Support for Diablo Canyon

California claims to be concerned with climate change. Yet, the state proposes to shut down a massive zero carbon energy source. The hypocrisy is jaw dropping.

As an advanced reactor developer in Kansas, we do not have any particular dog-in-this-fight. We are, however, disgusted with the blatant attempt to further drive up energy costs in California just to know-tow to the radical green energy religion.

I was born in San Diego and am a 3rd generation California. My dad lives in Solana Beach and his electrical bill is stupefyingly high by Kansas standards.

If the Commission actually cares about the the consumer and the environment, then keep Diablo Canyon open.
