Docket No. 21-ESR-01

NOTICE OF REMOTE-ACCESS  
WORKSHOP

RE: Summer 2022 Stack Analysis

## **Notice of Staff Information Workshop about the Summer 2022 Stack Analysis**

**January 14, 2022**

9:00 a.m. – 10:30 a.m.

**Remote Access Only**

The California Energy Commission (CEC) will host a workshop to provide an update on the Summer 2022 Stack Analysis and provide stakeholders another opportunity to ask questions about the method and results. The Summer 2022 Stack Analysis provides a high-level evaluation of anticipated electric demand and supply during the critical summer months of July through September. The analysis considers average and extreme weather conditions. A quorum of commissioners may participate, but no votes will be taken.

The workshop will be held remotely, consistent with Assembly Bill 361 (Rivas, Chapter 165, Statutes of 2021) to improve and enhance public access to state agency meetings during the COVID-19 pandemic by allowing broader access through teleconferencing options. The public can participate in the workshop consistent with the direction provided below. The CEC aims to begin promptly at the start time and the end time is an estimate based on the agenda proposed. The workshop may end sooner or later depending on various factors.

### **Agenda**

Staff will make a presentation on the Summer 2022 Stack Analysis and review enhancements to the analytical method and updates to data and assumptions, since the previous version was published in September 2021. Staff will solicit feedback from stakeholders on the method and assumptions.

A detailed meeting agenda will be posted prior to the workshop at the [21-ESR-01 docket](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=21-ESR-01), <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=21-ESR-01>

## **Background**

During the September 8, 2021 Business Meeting, CEC staff presented a preliminary analysis of summer electric reliability. The assessment compares anticipated electric supply to projected demand under average and extreme weather conditions. The purpose of the stack is to provide situational awareness of reliability for the summer and the potential need for contingency resources in the event the state experiences extreme heat events, such as those the state experienced in 2020 and 2021.

## **Remote Attendance Instructions**

The workshop may be accessed by clicking the Zoom link below or visiting [Zoom](https://join.zoom.us) at <https://join.zoom.us> and entering the ID: **942 5604 5444** and password: **182614** for the workshop listed below.
