The product that changed everything energy

To save hundreds of millions on electric charging stations that may be like the old phone booths we used to have.

We have new technology that harnesses 90% of mechanical kinetic energy from all vehicles. You may know of an old bike generator light. This generator headlight technology is old but works. We have advanced this old tech through innovation and have adapted it to all vehicles with our designs. We can harness energy from 1.2 million vehicles that travel 3 trillion miles each year but we need help to get there.

Abuanthony Alim, Harnessing Ur wasted energy, "from Ur vehicles", turning into money & expanding Ur opportunities. We have products

Thanks
