**Webinar Notice for the Southern California Level 2 Incentive Project
Prelaunch Webinar**

Additional submitted attachment is included below.

Property Owners May Apply for EV Charger Incentives

With increasing numbers of electric vehicles on Southern California roads, demand is growing for public charging infrastructure. Beginning April 5, the [Southern California Level 2 Incentive Project](#) will make installing electric vehicle chargers more affordable for businesses, multifamily properties, local governments and nonprofits in Los Angeles, Orange, Riverside and San Bernardino counties. If you own or manage a qualifying property, you'll want to attend this webinar.

Join panelists from the Center for Sustainable Energy, Clean Power Alliance and the California Energy Commission to find out more about qualifying for rebates and installing Level 2 chargers on your property. Attendees will learn about rebate eligibility, program requirements and how to apply for funding. After the presentation, panelists will host a Q&A session, so plan on sticking around to ensure all your questions get answered.

Southern California Level 2 Incentive Project Prelaunch Webinar

Thursday, March 24

12 - 1 pm PDT
