## **Decommission Diablo**

Diablo nuclear power plant is that is a liability and risk and hazard for everyone and it's immediate area and beyond. The problem of nuclear nuclear waste storage is is significant as are the underlying fault lines beneath the power plant. The last thing we need is another Fukushima daiichi level emergency. As for jobs and local funding funding for education, the best thing we can do is create clean energy jobs and and direct legislation to pull money from from Military overspending to education. Please decommission Diablo on schedule. It will create create a safer situation on our pristine coastline and will encourage our leaders to find cleaner ways to power our state and beyond.
