Closing down Diablo Canyon will be the worst climate decision California will make for years to come. Nuclear power is the safest, most reliable and dispatchable source of electricity we have, and renewables' performance are pathetic in comparison. What's worst about renewables is that they are materials and space-intensive, and return only intermittent power when the sun shines and the wind blows. Otherwise, and that means when there's peak demand they can't fulfill, it's GAS that takes over as backup, and that means fossil fuel pollution methane leakage.

WE NEED DIABLO CANYON'S GREAT POWER AND PLEASE DON'T PAY ATTENTION TO THE INCREDIBLY STUPID SO-CALLED ENVIRONMENTALIST ANTI-NUCLEAR VOICES, BECAUSE THEY ARE KILLING THE PLANET, EVEN THOUGH THEY THINK THEY'RE DO-GOODERS BY TRYING TO SHUT DOWN NUCLEAR. WE NEED MORE NUCLEAR IF WE ARE GOING TO HAVE ANY CHANCE WHATSOEVER!!!!

Thanks for your attention.

Sincerely,  
Keith Rodan
