APPENDIX A – PRIOR PHASE I ESA REPORTS

APPENDIX B – DATABASE SEARCH REPORT

**Type of Services
Location****Phase I Environmental Site Assessment
2400 Ringwood Avenue and
1849 Fortune Drive
San Jose, California**

SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 2400 Ringwood Avenue and 1849 Fortune Drive in San Jose, California (Site) as shown on Figures 1 and 2. This work was performed for STACK Infrastructure USA, LLC (STACK) in accordance with our May 19, 2021 Agreement (Agreement).

1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E 1527-13 titled, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, "Standards and Practices for All Appropriate Inquiries; Final Rule" (AAI Rule). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the property.

As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

Cornerstone Earth Group, Inc. (Cornerstone) understands that STACK recently purchased the Site for construction of a data center campus with manufacturing and office space, and an associate parking structure. We performed this Phase I ESA to support STACK in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant hazardous materials releases to structures, soil or groundwater.

- Drive-by observation of adjoining properties to note readily apparent hazardous materials activities that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of existing and prior Site uses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10.

1.3 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone assumed that all information received from interviewed parties is true and accurate. In addition, we assumed that all records obtained by other parties, such as regulatory agency databases, maps, related documents and environmental reports prepared by others are accurate and complete. We also assumed that the boundaries of the Site, based on information provided by STACK, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

1.4 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Stason I. Foster, P.E. and Kurt M. Soenen, P.E., Environmental Professionals who meet the qualification requirements described in ASTM E 1527-13 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the property, based on information provided by STACK.

Table 1. Location and Ownership

Assessor's Parcel No. (APN)	Reported Address/Location	Owner	Approximate Lot Size
244-17-014	2400 Ringwood Avenue, San Jose, California	STACK	6.2 acres
244-17-009	1849 Fortune Drive, San Jose, California	STACK	3.7 acres
244-17-005	NA (former railroad right-of-way)	City of San Jose	0.4 acres

2.2 CURRENT/PROPOSED USE OF THE PROPERTY

The current and proposed uses of the property are summarized in Table 2.

Table 2. Current and Proposed Uses

Current Use	2400 Ringwood Avenue - Commercial building occupied by Olympus Corporation 1849 Fortune Drive - unoccupied commercial building formerly used for semiconductor manufacturing
Proposed Use	Data center campus with manufacturing and office space, and an associated parking structure

2.3 SITE SETTING AND ADJOINING PROPERTY USE

Land use in the general Site vicinity appears to be primarily commercial. Based on our Site vicinity reconnaissance, adjoining Site uses are summarized below in Table 3.

Table 3. Adjoining Property Uses

North	Residential (across Trade Zone Boulevard)
South	Commercial building occupied by Uniquify (across Fortune Drive)
East	Commercial buildings occupied by a data center and Microchip Technology Inc.
West	Multi-tenant commercial buildings and a church

SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is STACK. The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to

contamination. A search of title records for environmental liens and activity and use limitations also is required.

3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

ASTM E 1527-13 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility. A search of land title records for environmental liens and AULs was not within the scope of the current Phase I ESA.

3.2 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with STACK, we understand that STACK does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions except for the information contained in the provided reports described in Section 3.3.

3.3 DOCUMENTS PROVIDED BY STACK

To help evaluate the presence of Recognized Environmental Conditions at the Site, Cornerstone reviewed and relied upon the documents provided by STACK listed in Table 4. Please note that Cornerstone cannot be liable for the accuracy of the information presented in these documents. ASTM E1527-13 does not require the Environmental Professional to verify independently the information provided; the Environmental Professional may rely on the information unless they have actual knowledge that certain information is incorrect. A summary of the provided documents is provided below; please refer to the original reports for complete details (Appendix A).

Table 4. Documents Provided by STACK

Date	Author	Title
April 27, 2015	Northgate Environmental Management	Phase I Environmental Site Assessment and Limited Environmental Audit, 1849, 1931 and 2180 Fortune Drive, San Jose, California (Draft)
April 11, 2017	Partner Engineering and Science, Inc.	Phase I Environmental Site Assessment, Microchip Fab Plant, 1849 Fortune Drive, San Jose, California
October 2020	Ramboll US Consulting, Inc.	Phase I Environmental Site Assessment Olympus Corporation of the Americas 2400 Ringwood Avenue, San Jose, California
November 2020	Ramboll US Consulting, Inc.	Phase I Environmental Site Assessment 1849 Fortune Drive, San Jose, California

3.3.1 Prior Phase I ESA, 2400 Ringwood Avenue

Based on the information reviewed, the 2400 Ringwood Avenue parcel historically was used for agricultural purposes from at least the 1930s until construction of the existing building in 1996. Since its construction, the building reportedly has been used as a medical equipment servicing facility by Olympus Corporation of the Americas (Olympus). Activities conducted by Olympus reportedly involve receiving damaged endoscopes and endoscope support equipment, cleaning, repairing, testing, and shipping repaired equipment. Ancillary operations at the facility were noted to include administrative activities, office operations, equipment rentals and building maintenance.

Ramboll (2020) indicated that the primary hazardous materials used at the Olympus facility are isopropyl alcohol for wipe cleaning (stored in one-gallon containers in the chemical storage room); a proprietary glue (stored quantities under 20 gallons in a heating unit on the shop floor); small quantities of lubricating oils (stored in a flammable material storage cabinet in the chemical storage room); and janitorial and maintenance products (stored in janitorial closets near the employee restrooms). An emergency generator with an integral, double-walled diesel fuel tank also was noted to be present. Ramboll stated that no evidence of releases were observed.

Two additional prior Phase I ESA reports were noted to have been prepared for the 2400 Ringwood Avenue parcel, including a 1996 report by WHF and a 2006 report by Clayton. Ramboll (2020) stated that these reports did not identify any Recognized Environmental Conditions associated with the parcel. These prior reports were not provided for review by Cornerstone.

Ramboll (2020) indicated that the southerly adjacent parcel (*i.e.*, the on-Site parcel at 1849 Fortune Drive) was used for the fabrication of semiconductor microchips from the early 1980s to 2016, which involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning. These activities included the use of solvents, gases, acids, and other chemicals. The fabrication facility underwent decommissioning and closure activities under regulatory oversight between 2016 through 2019, which involved removal of all equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well subsequent excavation and off-Site disposal of arsenic impacted soils from this area). The facility closure activities reportedly did not involve the collection of soil vapor or groundwater samples, or the collection of soil samples in areas of the parcel other than in the vicinity of the former acid neutralization system.

The former semiconductor fabrication facility at 1849 Fortune Drive is located up-gradient of the 2400 Ringwood Avenue parcel, with respect to the anticipated groundwater flow direction. Ramboll noted that no groundwater sampling is known to have been conducted and that past industrial operations at 1849 Fortune Drive dating back to the early 1980s were reasonably chemically intensive. Ramboll stated that the possibility of contaminant migration onto the 2400 Ringwood Avenue property from this adjacent parcel could not be ruled out.

3.3.2 Prior Phase I ESAs, 1849 Fortune Drive

Three prior Phase I ESA reports previously were prepared for the 1849 Fortune Drive parcel, including a 2020 report by Ramboll, a 2017 report by Partner Engineering and Science, Inc. (Partner) and a 2015 Draft Phase I ESA prepared by Northgate Environmental Management (Northgate).

The 1849 Fortune Drive parcel historically was used for agricultural purposes from at least the 1930s until construction of the existing building in 1981 for use by SEEQ Technology Incorporated (SEEQ) for fabrication of semiconductor microchips. SEEQ operated at the property until 1995, when Micrel Semiconductor Inc. (Micrel) acquired the property and continued semiconductor microchip manufacturing operations. Micrel was acquired by Microchip Technologies in 2015. In 2016, manufacturing operations ceased, and certain facility decommissioning activities were undertaken. HC 1849 Fortune LLC reportedly acquired the property in 2017 under an agreement to complete remaining facility decommissioning activities. Facility decommissioning activities reportedly were completed in 2019, and the property has remained vacant since that time.

Past semiconductor fabrication operations at the 1849 Fortune Drive parcel reportedly involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning, which included the use of solvents, gases, acids, and other chemicals. These past operations involved the use of an acid waste neutralization system (comprised of epoxy-coated subgrade trenches containing piping, a sump, as well as aboveground process tanks and generation of hazardous wastes. 1849 Fortune Drive reportedly was listed as a large quantity generator (LQG) of hazardous waste since 1982 and routinely generated and treated hazardous waste on-Site. Waste was either treated by acid neutralization and disposed to the sanitary sewer, containerized and disposed (solids and liquids) off-Site, or passed through scrubbers prior to discharge to the atmosphere (gaseous compounds).

Two vapor degreasers containing halogenated solvents were noted to have been present. Partner (2017) noted that BAAQMD records included a 1992 violation for a liquid solvent leak at a vapor degreaser. Also, records from the City of San Jose Fire Department (SJFD) were noted to include a record of inspection dated May 9, 1992, which indicates that a degreaser “that had been relocated to Building 2 leaked”. The leak was reportedly within secondary containment and was cleaned up. An August 1991 Hazardous Materials Management Plan (HMMP) for SEEQ Technology, Inc. reportedly lists a Vapor Degreaser Room, identified as “Area T”, with the quantity of chemicals identified as 35 gallons, including isopropyl alcohol, acetone, and trichlorotrifluoroethane (Freon 113). The Freon 113 was identified with the trade name “Blaco Tron TMS+” and was presumed to be the solvent used in the vapor degreaser at that time. Hazardous waste disposal records reportedly indicated that 1.6 tons of hazardous waste with the California State Waste Code 211 for “Halogenated Solvents” were disposed from the Site in 1996, among other wastes (Partner, 2017).

As part of the semiconductor fabrication operations, acid wastewater was transferred throughout the plant in piping located within a sub-slab trench and discharged to a below grade, concrete lined collection sump, from which it was pumped to an acid waste neutralization system (AWNS). The AWNS consisted of a series of above grade treatment tanks located in a covered exterior area on the western side of the building. Acid waste was treated with calcium hydroxide before being discharged to the sanitary sewer. Waste hydrofluoric acid (HF) from the process reportedly was piped overhead in the plant and then underground outside the western building border to a 2,500-gallon waste HF aboveground storage tank (AST) located in a fenced enclosure to the west building. Partner (2017) reported that a 2002 Hazardous Waste Application listed the following annual waste generation quantities: waste process acid (125,000,000 gallons), waste hydrofluoric acid (HF) and water (82,000 gallons), mixed solvent waste (45,000 pounds), waste resistant strip (86,884 pounds), acid contamination solid probes (3,000 pounds), debris contaminated with arsenic (490 pounds), debris contaminated with resistive strip (1,460 pounds), waste paint (250 pounds), and lab packs (250 pounds).

