, the subject property has been used for the fabrication of semiconductor microchips since construction, and was occupied by Micrel for approximately 20 years until 2015, when it was purchased by Microchip Technologies. Mr. Pulizzi has worked at the plant as a manager since 2003. Mr. Pulizzi indicated that raw materials used in the semiconductor fabrication included various gases and acids, and a posistrip positive photoresist remover (solvent) manufactured by EKC Technology referred to

as "EKC". In order to use in the equipment, EKC solvent was piped from a 55-gallon drum in the exterior covered area with overhead pipes throughout the plant to various equipment, and then the waste EKC was piped back to a waste EKC 55-gallon drum stored in the same exterior (covered) area. According to Mr. Pulizzi, during operations approximately 20 to 30 55-gallon drums of waste EKC was removed from the subject property every 90 days. Based on interviewing Mr. Pulizzi, EKC was the only solvent used in this process since Micrel occupied the property in 1995 (operations previous to that time could not be established in the available records). Partner has requested, and not yet received, a material safety data sheet (MSDS) for EKC from Mr. Pulizzi. A generic MSDS for EKC retained from the internet is attached in Appendix B. Based on generic MSDS for EKC, the hazardous components are n-methylpyrrolidone and 2-(2-Aminoethoxy)Ethanol, with a Department of Transportation (DOT) shipping name of "Corrosive Liquid, Basic, Organic, N.O.S (contains 2-(2-Aminoethoxy)Ethanol)".

As part of operations, Mr. Pulizzi indicated that acid wastewater was piped throughout the plant in a sub-slab trench and treated with calcium hydroxide in a covered exterior extension (on the western building border) before being discharged to the sanitary sewer. In addition, waste HF from the process was piped overhead in the plant, under the ground on the western building border, and to a 2,500-gallon waste HF AST located to the west of the subject property building (noted as 2,000-gallons in Health Department records).

Partner indicated to Mr. Pulizzi that the database report identifies two waste USTs at the subject property. Mr. Pulizzi indicated that the USTs likely referred to the underground wastewater sump used to accumulate wastewater from the interior sub-slab trenches and direct it to the aboveground wastewater treatment ASTs, however it is noted that Mr. Pulizzi does not appear to have direct knowledge of the record.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators, and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

The User indicated that they reviewed title reports and did not identify environmental liens or AULs associated with the subject property.

5.2.2 Specialized Knowledge

The User did not identify any specialized knowledge of environmental conditions associated with the subject property.

5.2.3 Actual Knowledge of the User

The User did not identify any environmental lien or AULs encumbering the subject property or in connection with the subject property.

5.2.4 Valuation Reduction for Environmental Issues

The User did not identify any valuation reductions associated with the subject property.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not identify any information that is commonly known or *reasonably ascertainable* within the local community about the subject property.

5.2.6 Previous Reports and Other Provided Documentation

The text portion of a Phase I Environmental Site Assessment was provided by the User (from the Owner), which is summarized below; no appendices were provided in the copy reviewed by Partner. In addition, CERS and discharge records were provided by the User. These records were discussed in Section 4.1 as part of the regulatory review and were attached in Appendix B when pertinent.

Phase I Environmental Site Assessment, Northgate Environmental Management, Inc., April 27, 2015

Northgate Environmental Management, Inc. (Northgate) prepared this report on behalf of Wilson Sonsini Goodrich and Rosati. The assessment was performed in general accordance with ASTM Standard E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, a review of federal, state, and local regulatory databases. The assessment was performed on a larger parcel of land that included the subject property. Pertinent information contained in this report is summarized below:

- At the time of the 2015 assessment, the subject property was occupied by Micrel for semiconductor microchip fabrication;
- The Phase I report indicated that the EDR database report identified the disposal of halogenated VOCs from the subject property;
- The wastewater treatment sump was described as a “lift station” and noted to be 10 feet beneath the ground; and
- Northgate) noted a 1992 Notice of Violation (NOV) related to a liquid solvent leak at a vapor degreaser. Partner was not able to review the attachments of the 2015 Phase I ESA and despite specific request, could not obtain this record from BAAQMD to confirm.

The Northgate Phase I identified no RECs, but did note that the lengthy industry history of the subject property (and surrounding properties) was an environmental concern. Northgate indicated that the period of Site operation for semiconductor fabrication and large quantities of hazardous materials and waste indicated they could not rule out the possibility that undocumented releases may have occurred at some time in the past. In addition, they could not rule out the groundwater contamination is present on a

regional basis, including beneath the site, related to offsite properties and the long commercial-industrial land use history surrounding the Site.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Kathy Lehnus
Site Assessment Conducted On: March 27, 2017

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 1849 Fortune Drive (Subject Property)

Name	Title/Role	Contact Number	Site Walk* Yes/No
Mr. Dave Pulizzi, Microchip Technologies	Key Site Manager	(408) 955-1664	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property.

