## **21-ESR-01 - Diablo Nuclear power plant should remain open**

We are quickly entering the age where clean energy is our only option, unless we want to leave no future for our kids. Nuclear power is an important clean energy source that can help California meet their clean energy goals and I'm surprised we only have 1 nuclear power plant on our grid! We should definitely continue to operate the diablo canyon nuclear power plant as well as consider building others. This is important for our future!
