## **Please keep Diablo Canyon open!**

We need reliable zero emission energy sources. Wind and solar are great but don't produce round the clock or in other conditions. They also take up LOTS of open space. Battery storage is also expensive and at scale consume large quantities of lithium, cobalt and other rare and problematic metals. Nuclear power is manageable and we have shown that when managed carefully it can safely produce ZERO emission power around the clock. Diablo Canyon also employs a lot of people in my county. KEEP DIABLO CANYON OPEN! Thank you.
