Keep Diablo open

This is not the time to shut energy sources. Europe has PROVED the GREEN agenda does NOT WORK. Germany and Spain have cut or shut power. Europe is bringing back FOSSIL FUELS by necessity. China is building coal plants. Other countries still have nuclear and are NOT SHOOTING THEMSELVES in the foot by going green. Green cars are BOMBS, blowing up even at rest. How many people die when a EV bus blows up. Women are in danger waiting for charges of EV car. The batteries to build and throw out every two years use massive amounts of fossil fuel (more than gas cars) and are destructive and poisonous to our land.

China makes all green energy - wind, solar, cars. They have declared war upon us and RELIANCE ON CHINA is a NATIONAL SECURITY THREAT. We need our own energy like Diablo and all the oil pumps on land and off shore that we currently have in CA and we should be getting the benefits of as residents (but no, sent to foreigners illegally). DIABLO provides a CLEAN RELIABLE ENERGY source that we NEED. KEEP DIABLO OPEN.