Partner (2017) noted that Santa Clara County Department of Environmental Health (DEH) records included a 2012 Assessment Report on the Waste HF system by Chow Engineering that indicated the piping to the HF tank was in “very poor condition.” Two 2008 DEH Inspection Forms reportedly noted violations for improper labeling and materials grouping, and a 2001 inspection with secondary containment violations indicated that no secondary containment was present to capture potential releases. In addition, an October 29, 1993 SJFD Record of Inspection noted liquid spillage under sinks and waste piping and indicated waste piping needs leaks repaired (Partner, 2017).

The 1849 Fortune Drive parcel was identified as being listed on a database of historical underground storage tanks (USTs) (Partner, 2017). Information from the State Water Resources Control Board (SWRCB) identified two USTs as being installed in 1982 for SEEQ Technology. The first UST was identified as a 375-gallon acid waste “sump” that was ½-inch thick, epoxy-lined fiberglass within a concrete vault. The second UST was identified as a 350 gallon “tank” that stored acid waste and was constructed of ½-inch thick epoxy-lined “polypropylene” (sic) and double lined. A Site contact interviewed by Partner (2017) reportedly indicated that the historical UST database listings likely referred to the underground wastewater sump used to accumulate wastewater from the interior sub-slab trenches and direct it to the AWNS. Partner stated that the wastewater sump was observed to have what appeared to be a plastic liner in the bottom portion of it, in which wastewater was observed.

Facility decommissioning and closure activities were conducted under regulatory agency oversight between 2016 through 2019, which involved removal of equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well as subsequent excavation and off-Site disposal of arsenic-impacted soils from this area). Additional details regarding the closure activities are summarized in Section 3.7 of the 2020 report by Ramboll. The facility closure activities did not involve the collection of soil vapor or groundwater samples, or the collection of soil samples in areas of the property other than in the vicinity of the former acid neutralization system.

Ramboll (2020) and Partner (2017) identified Recognized Environmental Conditions associated with the past industrial operations and history of extensive chemical usage. Northgate (2015) stated *“we could not rule out the possibility that undocumented releases may have occurred at some time in the past. Additional evaluation of the potential presence of subsurface*

contamination at the Site would require on-Site soil and groundwater sampling and analysis.” These prior reports also noted that there is a potential for residual agricultural chemicals to remain in Site soil as a result of historical agricultural activities.

SECTION 4: RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency databases provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E 1527-13. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix B.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with the Site. The customary practice is to review information from standard sources that is reasonably available within reasonable time and cost constraints.

4.1.1 On-Site Database Listings

Past occupants of 1849 Fortune Drive including SEEQ, Micrel and Microchip were identified on multiple regulatory agency databases associated with the storage of hazardous materials and the generation of hazardous wastes. These listing appear consistent with operation of the former semiconductor fabrication facility as discussed in Section 3.3.2. HC 1849 Fortune LLC, a reported former property owner, and Hackman Capital Partners also were listed in databases that appear to be associated with waste disposal activities during facility decommissioning work in 2018 and 2019. SEEQ was listed on the HIST UST database; two USTs were listed as described above in Section 3.3.2.

Olympus America Inc. was listed at the 2400 Ringwood Avenue address on the Emissions Inventory (EMI) database that includes toxics and criteria pollutant emissions data collected by the California Air Resources Board (ARB) and local air pollution agencies. EMI listings often are associated with the operation of emergency generators. Olympus also was identified on the California Environmental Reporting System (CERS) and Certified Unified Program Agency (CUPA) databases as a facility with permits for storage of hazardous materials and generation of hazardous waste.

Olympus was identified at the 2400 Ringwood Avenue address on the HAZNET database, which contains data extracted from the copies of hazardous waste manifests received each year by the DTSC. Listed wastes disposed between 1997 and 2019 were categorized as laboratory waste chemicals; unspecified solvent mixtures; other organic solids; unspecified aqueous solutions; liquids with pH ≤ 2 ; unspecified oil-containing waste; unspecified organic liquid mixture; liquids with pH ≤ 2 with metals; other inorganic solid waste; asbestos containing waste; off-specification, aged or surplus inorganics; alkaline solution without metals pH ≥ 12.5 ;

hydrocarbon solvents; unspecified alkaline solutions; oxygenated solvents; unspecified sludge waste; and waste oil and mixed oil.

Olympus also was listed on the RCRA NonGen/NLR database. This database lists facilities that generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate RCRA hazardous waste. NLR means that the business is no longer registered. No violations were reported.

4.1.2 Nearby Spill Incidents

Based on the information presented in the agency database report, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 2400 Ringwood Avenue and 1849 Fortune Drive at the following public agencies: San Jose Building Department (SJBD), San Jose Fire Department (SJFD), and Santa Clara County Department of Environmental Health (DEH). During prior studies summarized in Section 3.3, SJBD, SJFD, and DEH files were reviewed and summarized. To limit duplication of efforts, Cornerstone's file review focused only on those files dated subsequent to the dates the most recent prior reports (Ramboll, 2020).

As of the date of the current report, the SJFD had not responded to our request for files. Because Site uses do not appear to have changed since completion of the recent Phase I ESAs by Ramboll in 2020, it appears unlikely that the SJFD would have additional information that would significantly alter the findings or conclusions of the current Phase I ESA.

No SJBD or DEH files were identified that were dated subsequent to the 2020 Phase I ESAs by Ramboll. However, based on cursory review of building plans from 1981 for 1849 Fortune Drive, a 6,000-gallon UST containing waste HF was depicted on the west side of the building within a below grade concrete vault. This UST was depicted in the general vicinity of the waste HF AST that was located within a fenced enclosure.

SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

5.1 RECENT USGS TOPOGRAPHIC MAP

A USGS 7.5 minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 45 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the northwest towards the San Francisco Bay.

5.2 HYDROGEOLOGY

Based on our previous experience in the area and review of historic depth to ground water maps (CGS, 2001), historic high groundwater is mapped to be between 5 and 10 feet below current Site grades. Current groundwater depths between 5 and 15 feet would be anticipated. A northwesterly regional ground water flow direction would be expected based on surface topography. Northwesterly, westerly and southwesterly flow directions were reported at other nearby properties based on information contained in the California Geotracker database.

SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

6.1 HISTORICAL SUMMARY OF SITE

The historical sources reviewed included those listed below; copies are included within the reports by Ramboll attached in Appendix A.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2016 obtained from EDR of Shelton, Connecticut.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historical topographic maps dated between 1889 and 2012.
- **Historical Fire Insurance Maps:** EDR reported that the Site was not within the coverage area of fire insurance maps.
- **Local Street Directories:** We reviewed city directories obtained from EDR that were researched at approximately 5 year intervals between 1922 and 2017 to obtain information pertaining to past Site occupants.

Based on our review, the above aerial photographs, topographic maps and city directories are consistent with the Site history discussed in Section 3.3 for the 2400 Ringwood Avenue and 1849 Fortune Drive parcels.

APN 244-17-005, located on the western portion of the Site, was formerly owned by Southern Pacific Transportation Company (SPTC) and historically it was used for agricultural purposes. Railroad tracks were constructed during the 1970s that extended south from Fortune Drive;

however, based on the aerial photographs and topographic maps, it does not appear that tracks extended to the north of Fortune Drive onto APN 244-17-005.

6.2 HISTORICAL SUMMARY OF SITE VICINITY

Based on our review of the information described in Section 6.1, the general Site vicinity historically consisted mainly of agricultural land (orchards and row crops) with widely spaced residences. By the late 1960s, an increase in commercial and residential development is apparent in the general vicinity, including an auto wrecking yard to the north of the Site, across Trade Zone Boulevard. Other adjacent properties are shown to have been developed for commercial use during the 1970s and 1980s.

SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 4. Photographs of the Site are presented in Sections 7.2.3 and 7.2.4.

7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on June 2, 2021. The Site reconnaissance was conducted by walking representative areas of the Site, including the interiors of the on-Site structures, the periphery of the structures and the Site periphery. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included the existing buildings and associated paved parking areas and vehicle drives (typical of developed properties).

7.2 OBSERVATIONS

7.2.1 2400 Ringwood Avenue

At the time of our visit, the 2400 Ringwood Avenue parcel was developed with a single story commercial building occupied by Olympus and used as a servicing facility for medical equipment (endoscopes and associated electronic equipment). Activities conducted were observed to consist of various electronics repairs, device cleaning, replacement of components, application of lubricants, limited bench top soldering, testing, warehousing of associated parts, shipping and receiving, and ancillary administrative activities. Observed hazardous materials consisted primarily of reagent alcohol (isopropyl alcohol, ethanol and methanol) that was stored in 1-gallon and smaller containers. Smaller containers of various lubricants, adhesives, sealants, and building maintenance products also were present. These materials were stored in metal flammable materials storage cabinets. Waste alcohol wipes, waste alcohol, and various universal wastes (e.g., light bulbs, batteries, etc.) were observed to be stored for subsequent off-Site disposal. Four 55-gallon drums of foam packaging components were located within the shipping department, and an emergency generator with an integral diesel AST was present within a fenced enclosure on the south side of the building. General housekeeping at the facility appeared orderly and no evidence of hazardous materials spills was observed.

7.2.2 1849 Fortune Drive

The 1849 Fortune Drive building was observed to be vacant. The former semiconductor fabrication equipment was observed to have been removed and most interior partitions and building finishes (flooring, ceilings, etc.) had been removed. Trenches within the building slab that formerly transferred acid waste to the AWNS were covered with plywood that was secured to the concrete building slab. Equipment pads on the north and east sides of the building contained chillers and cooling towers. An emergency generator with an integral diesel AST was present on the northern side of the building on a bermed concrete pad.

Equipment pads adjacent to the west side of the building were observed to contain chillers, cooling towers, air handling equipment, boilers, a vacuum pump, a reclaimed water AST, a corrosives storage cabinet, bunkers and bermed areas formerly used for storage of toxic gasses, acids, flammable materials, and hazardous waste, and a bermed area formerly containing the AWNS. The sump formerly used for the collection of acid waste was observed near the former AWNS location. The sump was covered with secured plywood and not accessible. An adjacent section of the piping trench leading to the sump was accessed by removing a section of the metal covering; no liquids or waste transfer piping were observed within the trench.

A fenced enclosure to the west of the building contained a concrete bermed area that formerly supported a waste HF AST. The AST had been removed and what appeared to be water was observed in the bermed area. Another fenced enclosure located north of the former HF AST contained a discarded boiler, electrical switchgear, four unlabeled 55-gallon drums (one was partially full of an unknown liquid and three were empty). A fenced enclosure at the northwest corner of the property formerly contained a liquid hydrogen AST; the AST was observed to have been removed.

A few other concrete pads were observed along the western side of the Site, on or immediately adjacent to APN 244-17-005. Based on information contained in prior reports and SJBD files, these pads and some dirt covered/unpaved areas on APN 244-17-005 formerly supported maintenance sheds, "chem tech" sheds, a slurry shed and former chemical storage bunkers.

