Docketed Date:	7/15/2022

Incentive-Based QC Method – Revised Penalty Structure

**CEC Supply Side DR QC
Working Group**

July 14, 2022

Advancing Our Clean Economy

➤ Revised Penalty Structure

- Propose to revise penalty to closely match PG&E's proposed Capacity Bidding Program (CBP) structure in its 2024-2027 DR program application
- Greatly simplifies the penalty structure
- Implicitly addresses the weather-normalization issue because the penalty threshold is low enough that it should allow for temperature-related derates
- Will impose more severe penalties for non-performance

Hourly Delivery Capacity Ratio	Payment	Penalty
≥ 0.50 and ≤ 1.0	Delivered Demonstrated Capacity up to 100% of Monthly Supply Plan QC	0
≥ 0 and < 0.50	0	100% of Monthly Supply Plan QC
