RE: City of San José Concurrence to Mitigation Monitoring and Reporting Program (MMRP) for the San José Data Center Small Power Plant Exemption Environmental Impact Report (SCH#2021020002)

Dear Lisa Worrall,

Thank you for including the City of San José Planning, Building and Code Enforcement Department in the environmental review process for the subject project. The Planning Division oversees the City's General Plan and zoning policies; review applications for planning permits; and engage the community on development proposals. The following comments are based on our review of the Mitigation Monitoring and Reporting Program (MMRP).

The City of San José will serve as the enforcement agency for the MMRP, ensuring the San José Data Center complies with all requirements outlined in the MMRP.

Thank you for including the City of San José in the environmental review process. Should you have any questions regarding this letter, please contact Adam Petersen, contract environmental planner at adam.petersen@sanjoseca.gov.

Sincerely,

Cassandra Van Der Zweep, Supervising Environmental Planner