In addition to the unlabeled drums noted above, a few additional empty 55-gallon and smaller drums and an empty 5-gallon container of polishing slurry were observed throughout the facility, along with two compressed gas cylinders near a chiller on the northern side of the building. One of the cylinders was labeled as containing freon, the other was unlabeled.

Six electrical transformers were observed on-Site that had been vandalized, resulting in transformer oil spills. The spilled oil was observed to have traversed concreted pads and asphalt paved drives, and in some cases was released to or drained to soil. Most of the spilled oil appeared contained to the Site; however, what appeared to be oil was observed within a below grade electrical vault and in electrical conduits extending to some of the transformers. The routing of these conduits is not known. Transformer core materials and insulation (formerly immersed in oil) were observed to be discarded near some of the transformers, mainly on unpaved areas on APN 244-17-005.

Based on observed placards on the transformers, four of the transformers were manufactured between 2000 and 2014. Two manufacturing dates are unknown/not accessible; one of these, which appeared older than the others, was labeled as having been tested for polychlorinated

biphenyls (PCBs) and noted to contain less than 50 ppm PCBs. Each of the six transformers had an oil capacity of between 500 and 600 gallons. Thus, over 3,000 gallons may have spilled on the Site. Smaller oil spills (likely a few gallons or less) were observed on concrete pads below a chiller on the north side of the building and below a vacuum pump on the western equipment pad. These spills also appeared to be the result of vandalism and the associated removal of copper wire and piping. The damaged transformer locations and areas of observed oil spillage are depicted on Figure 3.

Electricity and/or natural gas fuel sources appeared to be used for building heating/cooling purposes. Potable water appeared to be supplied by the local water service provider. The building presumably is connected to the publicly owned sanitary sewer system; no on-Site septic systems were obvious. On-Site storm water catch basins appeared to discharge via below ground piping to the City's storm water drainage system.

Table 4. Summary of Readily Observable Site Features

General Observation	Comments
Aboveground Storage Tanks	Observed as described above
Agricultural Wells	Not Observed
Air Emission Control Systems	Not Observed
Boilers	Observed as described above
Burning Areas	Not Observed
Chemical Mixing Areas	Observed as described above (formerly used areas)
Chemical Storage Areas	Observed as described above
Clean Rooms	Not Observed
Drainage Ditches	Not Observed
Elevators	Not Observed
Emergency Generators	Observed as described above
Equipment Maintenance Areas	Not Observed
Fill Placement	Not Observed
Groundwater Monitoring Wells	Not Observed
High Power Transmission Lines	Not Observed
Hoods and Ducting	Observed in chemical storage room at 2400 Ringwood. Remnant ductwork was observed at 1849 Fortune.
Hydraulic Lifts	Not Observed
Incinerator	Not Observed
Petroleum Pipelines	Not Observed
Petroleum Wells	Not Observed
Ponds or Streams	Not Observed
Railroad Lines	Not Observed
Row Crops or Orchards	Not Observed
Stockpiles of Soil or Debris	Not Observed
Sumps or Clarifiers	Observed as described above
Transformers	Observed as described above
Underground Storage Tanks	Not Observed
Vehicle Maintenance Areas	Not Observed
Vehicle Wash Areas	Not Observed
Wastewater Neutralization Systems	Bermed area of former AWNS was observed

The comment "Not Observed" does not warrant that these features are not present on-Site; it only indicates that these features were not readily observed during the Site visit.

SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

8.1 ENVIRONMENTAL QUESTIONNAIRE / OWNER INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire to the Site owner (STACK). The questionnaire was not completed by the property owner as of the date of this report.

8.2 INTERVIEWS WITH PERSON(S) KNOWLEDGEABLE OF SITE USE

During our visit to 2400 Ringwood Avenue, we interviewed Mr. George Greene, Facilities Associate Manager with Olympus. Mr. Green indicated that he has worked at the Olympus facility for the past 15 years and that Olympus has been the only occupant of the building. Mr. Green provided access to the facility and described the activities conducted by Olympus and the associated use, storage and handling of hazardous materials. The information obtained from Mr. Green was consistent with our observations described in Section 7.2.1.

STACK security staff provided access to the unoccupied building at 1849 Fortune Drive. The building does not appear to have been occupied since being acquired by STACK. As discussed in Section 3.3, STACK provided Cornerstone with copies of prior environmental reports that describe the prior Site uses.

8.3 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

SECTION 9: FINDINGS, OPINIONS AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general accordance with ASTM E1527-13 to support STACK in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site historically was used for agricultural purposes. The existing building at 1849 Fortune Drive was constructed in 1981 for use by SEEQ for fabrication of semiconductors. SEEQ operated at the property until 1995, when Micrel acquired the property and continued semiconductor microchip manufacturing operations. Micrel was acquired by Microchip Technologies in 2015. In 2016, manufacturing operations ceased and certain facility decommissioning activities were undertaken. HC 1849 Fortune LLC reportedly acquired the property in 2017 under an agreement to complete remaining facility decommissioning activities. Facility decommissioning activities reportedly were completed under regulatory oversight in 2019, and the property has remained vacant since that time.

The existing building at 2400 Ringwood Avenue was constructed in 1996. Since its construction, the building has been used as a medical equipment servicing facility by Olympus.

Ancillary operations include administrative activities, office operations, equipment rentals and building maintenance.

APN 244-17-005, located on the western portion of the Site, was formerly owned by Southern Pacific Transportation Company and, similar to the other Site parcels, it historically was used for agricultural purposes. Railroad tracks were constructed during the 1970s that extended south from Fortune Drive; however, based on the aerial photographs and topographic maps, it does not appear that tracks extended to the north of Fortune Drive onto APN 244-17-005. This parcel appears to have been used by occupants of 1849 Fortune Drive for the placement of storage sheds and other ancillary purposes.

9.2 CHEMICAL STORAGE AND USE

9.2.1 1849 Fortune Drive

Past semiconductor fabrication operations at the 1849 Fortune Drive parcel involved dry etching, wet etching, developing, diffusion, epitaxy, implanting, aligning, polishing, and spinning, which included the use of solvents, toxic gases, acids, bases and other chemicals. These past operations involved the use of an acid waste neutralization system with an associated sump and piping trenches, and generation of hazardous wastes. Wastes generated at the facility were either treated by acid neutralization and disposed to the sanitary sewer, containerized and disposed off-Site (solids and liquids), or passed through scrubbers prior to discharge to the atmosphere (gaseous compounds). Two vapor degreasers that appear to have utilized Freon 113 were operated at the Site. In 1992, a liquid solvent leak within secondary containment at a vapor degreaser was reported. Waste hydrofluoric acid was piped overhead in the plant and then underground outside the western building border to a 2,500-gallon AST located in a fenced enclosure to the west building. An assessment report on the waste hydrofluoric acid system by Chow Engineering (2012) indicated the piping to the hydrofluoric acid tank was in “very poor condition.” In addition, a 1993 SJFD Record of Inspection noted liquid spillage under sinks and waste piping and indicates waste piping needs leaks repaired (Partner, 2017).

Facility decommissioning and closure activities were conducted under regulatory agency oversight between 2016 through 2019, which involved removal of equipment, wipe sampling of certain surfaces, and soil sampling beneath the previous acid waste neutralization system areas (as well subsequent excavation and off-Site disposal of arsenic-impacted soils from this area). The facility closure activities did not involve the collection of soil vapor or groundwater samples, or the collection of soil samples in areas of the Site other than in the vicinity of the former acid neutralization system.

Based on the reported historical chemical use associated with semiconductor fabrication activities at the Site, we recommend that soil vapor and groundwater sampling be conducted prior to redevelopment of the Site to better evaluate if prior operations may have impacted the property. We also recommend preparing a Site Management Plan (SMP) and Health and Safety Plan (HSP) for the proposed demolition and development activities. The purpose of these documents will be to establish appropriate management practices for handling impacted soil, soil vapor and groundwater that may be encountered during construction activities. Based on the history of the Site, areas of impacted soil, soil vapor and groundwater may be encountered during construction activities, which may require special monitoring, handling and/or disposal.

During our visit, several 55-gallon and smaller drums and an empty 5-gallon container of polishing slurry were observed throughout the facility, along with two compressed gas cylinders. One of the 55-gallon drums was partially full of an unknown liquid. These remnant materials and empty containers should be profiled and properly disposed. An emergency generator with an integral diesel AST is present on the northern side of the building on a bermed concrete pad. This generator and AST also should properly disposed; a permit may be required from the DEH and/or SJFD.

Oil spills from six vandalized transformers were observed on-Site. The spilled oil was observed to have traversed concreted pads and asphalt paved drives, and in some cases was released to or drained to soil. Most of the spilled oil appeared contained to the Site; however, what appeared to be oil was observed within a below grade electrical vault and in electrical conduits extending to some of the transforms. The routing of these conduits is not known. Transformer core materials and insulation (formerly immersed in oil) were observed to be discarded near some of the transformers, mainly on unpaved areas on APN 244-17-005. Each of these six transformers had an oil capacity of between 500 and 600 gallons. Thus, over 3,000 gallons may have spilled on the Site. Smaller oil spills (likely a few gallons or less) were observed on concrete pads below a chiller on the north side of the building and below a vacuum pump on the western equipment pad. These spills also appeared to be the result of vandalism and the associated removal of copper wire and piping. We recommend that the spilled oil be cleaned from pavements and concrete pads and that impacts to soil be investigated and remediated. Oil contained within below grade utility vaults and electrical conduits should be removed and the extent of oil migration within these below grade features should be evaluated. To facilitate the planned development, we presume that the vaults and conduits will be removed; at the time of removal, underlying soil quality should be evaluated.

9.2.1.1 USTs

SEEQ Technology at 1849 Fortune Drive was listed on a database of historical USTs. Information from the SWRCB identifies two USTs as being installed in 1982. The first UST was identified as a 375-gallon acid waste “sump” that was ½-inch thick, epoxy-lined fiberglass within a concrete vault. The second UST was identified as a 350 gallon “tank” that stored acid waste and was constructed of ½-inch thick epoxy-lined “polypropylene” (sic) and double lined. A Site contact interviewed by Partner (2017) reportedly indicated that the historical UST database listings likely referred to the underground wastewater sump used to accumulate wastewater from the interior sub-slab trenches and direct it to the AWNS. This assumption appears reasonable; however, the lack of detailed documentation results in uncertainty. We recommend that the SMP described in the preceding Section provide protocols for handling USTs if encountered during construction activities.

Building plans from 1981 for 1849 Fortune Drive depict a 6,000-gallon UST containing waste HF on the west side of the building. This UST was depicted in the general vicinity of the waste HF AST that was located within a fenced enclosure. No other records indicating the presence of a 6,000-gallon UST were identified during this study; thus, it appears likely that this UST was never installed and an AST was alternatively used for collection of waste HF.