Environmental concerns were identified during the onsite reconnaissance related to the storage, use, and generation of hazardous substances is discussed in Section 4.1.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the southwestern corner of the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. According to property personnel, only domestic trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of San Jose (San Jose City Water District) services the subject property vicinity.

Industrial wastewater treatment/discharge is discussed in section 6.1.6.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from the roof, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained storm sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by natural gas and electricity provided by Pacific Gas and Electric.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system.

As part of operations, acid wastewater was piped throughout the plant in a sub-slab trench and treated with calcium hydroxide in a covered exterior extension (on the western building border) before being discharged to the sanitary sewer. Wastewater treatment facilities consisting of a 3,000-gallon calcium hydroxide AST and three 1,800 gallon filtration tanks were observed in this area during the site visit.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

During the Site visit, Partner observed two active emergency generators at the subject property, and Building files indicate that two additional emergency generators were present on the subject property in the past. No record of releases was found associated with the emergency generators and no evidence of release was noted during the site visit.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Several virgin hazardous materials storage sheds (referred to as bunkers) were observed west of the building; these were locked and inaccessible during Partner's site visit. The main storage shed was located on a concrete pad, and was raised so the underside was inspected during the site visit. Partner observed no evidence of stains or releases in the vicinity of the main storage shed, and was not granted access to the bunkers to inspect for staining.

In addition, virgin and waste 55-gallon drums of EKC, as well as small containers of other chemicals used in the semiconductor manufacturing processes (including compressed gases) were observed in the exterior covered area located west of the subject property building, although the majority of the

chemicals have been removed as the plant is in the process of shutting down. The locations of the hazardous materials observed during the site visit are presented on Figure 2B. Minor staining was observed throughout the virgin and waste solvent concrete storage pad area.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

During operations, waste HF from the processing was piped overhead in the plant, under the ground on the western building border, and to a 2,500-gallon waste HF AST located to the west of the subject property building (noted as 2,000-gallons in Health Department records). This AST was observed in a gated / locked area that was viewed through the gate slats; no staining was observed.

Several ASTs used to generate deionized water for plant use, filter the acid wastewater, and supply HF were observed during the site visit, the majority of which were located on the western building border (in the covered/exterior area). The locations of the ASTs are provided on Figure 2B. No releases were noted at the ASTs.

No underground storage tanks were observed at the subject property during the site visit.

6.2.3 Evidence of Releases

No spills, stains, or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are regulated pursuant to United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Four active pad-mounted transformers and two inactive pad-mounted transformers were observed on the subject property. According to the site contact, the transformers are owned by the property owner and do not contain PCBs.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner’s reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

The acid wastewater that was transported from the plant to the wastewater treatment area located to the west of the building was piped in an underground trench to a 10-foot deep sump or "lift station" in order to raise the waste from the subgrade level to the calcium hydroxide ASTs in the wastewater treatment area located to the west of the building. This sump was observed by Partner west of the western building wall during the site visit. The interior of the sump was observed through a surface grate and the condition of the sump was not discernible from the surface observations made during the site reconnaissance. The location of the sump is presented in Figure 2B.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 1981 with final occupation in 1982. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good
Spray-Applied Acoustical Material	Throughout Building Interior	Yes	Good

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Stucco	Throughout Building Exterior	Yes	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 µg/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X," to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property building, it is unlikely that LBP is present.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones

EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 *Lead in Drinking Water*

According to available information, a public water system operated by the San Jose Water Company serves the subject property vicinity. According to their 2015 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 *Mold*

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g., in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 *Adjacent Property Reconnaissance*

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises and public right-of-way. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings and Opinions

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following RECs were identified during the course of this assessment:

