## **Keep the Diablo Canyon Power Plant Open**

Decision makers should know they're making the right choice to allow Diablo Canyon to continue to generate as much as 1/6th California's clean electricity and help keep the grid reliable. Experts have estimated that California can save \$20 billion in costs by not replacing Diablo Canyon, and instead use that money to replace coal, oil and gas generation between now and 2045. California is a bellwether for the entire United States- please make the best choice and save the nuclear power facility, Diablo Canyon Power Plant.