9.2.2 2400 Ringwood Avenue

The primary hazardous material used at the Olympus facility is reagent alcohol that is utilized for wipe cleaning of medical devices and stored in one-gallon containers. Smaller containers of

various lubricants, adhesives, sealants, and building maintenance products also are present. These materials are stored in metal flammable materials storage cabinets. Waste alcohol wipes, waste alcohol, and various universal wastes (e.g., light bulbs, batteries, etc.) are stored for subsequent off-Site disposal. Four 55-gallon drums of foam packaging components are located within the shipping department, and an emergency generator with an integral diesel AST is present within a fenced enclosure on the south side of the building. General housekeeping at the facility appeared orderly and no evidence of hazardous materials spills was observed.

Based on the relatively small quantities of hazardous materials used by Olympus and the lack of reported spills, the potential for past operations at 2400 Ringwood Avenue to have impacted the property appear low. This parcel is, however, located down-gradient with respect to the anticipated groundwater flow direction from the former semiconductor fabrication facility at 1849 Fortune Drive. The recommended soil vapor and groundwater sampling at 1849 Fortune Drive will help to better evaluate if the 2400 Ringwood Avenue parcel has been impacted by semiconductor fabrication activities on the adjacent parcel.

9.3 AGRICULTURAL USE

The Site was used for agricultural purposes for several decades. Pesticides may have been applied to crops in the normal course of farming operations. Residual pesticide concentrations may remain in on-Site soil. Because the Site will be capped by the planned structures and associated pavements and landscaping, risk to human health from residual pesticides will be significantly reduced. However, if elevated concentrations of agricultural chemicals are present, mitigation or soil management measures may be required during construction/earthwork activities. We recommend performing soil sampling to evaluate if agricultural chemicals are present.

9.4 RAILROAD RIGHT-OF-WAY

APN 244-17-005, located on the western portion of the Site, was formerly owned by SPTC. As previously noted, it does not appear that tracks extended to the north of Fortune Drive onto APN 244-17-005. Assorted chemicals historically were commonly used for dust suppression and weed control along rail lines. Based on the apparent lack of on-Site tracks, the potential for the parcel to have been impacted appears low. If a higher degree of confidence is desired, soil sampling should be considered.

9.5 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site. However, as is typical to many commercial areas, several facilities in the vicinity were reported as hazardous materials users. If leaks or spills occur at these facilities, contamination could impact the Site, depending upon the location of the property, the magnitude of the release, and the effectiveness of cleanup efforts.

9.6 ASBESTOS CONTAINING BUILDING MATERIALS (ACBMS)

Due to the age of the on-Site structure at 1849 Fortune Drive, building materials may contain asbestos. The potential for asbestos containing materials to be present at 2400 Ringwood

Avenue is lower due to its more recent construction date. Because demolition of the buildings is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

9.7 LEAD-BASED PAINT

In 1978, the Consumer Product Safety Commission banned lead-containing paints and coatings sold for consumer use. Some lead-containing products, such as industrial coatings, however, are still allowed. Based on the age of the existing structures, lead-containing paint is not likely to be present.

9.8 IMPORTED SOIL

If the planned development will require importing soil for Site grading, we recommend documenting the source and quality of imported soil. The DTSC's October 2001 Clean Fill Advisory provides useful guidance on evaluating imported fill.

9.9 DATA GAPS

ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E 1527-13 despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us; thus, no interviews with former occupants and owners were conducted during this study. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. However, these individuals may have knowledge of the Site that is not otherwise readily available or apparent. Thus, the absence of these interviews may diminish our ability to identify Recognized Environmental Conditions.
- The environmental questionnaire was not completed by the property owner as of the date of this report. Additionally, the City of San Jose was not interviewed in regard to APN 244-17-005. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider this data gap to be significant.
- As of the date of this report, the SJFD did not respond to our requests for available information regarding the Site. Because Site uses do not appear to have changed since completion of the recent Phase I ESAs by Ramboll in 2020, it appears unlikely that the SJFD would have additional information that would significantly alter the findings or conclusions of the current Phase I ESA. We do not consider this data gap to be significant.

9.10 DATA FAILURES

As described by ASTM Standard Designation E 1527-13, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA.

9.11 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 of 2400 Ringwood Avenue and 1849 Fortune Drive, San Jose, California. This assessment identified the following Recognized Environmental Conditions¹.

- Past semiconductor fabrication operations at the Site involved the use and storage of a variety of hazardous materials and generation of hazardous waste. These prior activities may potentially have impacted the Site. Further evaluation appears warranted.
- The Site historically was used for agricultural purposes. There is a potential that residual pesticides could remain in Site soil. If present, this soil may require appropriate management.
- Several areas of recently spilled oil were observed at the Site resulting from vandalized transformers, a chiller and a vacuum pump. These spills appear to have impacted on-Site soil and also migrated to below grade utility vaults and conduits.

SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support STACK in evaluation of Recognized Environmental Conditions associated with the Site. STACK understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. STACK understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from

¹ The presence or likely presence of hazardous substances or petroleum products on the Site: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