- Bay Area Air Quality Management District (BAAQMD) records included a summary of two applications for vapor degreasers; one in 1985 and one in 2000. In addition, BAAQMD records also included a 1992 violation for a liquid solvent leak at a vapor degreaser. No additional information was available from the BAAQMD regarding the degreaser applications or violation; however, records from the City of San Jose Fire Department (SJFD) include a record of inspection dated May 9, 1992, which indicates that a degreaser “that had been relocated to Building 2 leaked”. The leak was reportedly within secondary containment and was cleaned up. The leak was associated with a recirculation pump seal. An August 1991 Hazardous Materials Management Plan (HMMP) for SEEQ Technology, Inc. lists a Vapor Degreaser Room, identified as “Area T”, with the quantity of chemicals identified as 35 gallons, including isopropyl alcohol, acetone, and trichlorotrifluoroethane (Freon 113). The Freon 113 is identified with the trade name “Blaco Tron TMS+” and is presumed to be the solvent used in the vapor degreaser at that time. Earlier records of vapor degreaser solvent use or location, or records associated with the 2000 vapor degreaser application were not observed in the SJFD files. The 1991 HMMP also identifies a Quality Assurance/Reliability Lab with 22 gallons of chemicals (Area U), including 1,1,1-trichloroethane (1,1,1-TCA). Additional chemical inventory records in the 1991 HMMP indicate the max quantity of 1,1,1-TCA was 1 gallon and the max quantity of Freon 113 was 35 gallons. Hazardous waste disposal records indicate that 1.6 tons of hazardous waste with the California State Waste Code 211 for “Halogenated Solvents” were disposed from the Site in 1996. Waste records also indicate that 0.02085 tons (41.7 pounds) of California State Waste Code 741 for “Liquids with halogenated organic compounds ≥ 1000 mg/L” were disposed from the Site in 2014.

These records indicating the use of halogenated solvents in vapor degreasers, including a liquid solvent leak during a regulatory inspection, represent a REC.

- The subject property has been used for the fabrication of semiconductor microchips since 1982. The bulk of the processes used throughout the plant included dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning (presented in no particular order). Raw materials used in the process included various gases and acids, and a posistrip positive photoresist remover (solvent) manufactured by EKC Technology referred to as “EKC” (discussed separately below).

As part of operations, acid wastewater was piped throughout the plant in a sub-slab trench and treated with calcium hydroxide in a covered exterior extension (on the western building border) before being discharged to the sanitary sewer. Waste hydrofluoric acid (HF) from the process was piped overhead in the plant, under the ground outside the western building border, and to a 2,500-gallon waste HF AST located to the west of the subject property building (noted as 2,000-gallons in Health Department records). Based on a 2002 Hazardous Waste Application, the following wastes were generated on the subject property on an annual basis: waste process acid (125,000,000 gallons), waste hydrofluoric acid (HF) and water (82,000 gallons), mixed solvent waste (45,000 pounds), waste resistant strip (86,884 pounds), acid contamination solid probes (3,000 pounds), debris contaminated with arsenic (490 pounds), debris contaminated with resistive strip (1,460 pounds), waste paint (250 pounds), and lab packs (250 pounds).

Partner reviewed files maintained by the Santa Clara County Consumer and Environmental Health Agency (CEHA), which contained discharge permit information, inspection reports (with violations), and miscellaneous file information for the subject property. Specifically, a 2012 Assessment Report on the Waste HF system by Chow Engineering noted the piping to the HF tank was in "very poor condition;" two 2008 County Inspection Forms noted violations for improper labeling and materials grouping (no releases or staining noted); a 2001 inspection with secondary containment violations was included in the file (indicating that no secondary containment was present to capture potential releases). In addition, an October 29, 1993 SJFD Record of Inspection notes liquid spillage under sinks and waste piping and indicates waste piping needs leaks repaired.

The extent of hazardous materials and wastes used, transported, and/or stored throughout the Site, including being piped in trenches and subsurface piping, along with the observations of waste HF piping being in very poor condition, observed spillage, and noted violations for lack of secondary containment, are considered a REC for the subject property.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following were identified during the course of this assessment:

- Partner did not identify controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following environmental issues were identified during the course of this assessment:

