We need to rethink reopening Diablo Canyon

To Whom It May Concern,

I implore you to not reopen Diablo Canyon Nuclear Power plant. Although I am against nuclear power in general- because of the dangers from production, no safe place to store waste, and disincentive to use renewables, my biggest concern is that you will be using the power grid that was destined to be part of the offshore wind project put together by Rep. Salud Carbajal. We deserve assurances that temporarily extending DCP operations will not jeopardize other renewable energy projects in our region, including the first-in-the-West offshore wind project slated for lease sale this fall, or the proposed designation of the Chumash Heritage National Marine Sanctuary.