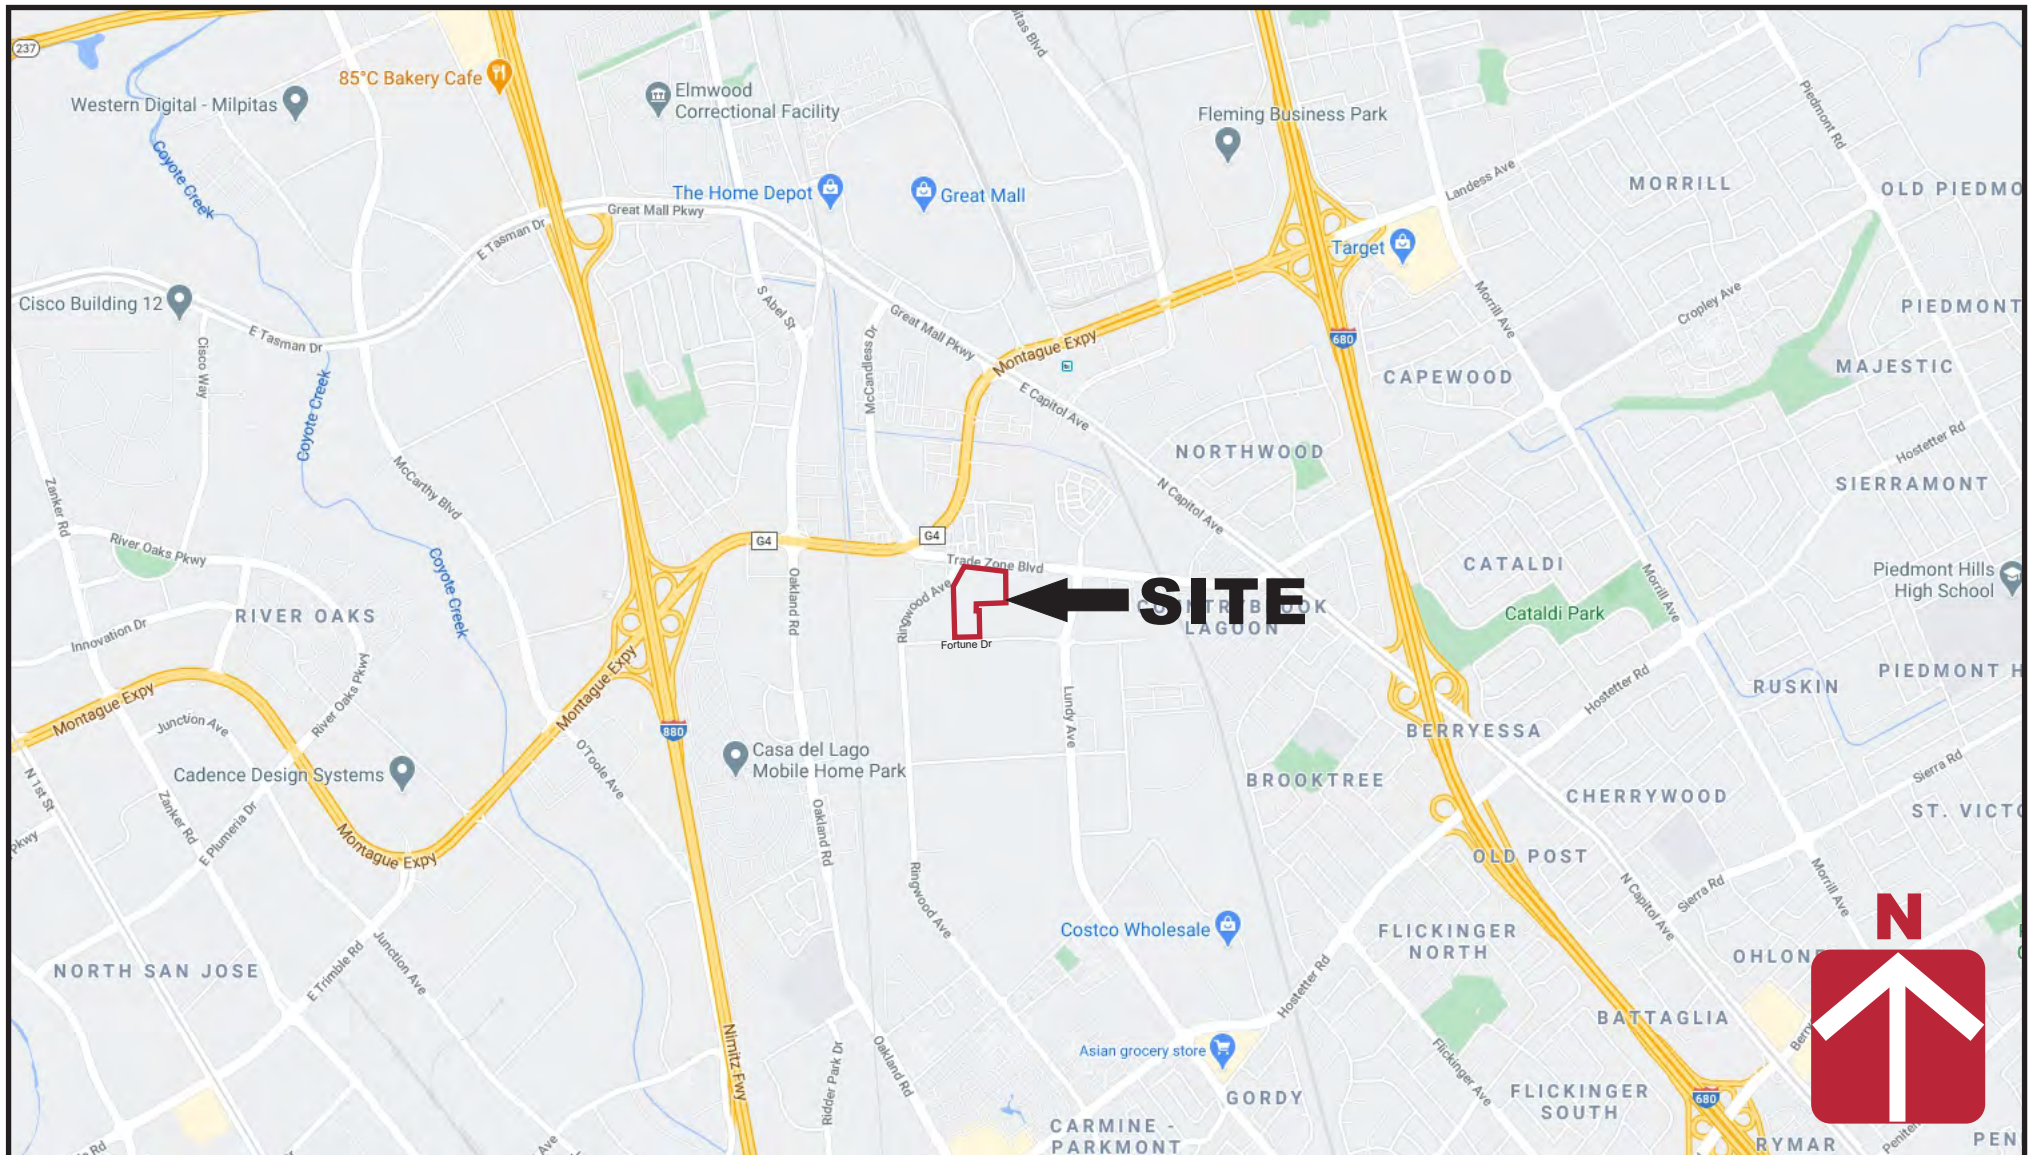

interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E 1527-13, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

STACK may have provided Cornerstone environmental documents prepared by others. STACK understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of STACK and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. An electronic transmission of this report may also have been issued. While Cornerstone has taken precautions to produce a complete and secure electronic transmission, please check the electronic transmission against the hard copy version for conformity.

Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there

EXECUTIVE SUMMARY

are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 7 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there are 2 CA RESPONSE sites within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 44 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there is 1 CA UST site within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 01/25/2021 has revealed that there is 1 CA VCP site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 55 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA BOND EXP. PLAN: Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

A review of the CA BOND EXP. PLAN list, as provided by EDR, and dated 01/01/1989 has revealed that there is 1 CA BOND EXP. PLAN site within approximately 1 mile of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 120 CA CUPA Listings sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D018
Waste Description: BENZENE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U134
Waste Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Notes: Returned to compliance on 11/18/2016. Observed 10-15 cardboard boxes containing 1 gallon containers of various hazardous wastes in the warehouse without the required markings. Affix hazardous waste labels to all hazardous waste containers.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 139940
Site Name: OLYMPUS AMERICA
Violation Date: 10-21-2016
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: Returned to compliance on 11/18/2016. Observed lead-free solder used in test line, however could not fully ascertain how it is being managed. Make a hazardous waste determination on any lead-free solder waste, and if determined to be hazardous, manage as a fully-regulated hazardous waste or as a scrap metal. Submit documentation to support your determination.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 139940
Site Name: OLYMPUS AMERICA
Violation Date: 10-21-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 11/18/2016. Hazardous materials inventory lists aromatic isocyanate as being stored in warehouse when in actuality it is stored in chemical room. Polysiloxane is listed as being handled in warehouse, however per facility staff, this chemical may have been replaced by the truefoam product observed on this inspection. Revise hazardous materials inventory and resubmit within 30 days.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: Equinix - SV13
Violation Date: 09-12-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: "Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs."
Violation Notes: Returned to compliance on 09/12/2018. Plan on site was not signed by management. Mr. Hayes signed the plan during the inspection. NO RESPONSE OR CORRECTIVE ACTION REQUIRED.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to adequately describe the physical layout of the facility, or no description of the physical layout of the facility included within the SPCC plan.
Violation Notes:	Returned to compliance on 07/16/2015. The SPCC Plan emergency contact list is not current.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	APSA
Violation Source:	CERS
Site ID:	432098
Site Name:	Equinix - SV13
Violation Date:	09-12-2018
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to implement the SPCC Plan.
Violation Notes:	Plan is not being fully implemented in that fuel delivery logs are not being kept per plan (receipt available, but not consistent with plan procedure), inspections are being done and recorded (but not using the plan's referenced forms) and fuel delivery procedures can not be implemented because site does not have the signed referenced ni the procedure for reminding drivers to unhook and check system prior to drive off (see section 3.4.6, page 3-5 of plan). Recommend laminating this sign and storing it in/at the fill port if procedure is to be maintained.

Violation Source:	CERS
Site ID:	432098
Site Name:	Equinix - SV13
Violation Date:	09-12-2018
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	"Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container's supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."
Violation Notes:	Plan notes that tank integrity will be maintained through annual inspection of tank that meets STI SP001 standards. This was not done in 2017. Either revise plan to note the frequency of external integrity testing or begin using plan referenced form annually.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-12-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility has notified of hazardous waste activities on CERS. Maintaining ID number CAL000431629, active as of inspection. No shipment of waste from site except as noted below. Site is expected to generate coolant from emergency generator radiator service and episodic cleaning of cooling towers. Generator crankcase service provided by Peterson, site has receipts demonstrating the removal of contractor generated oil and filters from routine service. Would recommend utilizing satellite accumulation/point of generation accumulation for onsite storage. Antifreeze is not eligible for offsite transfer by service contractor like oil unless the contractor takes the waste directly to a permitted facility (Household hazardous waste or other desitnation/disposal facility)

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-12-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: CERS 10093255 annual submittal 6/1/17 and 1/30/18 reviewed map and emergency plan/training plan - using template for EP/TP NOTE: HMBP reports generator belly tank holding 2000 gallons of diesel fuel. Tank is marked as having 3000 gallons capacity, and fill level visual indicator notes that tank is full. STRONGLY RECOMMEND changing your volume from 2000 to 3000 in next annual submittal for this tank (or maintaining documentation demonstrating how the tank is maintained at the 2000 gallon level). Site is currently permitted for storage of 4-6 chemicals. ONLY have 2 reportable chemicals onsite at time of inspection, with potential 3rd (extra cylinders of R22- not noted onsite as of inspection). Permit will be adjusted.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-12-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility subject to SPCC and APSA by storage of petroleum (diesel) in more than 1320 gallons. Regulated units include 8000 gallon AST and a 2600 gallon generator belly tank. Site additionally has PGE owned oil filled electrical equipment (transformers) and oil filled operational equipment (generator crankcases -110 gal each). -- Have included transformers in plan for spill response only. Plan dated January 2018. PE stamped. Copy available on site and on site copy is signed by management. AST and belly tanks are double walled UL listed with interstitial monitoring to Veeder Root monitoring panel. Overfill prevention by mechanical device at the 8000 gal AST (confirmed installation) with electronic monitoring in generator belly tank. Areas are clean, free of spills or staining except as noted above. All

Environmental Interest/Information System:

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters. ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Region: STATE
Facility Status: Completed - Case Closed
Status Date: 04/20/2012
Global Id: T10000002508
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 06S1E17N01s
Latitude: 37.4039146720809
Longitude: -121.893825531006
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: 009
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Soil, Under Investigation
Potential Contaminants of Concern: Acetone, Xylene, Lead, Nickel, MTBE / TBA / Other Fuel Oxygenates, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The site has been occupied by auto dismantlers since possibly 1965. Soil sampling was conducted prior to Pick Your Part leasing the property and again when their lease ended. They have proposed to do surface excavation in areas. No investigation has been conducted to determine if groundwater has been impacted.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility encompasses 2284 Ringwood Ave, San Jose Suites A-C. Facility performs masking, unmasking, coating, and cleaning of electronic components. Performed a facility walk-through with Marlene Scoppettone (Quality Supervisor) and Mike Forney (Chief Technology Officer) and observed the following hazardous waste: -Solvent waste (combination of toluene/acetone/mek dependent upon need): 4 x 55 gallon drums in hazardous waste storage room in Suite A. Solvent waste consists of the following waste streams: 1. Solvent-contaminated debris: 1 x 5 gallon container in masking/unmasking room located in Suite A 2. Spray booth filters generated from 2 x spray booths located in Plasma/Conformal coating room in Suite A 3. Waste solvent from 1 x paint can cleaner located in Plasma/Conformal coating room in Suite A (containers used in this process are "California" empty) 4. Waste detergent from 1 x Trident defluxing system [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-15-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility performs masking, encapsulation and conformal coating of electrical components. Facility routinely generates solvent-borne related paint waste from cleaning of spray equipment. Notes: - EPA ID CAR000070714 (ACTIVE) - Facility performs cleaning of coated components using a 75% IPA/25% DI water solution. Spent solution is placed into a distillation unit which recycles and separates "dirty" DI Water from clean IPA. IPA is recycled and reused in process while the "dirty" DI water is drained in sanitary sewer. - Facility has 2 spray booths in which conformal coating activities take place. Booth filters are replaced daily to avoid contamination of non-compatible products. Review of SDS sheets indicate that all coating applied do not contain heavy metals as clear coating are only applied in this area. - Observed 1 CNC machine used for manufacturing of aluminum parts. Facility acquired machine approximately one year ago and has not needed coolant replacement [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID: 109113
Site Name: CUBIC MACHINING INC
Violation Date: 05-08-2015
Citation: HSC 6.11 25404.1 - California Health and Safety Code, Chapter 6.11, Section(s) 25404.1
Violation Description: Failure to obtain and/or maintain an active hazardous waste generator permit.
Violation Notes: Returned to compliance on 06/26/2015. Facility generates hazardous waste but does not have the required permit with our agency. NOTE: A permit invoice will be generated and mailed to facility within 1-2 weeks. Upon payment, the required permit will be issued.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-08-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Site was formerly Cubic Machining. Optima Precision began operating at this location in December 2014. Facility is a CNC machine shop that works primarily with aluminum. Facility contains 4 CNC machines utilizing a closed-loop grease cooling system and Hangsterfer's S-506 oil. The

Violation Date: 12-18-2015
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 01/06/2016.

No HMBP

has been submitted to the California Environmental Reporting System (CERS). Within 30 days, complete and submit the following (sections): -Facility information/ownership page -Hazardous materials inventory/site map -Emergency response plan/training plan NOTES: -If you would like assistance with completing and submitting your HMBP, you may contact Hazardous Materials Technician Michelle Santos at (408) 918-1981 to set-up an appointment. -CERS website: <http://cers.calepa.ca.gov>

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 362738
Site Name: TTE PRODUCTS INC
Violation Date: 12-18-2015
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 01/05/2016.

