Please keep Diablo Canyon open

Diablo Canyon is urgently useful in the fight against climate change.

Diablo Canyon supplies ~8% of California's electricity. We are nowhere near being able to replace all that electricity with solar or wind power. If we shut down Diablo Canyon, that zero emissions power will be replaced by climate-warming gas power, dramatically **increasing** the state's greenhouse gas emissions.

To minimize climate catastrophe, we need Diablo Canyon to stay open.

MIT and Stanford researchers have demonstrated that Diablo Canyon is safe to keep running. <https://energy.stanford.edu/.../assessment-diablo-canyon...>
