(Title 20 Cal. Code. Regs., § 2505 et seq.)

CEC-13 (Revised 03/17)

2. State and justify the length of time the Energy Commission should keep the information or data confidential.

Shell Energy requests a confidentiality period through the year of filing, December 31, 2022, consistent with prior confidentiality designations by the CEC and with CPUC Decisions 06-06-066, as modified by D.08-04-023 and D.21-11-029.

- 3(a). State the provision(s) of the Public Records Act (Gov. Code, § 6250 et seq.) or other law that allows the Energy Commission to keep the information or data confidential, and explain why the provision(s) apply to that material.

The subject data is commercially sensitive information that is subject to protection from public disclosure pursuant to Govt. Code section 6254.7(d), and the CEC's regulations provide for such information to be kept confidential upon request pursuant to 20 CCR section 2505(a)(1)(D).

- 3(b). Discuss the public interest in nondisclosure of the material submitted for a confidential designation. If the material contains trade secrets or its disclosure would otherwise cause loss of a competitive advantage, please state how it would be lost, the value of the information to the applicant and the ease or difficulty with which the information could be legitimately acquired or duplicated by others.

Public disclosure of this information could competitively harm Shell Energy because the disclosure of its historical retail sales data could be used, together with procurement data applicant is required to disclose to the CPUC, to directly or indirectly derive Shell Energy's net short position, thereby placing Shell Energy at a competitive disadvantage in the wholesale and retail electricity markets and harming customers, with no offsetting public interest benefit from disclosure of this information. Such disclosure, whether direct or indirect, could increase Shell Energy's power procurement costs and the costs paid by its customers.

4. State whether the information or data can be disclosed if it is aggregated with other information or masked to conceal certain portions (including but not limited to the identity of the applicant). State the degree of aggregation or masking required. If the data cannot be disclosed even if aggregated or masked, explain why.

If the subject data is aggregated with the same type of data reported to the CEC by other ESPs, it could be publicly disclosed without risk of material harm to applicant or its customers.

5. State how the material is kept confidential by the applicant and whether it has even been disclosed to a person other than an employee of the applicant. If it has, explain the circumstances under which disclosure occurred.

Shell Energy restricts access to the subject information to Shell Energy employees and agents who agree to maintain the information on a confidential basis. Shell Energy has not revealed the confidential information to any individuals other than Shell Energy employees, attorneys for Shell Energy, and applicable regulatory agencies (e.g., the CPUC) that have required disclosure, subject to confidentiality protections.

I certify under penalty of perjury under the laws of the State of California that the information contained in this application for confidential designation is true, correct, and complete to the best of my knowledge and that I am authorized to make the application and certification on behalf of the applicant.