Observed 2

x 55 gallon poly drums of Oily water that have been accumulated on-site for beyond the accumulation time limit. Within 30 days, arrange for the oily water to be disposed of and provide a copy of the consolidated manifest (disposal receipt) to our office.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 362738
Site Name: TTE PRODUCTS INC
Violation Date: 12-18-2015
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post, next to the telephone, Emergency Information (SQG) containing the location of emergency equipment, contact names and numbers.
Violation Notes: Returned to compliance on 01/06/2016.

No

emergency response posting was observed in the facility.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-18-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Observed the following hazardous materials at or above reporting thresholds: -Oily water: 2 x 55 gallon poly drums NOTES: -CERS ID: -Facilities are required to provide initial training for new employees and annual refresher training for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the emergency response plans and procedures included in the facility's HMBP. Training must be documented electronically or by hard copy. Training records must be kept available for inspection for a minimum of 3 years. [HSC 25505(a)(4), 25507.1(a)(3)]
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-18-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility does precision machining primarily on aluminum (periodic work is done with stainless steel and plastic). Performed a facility walk-through with Mr. Onodera and observed the following hazardous waste: -Oily water: 2 x 55 gallon poly drums -Oily Debris: 1 x 5 gallon bucket The following violations were corrected on-site at the time of the inspection: -G020 (hazardous waste markings) for 2 x 55 gallon poly drums of oily water & 1 x 5 gallon bucket of oily debris The most recent pick-up of the oily water occurred on 4/21/15 per consolidated manifest review. NOTES: -CAL000403407 is active. -Fire extinguishers were observed as maintained. -Absorbent was noted. -Turnings and grindings are managed as scrap metal. -Contact email: ttepro@sbcglobal.net -Per this inspection, the facility hazardous waste permit will be revised to a PE 2201.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-27-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility walk-through performed with owner, Frank Pennell. Facility provides the following services: metal engraving, screen printing, photoetching, and electrical discharge machining (EDM). Waste streams generated include but are not limited to: - Nickel containing waste liquids (photo etching solution) - Silver containing waste liquids (fixer/developer) - Used oils (way lube/hydraulic/and cutting fluids) - Spent oil filters (paper) Notes: - Per owner, facility does not typically generate waste inks. Any left over inks are stored and reused. Owner states any unusable/off spec inks are to be managed as hazardous waste. - Screen washing is performed using water and ProChem ES-900 Emulsion Remover (corrosive). Per owner, ES-900 is diluted (200:1) with water prior to use on silk screens. - All screen printing and machining equipment (such as EDM ad sheer cutter) is maintained by facility. Facility will generate used oil during routine maintenance, but no [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-16-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Observed the following hazardous materials at or above HMBP reporting thresholds: -Nickel-containing aqueous waste: 1 x 55 gallon drum -Ex/cal 747: 1 x 55 gallon drum NOTES: -CERS ID: 10347364 -Facilities are required to provide initial training for new employees and annual refresher training for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the emergency response plans and procedures included in the facility's HMBP. Training must be documented electronically or by hard copy. Training records must be kept available for inspection for a minimum of 3 years. [HSC 25505(a)(4), 25507.1(a)(3)] -Per this inspection, the HMBP permit will be revised from a BP02 (4-6 chemicals) to a BP01 (1-3 chemicals).

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-16-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility does screenprinting, engraving, photosensitive, and EDM work. Performed a facility walk-through with Mr. Pennell and observed the following hazardous waste: -Nickel-containing aqueous waste: 1 x 55 gallon drum -Silver-containing waste (fixer/developer): 3 x 15 gallon poly drums Nickel-containing waste is generated from use of a unit that produces images on metal. Per Mr. Pennell, the composition of the resulting aqueous waste is 99% water/1% nickel. Silver-containing waste is generated through photo developing. This waste is managed by a silver recycler and picked-up every year (last pick-up was on 5/1/15). Observed 1 x automated engraver. Per Mr. Pennell, the coolant in this unit is changed-out approximately every 6 months and equates to approximately 3 gallons of hazardous waste. Mr. Pennell stated that in the past, the coolant has been dropped-off at Jiffy Lube.

Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.209
Year:	2008
Gepaid:	CAR000084095
TSD EPA ID:	CAT080013352
CA Waste Code:	223 - Unspecified oil-containing waste
Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.22935
Year:	2008
Gepaid:	CAR000084095
TSD EPA ID:	CAT080014079
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.02
Year:	2008
Gepaid:	CAR000084095
TSD EPA ID:	NVT330010000
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	67.724
Year:	2008
Gepaid:	CAR000084095
TSD EPA ID:	NVT330010000
CA Waste Code:	352 - Other organic solids
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	0.02
Year:	2008
Gepaid:	CAR000084095
TSD EPA ID:	CAD028409019
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.15
Year:	2008
Gepaid:	CAR000084095
TSD EPA ID:	CAD028409019
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.15
Year:	2008
Gepaid:	CAR000084095
TSD EPA ID:	CAD044429835
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 359732
Site Name: HOF MACHINING INC
Violation Date: 09-18-2015
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)

Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 11/02/2015.

No HMBP

has been submitted to the California Environmental Reporting System (CERS). An invitation will be issued to hofmachining@yahoo.com to create an account on CERS. Within 30 days, complete and submit the following (sections): -Facility information/ownership page -Hazardous materials inventory/site map -Emergency response plan/training plan
NOTES: -A site map and emergency response/training plan template will be emailed to hofmachining@yahoo.com -If you would like assistance with completing and submitting your HMBP, contact SCC HMCD Hazardous Materials Technicians Michelle Santos at (408)918-1981 or Jean Nguyen at (408)918-1955. -CERS website: <http://cers.calepa.ca.gov>

walk-through with Mr. Kooplicat, and observed the following hazardous waste: -Waste oily water: 2 x 55 gallon drums Hazardous waste is picked-up approximately every 4 months (with an annual change-out of all coolant annually). Facility contains 4 x CNC machines and 2 x lades with aluminum, plastic, and steel as the primary materials handled. Floor is mopped regularly and oily water managed as hazardous waste. The following violations were corrected on-site at time of inspection: -G211 (emergency posting) -G020 (hazardous waste markings) for 1 x incomplete hazardous waste label on 55 gallon drum of waste oily water & for missing labels on hazardous waste accumulation containers located beneath 4 x CNC machines NOTES: -EPA ID: CAL000366171 is active -Fire extinguishers were observed as annually maintained -Spill control equipment was available on shop floor -Scrap metal is recycled

Violation Date: 04-13-2016
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi

Violation Notes: Returned to compliance on 04/22/2016. Facility has 1 used antifreeze and 1 used oil tank that has not been assessed. Perform assessment per 66265.192(h) or complete an application to apply for a tank assessment exemption (provided with report).

Violation Description: APSA Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 07/01/2019. Facility does not currently meet "tank in an underground area" (TIUGA) conditions as defined in Health and Safety Code (HSC). Per HSC 25270.2(o)(1)(C)(i) "The storage tanks meets one or more of the following conditions: The storage tank contains petroleum to be used or previously used as a lubricant or coolant in a motor engine or transmission, oil-filled operational equipment, or oil-filled manufacturing equipment, is situated on or above the surface of the floor, and the structure in which the tank is located provides enough space for direct viewing of the exterior of the tank except for the part of the tank in contact with the surface of the floor." Due to insufficient aisle space, facility is not able to inspect all sides of single walled aboveground tanks located in storage pits. Tanks that are located below the surface of the ground and cannot meet TIUGA requirements are subject to Underground Storage Tank requirements.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affected:

Other Groundwater (uses other than drinking water), Soil, Soil Vapor

Potential Contaminants of Concern:

Trichloroethylene (TCE), Benzene, Gasoline, MTBE / TBA / Other Fuel
Oxygenates, Total Petroleum Hydrocarbons (TPH)

Site History:

The site is comprised of 4 adjacent parcels. Two of the parcels were previously investigated and remediated (Pick Your Part) and closed to an industrial standard. The parcels are being redeveloped residentially. 3 of the parcels were historically used for auto dismantling. Proposed removal of undocumented fill material offsite and placement of NOA containing (<1%) under hardscape/foundations; excavation of other contaminated soil. Groundwater was pumped from open excavation, treated and used for dust suppression.

Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	In preparation for redevelopment of the southern portion of the property, site assessments were performed. In April 2019, four soil vapor samples were collected from the northeastern portion of the site. One of the samples (EB-4), reported tetrachloroethene (PCE) at a concentration of 480 micrograms per cubic meter (a%g/m3), which is an order of magnitude above the environmental screening level (ESL)

of 67 a%/m3 for a commercial land use scenario. EB-4 is located outside of the future building footprint in an area where there is a drain trench and associated underground piping. The drain trench is planned to be removed as part of the site redevelopment and will be the location of the backup power generation for the new building. Based on the results of the 2019 investigation, the DEH requested additional soil vapor and groundwater sampling to adequately define the extent and potential source of the PCE soil vapor plume. Seven additional soil vapor samples were collected in May and July 2020 near soil vapor sample location EB-4. As indicated in the Report, sample location EB-16 reported a PCE concentration of 460 a%/m3. EB-16 is located approximately 20 feet south of EB-4 and outside the footprint of the future building footprint. All other soil vapor samples collected during the May and July 2020 sampling events did not report PCE concentrations above the ESL of 67 a%/m3. In addition, the groundwater samples did not report any volatile organic compounds (VOCs) above the laboratory detection limits. Based on these findings the DEH does not require vapor mitigation for the planned building.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.
Violation Notes: THE FACILITY IS CONDUCTING WEEKLY INSPECTIONS OF ALL TEN EMERGENCY DIESEL GENERATORS, HOWEVER THE FREQUENCY OF THESE INSPECTIONS WERE NOT DOCUMENTED IN THE SPCC PLAN AND THESE WERE OPERATION AND MAINTENANCE INSPECTIONS NOT SPCC INSPECTIONS. ADD ADDITIONAL LANGUAGE THAT THE FACILITY IS CARRYING OUT SPCC INSPECTIONS CHECKING FOR LEAKS, SPILLS, EMERGENCY SPILL EQUIPMENT, THAT THE SECONDARY CONTAINMENT FREE OF LIQUIDS. MAINTAIN THESE INSPECTION RECORDS FOR THREE YEARS.

Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 385472
Site Name: Infomart Data Centers
Violation Date: 04-11-2018
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description: Failure to amend the SPCC Plan within 6 months: 1. When the facility has had a change in design, construction, operation, or maintenance which affects the facility's discharge potential. AND/OR 2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.
Violation Notes: WHEN THE TWO 4,200 GALLON EMERGENCY DIESEL GENERATORS WERE ADDED TO THE FACILITY. THE FACILITY FAILED TO AMEND/UPDATE ITS SPCC PLAN AS REQUIRED WITHIN 6 MONTHS.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: ELITE METAL FABRICATION INC
Violation Date: 03-23-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/06/2016.