- The EKC solvent used in the plant was piped from a 55-gallon drum formerly located in an exterior covered area west of the subject property building in overhead pipes throughout the plant to various equipment, and waste EKC was piped back to a waste EKC 55-gallon drum stored in the same area. Partner did not observe significant staining or indications of recent releases in this area during the Site reconnaissance portion of this ESA. Partner was not able to obtain a site-specific Material Safety Data Sheet (MSDS) from the site contact, but based on generic MSDS for the solvent EKC, the hazardous components are n-methylpyrrolidone and 2-(2-Aminoethoxy)Ethanol, and the Department of Transportation (DOT) shipping name for EKC is "Corrosive Liquid, Basic, Organic, N.O.S (contains 2-(2-Aminoethoxy)Ethanol)." According to the site contact, during Microchip/Micrel's operations, approximately 20 to 30 55-gallon drums of waste EKC were removed from the subject property every 90 days, and EKC was the only solvent used in this process since Micrel occupied the property in 1995. A 2008 County Inspection Form maintained by CEHA indicated the need for secondary containment at "the waste EKC drum" (no releases or staining, however, were noted on the inspection form). Although no documented releases of EKC were identified during this ESA that would present a REC, the period of use and volume of EKC solvent used presents some risk for the potential release of EKC solvent to the subsurface.
- The subject property is located in a highly industrialized area with multiple properties listed on numerous environmental databases, some of which detail releases or the potential for releases. While no specific groundwater plumes have been identified in the area, groundwater contamination associated with off-site sources cannot be ruled out. It is additionally noted that the subject property is located within an area known to be used for semiconductor microchip manufacturing, and that long term use of this nature has been known, in Partner's experience, to lead to releases to the subsurface. The historical industrial use of the general Site vicinity is therefore considered a potential environmental issue.
- During the Site visit Partner observed two active diesel-fuel powered emergency generators with diesel day tanks at the subject property, and Building files indicate that two additional emergency generators were present on the subject property in the past. No record of releases were found associated with the emergency generators and no evidence of release was noted during the site visit. Therefore, the on-site emergency generators are not a significant environmental concern for the subject property.
- According to Community Panel Number 06085C0069H, dated May 18, 2009, the subject property appears to be located in Zone AO, defined as areas subject to inundation by 1-percent-annual-

chance shallow flooding (usually sheet flow on sloping terrain) where average depths are between one and three feet. Average flood depths derived from detailed hydraulic analyses are shown in this zone. Mandatory flood insurance purchase requirements and floodplain management standards apply.

- The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent a significant environmental concern at this time.

The following data gaps were identified during the course of this assessment; a data gap is a lack of information that affects the ability of the consultant to identify RECs:

- The database report lists the subject property on the CA Historical underground storage tank (UST) database, and the site listing is linked to associated online documentation by the State Water Resources Control Board (SWRQCB) Hazardous Substance Container Information for Santa Clara County. Two containers are listed as installed in 1982 for SEEQ Technology at the subject property. The first container type is noted as a "sump" that stores waste, and is further listed as ½-inch thick, epoxy-lined fiberglass, 375 gallons, single-walled, and in concrete vaulting. Leak detection is noted as visual, GW Mon. Wells, and internal inspection, and the contents are not listed. The second container type is "tank" that stores waste, ½-inch thick epoxy-lined "polypropylene" (sic), 350 gallons, double lined with leak detection noted as visual, sensor instrument, GW Mon. Wells, and internal inspection. Substances stored in the second container are noted as hydrofluoric acid, nitric acid, and ammonium fluoride. The records suggest both containers (the "sump" and "tank") have underground piping associated with them. Partner asked the Site contact, who believed that the historical UST database listing likely referred to the underground wastewater sump used to accumulate wastewater from the interior sub-slab trenches and direct it to the aboveground wastewater treatment ASTs (located to the west of the southwestern portion of the building). The wastewater sump was observed to have what appeared to be a plastic liner in the bottom portion of it, in which wastewater was observed. No groundwater monitoring wells were observed on the subject property and the site contact reported that he is not aware of any wells at the site. In addition, no records of USTs were found in the Building Department files, which contained records from when the building was

constructed. Additionally, no records from the SJFD were identified indicating USTs are present; records from the SJFD include HMMPs that indicate no USTs are present on Site.. While it is possible that the listing on the CA Historical UST database for the hazardous substance containers refers to one or more actual USTs and not the existing wastewater sump and related underground wastewater lines, the lack of UST records in the SJFD files and information in the HMMPs indicating that no USTs are on Site, as well as reference to "sump" in one of the tank registrations suggest the historical UST database listing may be associated with the wastewater system. The potential for this listing to be associated with actual USTs, however, represents a data gap.

- Several virgin hazardous materials storage sheds (referred to as bunkers) were observed west of the building; these were locked and inaccessible during Partner's site visit. The main storage shed was located on a concrete pad, and was raised so the underside was inspected during the site visit, and Partner did not see evidence of stains or releases. Since this area could not be inspected to determine the status with regard to potential release, the lack of inspection is considered a data gap.

Conclusions

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1849 Fortune Drive in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

- This assessment has revealed evidence of recognized environmental conditions, environmental issues, and data gaps in connection with the subject property, as listed above.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 1849 Fortune Drive in the City of San Jose, Santa Clara County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.
