Keep Diablo Canyon Power Plant Open

I am a member of the neighboring state of Arizona, and our grids are not disconnected. Please keep Diablo Canyon Power Plant open. This is inherently carbon free energy, approximately 1/6 of California's clean energy. This will not be replaced by inherently fluctuating wind and solar, and it will ultimately need to be replaced by fossil fuels. This would exacerbate the current climate crisis. Nuclear power is our best chance for a clean baseload of power in the state.