Observed 6

x 5 gallon containers of used oil without the required markings. A sample hazardous waste label was provided to Mr. Rojas.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 02-09-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to conduct a Hazardous Waste Generator permit investigation due to unpaid permit fees in the amount of \$193.75. Confirmed with Rogelio Rojas that the invoice was getting sent to the correct address, but it was not received due to changes in personnel. Payment was collected at this time in the amount of \$167.00 (Check #3092). A one-time penalty fee waiver was issued for \$26.75. Upon processing of the payment, the Hazardous Waste Generator permit will be issued and mailed to the facility.

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-23-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility fabricates sheet metal. Performed a walk-through and observed the following hazardous waste: -Used oil: Approximately 20 gallons in 6 x 5 gallon containers Small quantities of used oil are generated from maintenance of 2 x MC machines used for cutting sheet metal. Disposal options for used oil were discussed with Mr. Rojas. NOTES: -CAL000351573 is inactive -Fire extinguishers were observed as maintained -Spill control is available -A copy of the County of Santa Clara Hazardous Waste Recycling & Disposal for Small Businesses brochure was provided to Mr. Rojas -Facility email: elitemetalfab_roge@sbcglobal.net

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to maintain the following general tank operating requirements:
a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: 1) Spill prevention controls (e.g., check valves, dry discount couplings); 2) Overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and 3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds

Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if the waste generated is a hazardous waste.

Violation Notes: Returned to compliance on 10/29/2017. observed box of old chemicals and aerosol cans under a bench in the lab. Determine if these items are usable or waste and manage appropriately. Mr. Valencia indicated that a permanganate sludge was to be added to the bin used to hold F006 copper sludge. This bin is also used to hold "skins" of stripped masking materials. Please ensure that the permanganate will not react with this material prior to adding to the waste. Also, should ensure that profile for this waste includes this component.

Violation Date: 11-06-2014
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 12/05/2014. While annual training is provided to employees, facility has not been provided training that meets the criteria specified below. REPEAT VIOLATION FROM 2011 INSPECTION

Eval Notes: Site is printed circuit board job shop. Operating under EPA ID CAD981414295 Inspection took place 9/13, with final paperwork review and report delivery today (9/26) Most wastes generated are treated onsite in permitted treatment unit (PBR). Ship F006 sludge, spent cyanide rinse solution, copper sulfate tetramine dichloride (D004) solution, spent acids. Processes include plotting ,imaging and developing (inc. printmaking to film), screening (and screen wash), laboratory analysis (onsite QA), drilling and routing, plating (electro, electroless, cleaning and prep), stripping and equipment cleaning (incl. empty container mgnt). Liquids were noted in many of the containment systems at and around plating and processing areas. Liquids may be within these areas during processing, so long as they are removed daily so that the containment areas are not being used to store the liquids. DTSC wet floor guidance provided. Waste generation has been reduced to below 25 [Truncated]

Eval Notes: System is single unit which combines a batch treatment tank for concentrates prior to mixing with untreated, commingled more dilute wastes in flow through system. Main flow through system consists of pH adjust, coagulation and flocculation and pressing to remove water. System is fed by equalization tank located in vault into which all wastes flow prior to treatment. Incidental pH adjustment and possibly neutralization take place in this tank. Inputs include acid rinses, caustic rinses, metal (tin, copper, nickel) plating rinses, second stage cyanide rinse, residual liquid post silver removal, screen rinse, floor rinse, solder mask rinse (as major sources) Prior to addition to flow through system, more concentrated acid and base wastes are neutralized or pH adjusted in a batch treatment tank. Once treatment occurs, the contents of the tank are emptied to the EQ tank. Also prior to treatment in the flow through system, containers (from 1 to 55 gallons in size) that once [Truncated]

Eval Type: Routine done by local agency
Eval Notes: Per review of waste shipping records and treatment records, facility generates more than 25 tons/yr and permit will be increased from LQ06 5 to <25 tons/yr (\$776/yr) to LQ07 25 to <50 tons/yr (\$1,108/yr). Note 1: facility uses concentrated permanganate solution in one of the plating baths. It is believed by facility that oxidizer potential is neutralized after being used in the process and mixed with acids. Ensure no EPA regulated oxidizers as defined in 261.21(a)(4) are ran through the treatment system as it is not permitted. Note 2: Facility's waste disposal contractor identifies etch waste (ammonium hydroxide with copper) with a D004 for arsenic both on the manifest and the land disposal restriction however facility indicates no arsenic is involved in the process nor is a component of the circuit board. Address this issue with the waste disposal contractor that profiled this waste. If waste contains no arsenic, ensure the waste code is removed from the profile, [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-09-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. Facility is a distribution center for Amazon. Hazardous waste is generated in the form of non-saleable (damaged) merchandise. Hazardous waste storage area is in northwestern corner of warehouse. Potential hazardous waste is staged in the following pre-sort bins: -Other (flammable solids) -Aerosols/Paints -Cleaners -Pesticides/Herbicides -Cosmetics/Perfumes -Medicines/Supplements -Batteries -Oil/Lubricants -Electronics At end of each shift items are moved from pre-sort bins to hazardous waste containers. At time of inspection the following hazardous waste containers were observed: -Waste pesticides: 1 x 5 gallon container -Waste corrosive liquids: 1 x 5 gallon container -Non-RCRA hazardous waste liquids (soaps/latex paint): 1 x 5 gallon container Currently a written log is being maintained to track merchandise that is managed as hazardous waste. NOTES: -CAL000413025 is ACTIVE -Fire [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 12-13-2018
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to witness testing of overfill prevention equipment on YRC's (property owner) underground storage tank when a Caterpillar mobile generator was observed. These mobile generators have attached fuel tanks that typically hold approximately 100 gallons of Diesel fuel thereby making it subject to hazardous materials business plan (HMBP) requirements. NOTES: -Facility had already submitted a HMBP to CERS in October, however only below-HMBP quantity chemicals were disclosed. -A BP01 (1-3 reportable chemicals) permit will be issued to this business.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 07/02/2019. OVERFILL INSPECTION WAS CONDUCTED DECEMBER 12, 2018. OVERFILL PREVENTION EQUIPMENT WAS REQUIRED TO BE INSPECTED AT LEAST ONCE BEFORE OCTOBER 13, 2018 AND 36 MONTHS THEREAFTER. ****THE NEXT OVERFILL INSPECTION IS DUE BEFORE OCTOBER 13, 2021 NOT DECEMBER 14, 2021.

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

The following components were re-tested and passed during this inspection; - 1 STP sump sensor provided an audible/visual alarm at the panel. - 1 dual-float hydrostatic sensor provided an audible/visual alarm at the panel for high/low conditions. Notes; 1) All alarm conditions are being monitored by Insite 360 through the Veeder Root panel. Insite 360 is then relaying all alarm conditions to YRC Corporate office. 2) A print out of all of the alarm conditions created at the time of this inspection with the actual time was provided via e-mail by LeaAnne

Violation Notes: Returned to compliance on 02/07/2019. Nature and number of violations indicates hazardous waste management training is inadequate for scope of operations.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 85431
Site Name: WESTCOAST PRECISION INC
Violation Date: 10-21-2015
Citation: 22 CCR 12 66262.34(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(a)

Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.

Violation Notes: Returned to compliance on 11/09/2015.

-Observed

1 x 55 gallon drum of waste absorbent on right-side of storage shed that has been accumulated past allowed time limit (180 days).

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 85431
Site Name: WESTCOAST PRECISION INC
Violation Date: 10-21-2015
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)

Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.

Violation Notes: Returned to compliance on 11/09/2015.

-Observed

2 x 55 gallon red drums on left-side of rear storage shed that were inaccessible at time of inspection and that Mr. Burgonio could not identify. He stated that it was left behind by previous tenant of neighboring space that Westcoast Precision has since taken over. Make a determination if waste is hazardous.

Violation Description:	12, Section(s) 66262.11 Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 02/07/2019. Facility must make a proper waste determination for scotch brite pads used for deburring in detail area. Pads may meet hazardous waste criteria for California regulated metals which include but are not limited to brass, copper, and chromium. Additionally, metals particles from deburring activities may be <100 microns in size, which would meet hazardous waste criteria and must be managed as such.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site with Hazardous Materials Specialist II, Albert Wolff, of HMCDD to perform routine inspection. Facility is a manufacturing/machine shop utilizing CNC machines and working with the following metals: aluminum, stainless steel, brass, and copper. Notes: All metals shaving and fines are managed are recycled for scrap value. Consolidated manifest for oily water/coolant reviewed at time of inspection (2016-2018). Shop rags and towels are managed as hazardous waste. Facility does not utilize uniform service. Quality manager states facility does not perform any type of parts washing. Chemical parts washing/cleaning is performed off site. Emergency information posted as required. Fire extinguishers serviced 4/14/18.

HMBP reporting thresholds: -Lubricant: 4 x 55 gallon drums & app. 650 gallons each in 16-17 CNC machines COMMENT: Facilities are required to provide initial training for new employees and annual refresher training for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the emergency response plans and procedures included in the facility's HMBP . Training must be documented electronically or by hard copy. Training records must be kept available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4), 25507.1(a)(3)] -A HMBP training record template has been provided to Mr. Burgonio.

NOTES: -CERS ID: 10349149

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-21-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility operates app. 16-17 CNC machines for precision machining, and works primarily with aluminum (stainless steel and plastic handled periodically). Performed a facility walk-through with Mr. Burgonio, and observed the following hazardous waste: Rear lot storage area: -Used oil: 5 x 55 gallon drums -Waste absorbent: 1 x 55 gallon drum The following violation was corrected on-site: G110 (Maintenance and operation of facility) for 3 x 55 gallon drums stored in rear lot in a manner that increases risk of release. Per Mr. Burgonio and review of disposal receipts, used oil is picked-up app. every 1-4 months depending upon work volume. NOTES: -CAL000362608 is active -Contaminated textiles are managed as hazardous waste and stored with waste absorbent -Fire extinguishers are annually maintained -Spill control equipment is available -Emergency posting was observed

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 11/19/2016.

Cease any

further evaporation of Aquanox A8830 cleaning solution until a hazardous waste determination can be made. To make a hazardous waste determination, collect a representative sample of spent cleaning solution, and submit it to state-certified lab for a CAM-17 (California-regulated metals) analysis. Additionally, take this sample with an adequate amount of solution to allow for further testing (STLC analysis) if needed. Contact me to arrange a time and date when sampling can be witnessed by our agency.

