Nuclear Power is too dangerous

We live close enough to San Onofre for the nuclear powered plant to be a grave threat to our family. But, the issue is far greater than SoCal safety.

1. Nuclear fallout. The Diablo C power plant is located too close to a major fault line. The California coast line is no longer stable; cliffs are crumbling and ocean is rising
2. The infrastructure is OLD
3. Nuclear waste is a hazard indefinitely
4. We need CLEAN ENERGY solutions to begin to halt/reverse climate change
