Please do not rid the world of a nuclear plant right now!!
Fuels that cause Carbon emissions are far more dangerous and we don't have enough alternatives to do without non carbon nuclear energy.
If we want to do this later there may be alternatives.
Nuclear power plants are treated like they pose a dire threat like nuclear weapons. They are not anywhere near equivalent.

We may never need to get rid of nuclear power. Chernobyl was a freakish accident that has not been repeated and it did not kill very many people from the fall out.

It's more dangerous right now to get rid of nuclear power than to keep it.

Diane Warren
