CONSERVATION AND DEVELOPMENT COMMISSION

RESOLUTION ADOPTING QUALIFYING CAPACITY OF SUPPLY-SIDE DEMAND
RESPONSE WORKING GROUP INTERIM REPORT

WHEREAS, the Final Root Cause Analysis, prepared for Governor Newsom by the California Energy Commission (CEC), California Public Utilities Commission (CPUC), and California Independent Operator (CAISO) and published on January 13, 2021, identified actions to be taken by the three entities to reduce the potential for grid outages, like those that occurred in the summer of 2020, and recommended additional analysis and stakeholder engagement on the performance of dispatched supply-side demand response; and

WHEREAS, the CPUC issued Decision 21-06-029, in Rulemaking 19-11-009 concerning resource adequacy on June 25, 2021, which requested the CEC to launch a stakeholder working group process and make recommendations for a new capacity counting method for supply-side demand response, and to submit its recommendations for implementation in the 2023 resource adequacy year to the CPUC no later than March 18, 2022; and

WHEREAS, the CEC launched a stakeholder working group process in July 2021 and engaged with stakeholders throughout 2021 and into early 2022 to develop actionable recommendations on issues associated with the qualifying capacity of supply-side demand response; and

WHEREAS, the assigned CPUC commissioner issued a scoping memo and ruling, in Rulemaking 21-10-002 concerning resource adequacy, on December 2, 2021, which requested that the CEC submit its report into the CPUC resource adequacy proceeding in February 2022 rather than March 2022; and

WHEREAS, the CEC made a draft report with its proposed recommendations to the CPUC available to the public on January 24, 2022.

THEREFORE BE IT RESOLVED, the CEC hereby adopts the Qualifying Capacity of Supply-Side Demand Response Working Group Interim Report along with any changes identified in the February 16, 2022 Business Meeting, and directs CEC staff to submit the report into the CPUC resource adequacy proceeding.
