RE: NEBB ATTCP Annual Status Report for 2021

Dear Mr. Cantrell,

TRAINING, CERTIFICATION & REPORTING ACTIVITY: As of 3/4/2022, NEBB has three certified employers and three certified technicians.

For this reporting period (January 2021 – December 2021): Currently, there are a total of 74 technician applications for certification; 13 applications are being verified, one is in the process of hands-on training, 59 are in the process of written exams, and one is under ATTCP review for payment received for certification. In addition, there are a total of 31 employer applications for certification. Ten applications are being verified, 19 are in the process of online training, one is in the written exam process, and one is under ATTCP review for payment received for certification.

During this reporting period, no projects or acceptance tests have been performed under the NEBB program. This is not to say that no tests have been performed, but none have been done through the Document Registry at this time. Therefore, there have been no quality assurance and accountability activities, including desk form reviews or onsite audits.

NEBB did not take any actions to correct problems with ATT's field performance or ATEs.

NEBB continues to meet the requirements of §10-103.2 as an ATTCP.

Please do not hesitate to contact us if you have any questions regarding this report.

Best regards,

Tiffany J. Meyers
NEBB Executive Vice President