Eval Date: 04-26-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste treatment inspection. Facility perform cleaning of stencils in stencil cleaning room. According to Mr. Hong, stencils are first cleaned with wipes. Next, stencils are placed in 1 x ultrasonic cleaning unit containing Aquanox A8830 to remove any lead-containing and lead-free solder residue. Approximately 6-7 stencils are cleaned per day, and cleaning solution is deemed spent by personnel after approximately 6 weeks. The spent Aquanox A8830 is then pumped into an evaporator located next to ultrasonic cleaning unit. Once spent solution has evaporated, a trough is used to remove solder-containing sentiment from bottom of evaporator and is placed into 1 x 5 gallon container of waste lead-containing solder.

Site Name: BOJO INC
Violation Date: 12-22-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 01/25/2017. Facility has not annually certified their HMBP since 2013. Log-in to your California Environmental Reporting System website account, update your HMBP, and resubmit it. If you require assistance please contact Michelle Santos at michelle.santos@cep.sccgov.org or Myra Reichardt at myra.reichardt@cep.sccgov.org
Violation Division: Santa Clara County Environmental Health

S113083408

Violation Notes: generator knowledge or applying testing method.
Returned to compliance on 01/07/2017. Facility uses a bath of Printex D-Solv to remove ink from equipment. A review of the Safety Data Sheet shows that product contains 1 or more chemicals (N-Methyl-Pyrrolidone) at percentages that contain potential toxicity properties. Currently, spent solvent is being disposed into the sanitary sewer. Cease this practice until a hazardous waste determination can be made. If found to be hazardous, manage accordingly.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 99506
Site Name: BOJO INC
Violation Date: 12-22-2016
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: Returned to compliance on 01/25/2017. California EPA ID (CAL000368019) number assigned to this facility is inactive. Facility has been provided with DTSC form 1358.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Facility manufactures plastic parts. Observed the following hazardous materials at or above HMBP-reporting thresholds:
-Hydraulic oil: 1 x 55 gallon drum and an undetermined amount in machines on shop floor
NOTES: -CERS ID: 10457950 -Facility contact email: mjohnson@bojo-inc.com

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility utilizes inks in process. Inks are cleaned from equipment in a small bath containing "Printex" brand "D-Solv". Although product container advertises itself as "biodegradable" a review of the Safety Data Sheet showed it contains constituents that may meet hazardous waste criteria for toxicity. According to Mr. Johnson spent bath solution is currently disposed of into the sanitary sewer. NOTES: -California EPA ID (CAL000368019) number assigned to this facility is inactive.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

OSHA ESTABLISHMENT

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Site ID: 407017
Site Name: PURE WAFER INC
Violation Date: 10-07-2014
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 11/07/2014. Some training records are kept but not in sufficient detail to satisfy the large quantity generator training requirements.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-25-2011
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspector Name: Santa Clara
Eval Division: Santa Clara County Environmental Health
Eval Program: HWLQG
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 2/7/18 and concludes today with issuance of the Official Notice of Inspection. Facility resurfaces and polishes wafers. Performed a walk-through with Mr. Rob Cornell and Mr. Terry Gunn (facility Manager), and observed the following hazardous waste: -Waste hydrofluoric acid -Waste sulfuric acid/copper sulfate -Spent activated carbon media -Spent resin -Waste potassium hydroxide -Waste oily water -Used oil filters -Small quantities of universal waste (batteries) -Off-spec chemicals (as generated during clean-ups/audits) According to facility personnel, chemistry utilized in etching baths does not meet the hazardous waste criteria for corrosivity. After use in baths chemistry is plumbed to the AWN where it is adjusted to POTW-acceptable pH levels and then is discharged to the sanitary sewer. Due to the usage of hydrofluoric acid on-site, a hazardous waste follow-up inspection will be performed within 30 days to examine this process more [Truncated]

Eval Notes:

Facility walkthrough with Steven Frank, Consulting Director, EH&S, Terry Gunn, Operations Manager and Afrim Kryeziu Director of Manufacturing/CA Operations Wafer Reclaim Services. Ruben Williams, HMCD was also present. Facility is a wafer reconditioning business. Part of the process uses hydrofluoric acid (HF) in greater than 1% concentration over the threshold quantities. Following the facility walkthrough, 4 covered processes were identified: Room 122: Strip and Etch- 5x 7 gallon sinks of HF at 49% and 1x 55 gallon spent HF at ~12%, Room 124: Production Storage Room- 61x 1 gallon HF at 49% storage in cabinets, Room 170: Main Chemical Storage- 24x 1 gallon HF at 49% storage in cabinets, Room 172: Waste Storage Room- 3x 55 gallons HF at ~12%. Facility also uses HF solutions in other processes that do not meet CalARP criteria either due to concentration or quantity. Pending the results of the offsite consequence analysis (OCA), the facility is tentatively [Truncated]

Eval Notes:

On-site to witness the site's hazardous waste determination sampling regarding the wafer cleaning process that utilizes Hydrofluoric Acid, 49% (HF). Present during the sampling event were Rob Cornell and Terry Gunn from Pure wafer as well as Ray Maiden and Albert Wolff from this office. The sampling event was to mimic real world conditions to determine if waste HF concentration was at or above the regulatory threshold of 180 mg/l. Facility Plumbing: The facility utilizes aboveground piping and lift-stations to drain all fixed chemical baths. The lift-stations are monitored by floats, which activate lift-pumps to transport effluent to the site's acid-waste neutralization (AWN) that discharges to the sanitary sewer (POTW). For today's sampling event took place in Room #122 (Strip & Etch) and all upstream influent sources were isolated and the lift-station was empty. In addition, the automatic lift-pumps were turned off to facilitate a representative sample of HF [Truncated]

Eval Notes: Per manifest data, facility has gone in and out of large quantity generation(LQG) status depending on the month. Facility subjects itself to full RCRA LQG standards including submitting a biennial report. Facility receives used wafers and reclaims them per customer request. Reclamation and reconditioning involves a process that uses multiples acids and sometimes caustic liquids. *NOTE* Facility ships copper contaminated media on a uniform hazardous waste manifest and uses the following shipping name: "Non RCRA hazardous waste liquid". In the additional information (box 14), the waste is described a "spent cation media SCH". I recommend that the facility include information in the shipping name identifying it as copper contaminated media so there is no doubt as to what the waste is.

Eval Notes: Inspector Name: Santa Clara
Eval Division: Santa Clara County Environmental Health
Eval Program: HWLQG
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 2/7/18 and concludes today with issuance of the
Official Notice of Inspection. Facility resurfaces and polishes
wafers. Performed a walk-through with Mr. Rob Cornell and Mr. Terry
Gunn (facility Manager), and observed the following hazardous waste:
-Waste hydrofluoric acid -Waste sulfuric acid/copper sulfate -Spent
activated carbon media -Spent resin -Waste potassium hydroxide -Waste
oily water -Used oil filters -Small quantities of universal waste
(batteries) -Off-spec chemicals (as generated during clean-ups/audits)
According to facility personnel, chemistry utilized in etching baths
does not meet the hazardous waste criteria for corrosivity. After use
in baths chemistry is plumbed to the AWN where it is adjusted to
POTW-acceptable pH levels and then is discharged to the sanitary
sewer. Due to the usage of hydrofluoric acid on-site, a hazardous
waste follow-up inspection will be performed within 30 days to examine
this process more [Truncated]

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP)
inspection. Facility handles the following hazardous materials at
HMBP-reporting thresholds: -Oxygen: Approximately 4,140 cu ft
-Sulfuric Acid 96%: Approximately 1692 pounds -Sulfuric Acid (bath
solution): Approximately 736 pounds -Hydrofluoric Acid 49%:
Approximately 2623 pounds -Spent carbon: Approximately 600 pounds
-Sodium Hydroxide: Approximately 400 gallons -Nitric Acid 69.5%:
Approximately 154 pounds -Hydrogen Peroxide 30%: Approximately 160
gallons -Potassium Hydroxide 45%: Approximately 160 gallons -Spent
Cation resin: Approximately 81 gallons -Waste Activated Charcoal
Carbon Filter Media: Approximately 600 pounds -Waste oily water: 55
gallons -Propane: Approximately 60 gallons NOTES: -CERS ID: 10116682
-A HMBP was submitted on 5/22/17 -A HMBP training log is maintained

Eval Division:	electronically and was reviewed
Eval Program:	Santa Clara County Environmental Health
Eval Source:	HMRRP
	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-09-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility walkthrough with Steven Frank, Consulting Director, EH&S, Terry Gunn, Operations Manager and Afrim Kryeziu Director of Manufacturing/CA Operations Wafer Reclaim Services. Ruben Williams, HMCD was also present. Facility is a wafer reconditioning business. Part of the process uses hydrofluoric acid (HF) in greater than 1% concentration over the threshold quantities. Following the facility walkthrough, 4 covered processes were identified: Room 122: Strip and Etch- 5x 7 gallon sinks of HF at 49% and 1x 55 gallon spent HF at ~12%, Room 124: Production Storage Room- 61x 1 gallon HF at 49% storage in cabinets, Room 170: Main Chemical Storage- 24x 1 gallon HF at 49% storage in cabinets, Room 172: Waste Storage Room- 3x 55 gallons HF at ~12%. Facility also uses HF solutions in other processes that do not meet CalARP criteria either due to concentration or quantity. Pending the results of the offsite consequence analysis (OCA), the facility is tentatively [Truncated]
Eval Division:	Santa Clara County Environmental Health
Eval Program:	CalARP
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	06-14-2018
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site to witness the site's hazardous waste determination sampling regarding the wafer cleaning process that utilizes Hydrofluoric Acid, 49% (HF). Present during the sampling event were Rob Cornell and Terry Gunn from Pure wafer as well as Ray Maiden and Albert Wolff from this office. The sampling event was to mimic real world conditions to determine if waste HF concentration was at or above the regulatory threshold of 180 mg/l. Facility Plumbing: The facility utilizes aboveground piping and lift-stations to drain all fixed chemical baths. The lift-stations are monitored by floats, which activate lift-pumps to transport effluent to the site's acid-waste neutralization (AWN) that discharges to the sanitary sewer (POTW). For today's sampling event took place in Room #122 (Strip & Etch) and all upstream influent sources were isolated and the lift-station was empty. In addition, the automatic lift-pumps were turned off to facilitate a representative sample of HF [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-07-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Per manifest data, facility has gone in and out of large quantity generation(LQG) status depending on the month. Facility subjects itself to full RCRA LQG standards including submitting a biennial report. Facility receives used wafers and reclaims them per customer request. Reclamation and reconditioning involves a process that uses multiples acids and sometimes caustic liquids. *NOTE* Facility ships copper contaminated media on a uniform hazardous waste manifest and uses the following shipping name: "Non RCRA hazardous waste liquid". In the additional information (box 14), the waste is described a "spent cation media SCH". I recommend that the facility include information in the shipping name identifying it as copper contaminated media so there is no doubt as to what the waste is.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D008
Waste Description: LEAD

Waste Code: D011
Waste Description: SILVER

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
