Close Diablo Power Plant on schedule

Do not extend the life of Diablo nuclear power plant for one more day. As long as it continues to operate, it is a clear and present danger to our state and nation, for the following reasons:

*Diablo is seismically vulnerable to earthquakes and tsunamis. Remember what happened to Fukushima!

* Diablo is old and not reliable. Maintenance has been deferred. The last replacement for aging parts resulted in a seven-month outage. Diablo's once through cooling system is now unlawful.

*There is no safe storage available for its extra high level radioactive waste.

* PG&E is a corporate felon, responsible for over 100 dead, thousands of homes and businesses burned, hundreds of thousands acres scorched. It can not be trusted.

*The proposal to extend operation severs the closure agreement of 2016.

*The continued operation of Diablo discourages the use of renewables.

To extend the life of this aging, dangerous plant is immoral and insane.
