Subject: Solar Energy Generating System (SEGS) VIII (88-AFC-01C), Request to Terminate CEC License

Dear Mr. Heiser:

Luz Solar Partners, Ltd., VIII (Project Owner), an indirect wholly owned subsidiary of Terra-Gen, LLC, hereby submits this request to terminate the California Energy Commission (CEC) license for the Solar Energy Generating System (SEGS) VIII (88-AFC-01C).

The SEGS VIII facility was an 80-megawatt capacity solar thermal electricity generating system facility for the Southern California Edison transmission grid located near Harper Lake, in San Bernardino County. The facility was certified by the CEC in March 1989. The following describes key dates associated with decommissioning of the SEGS VIII facility:

- May 1, 2020: Luz Solar Partners, Ltd., VIII submitted a Decommissioning Plan to the CEC.
- July 23, 2020: CEC Staff Analysis concluded that the activities proposed in the Decommissioning Plan would not have a significant effect on the environment or on an environmental justice population and would be consistent with applicable laws, ordinances, regulations and standards, as required by General Compliance Condition DECOM-1.
- August 20, 2020: CEC issued the Notice of Determination approving the SEGS VIII Decommissioning Plan.
- October 21, 2021: CEC issued a full Notice to Proceed with Decommissioning Activities for SEGS VIII.
- April 15, 2022: SEGS VIII decommissioning is scheduled to be complete (final inspection date).
- Certificate of completion from the Designated Chief Building Official, stating that all Decommissioning Plan requirements have been met, is anticipated by or before April 29, 2022.

We respectfully request that CEC Staff include approval of this SEGS VIII license termination request at the **May 11, 2022**, CEC Business Meeting.

If you have questions about this request to terminate license, please contact Amy Fuller, Terra-Gen's Permitting Director, at 619-994-2532, or via e-mail at AFuller@terra-gen.com.

Sincerely,

Kevin Butler, VP of Development
Terra-Gen
