SDSU Gets OK from Imperial County to Build STEM Lab

San Diego State University, which is headquartered in San Diego, is about to have a bigger presence in the Imperial Valley. The four-year university already has two campus locations in Imperial County – one in Calexico and one in the outskirts of Brawley (pictured above).

This week, the Imperial County Board of Supervisors made official its support to have SDSU build a 65,000-square-foot science, technology, engineering and math (STEM) teaching and research facility at its Brawley campus.

What this means is that, at some point in the near future, SDSU will be able to offer a range of four-year degree science and technology programs in the Imperial Valley, something that’s never been offered in the region before.
