## **Don't do it**

Please do not grant the extension to Diablo Canyon Nuclear Plant. This plant is at the end of its life. The cooling system needs to be rebuilt at a great cost to do so. The spent fuel is still being stored on site after 40 plus years of operation. Renewable energy sources need to be built right now. We know how to do it so let's get busy and do it. PG and E can't be trusted. Have you forgotten how they handled the fires in California, all due to the poor maintenance of their power line and infrastructure. If anything goes wrong with Diablo the entire central coast will become uninhabitable. That will cost California Trillions of dollars and thousands of lives  
Glenn Forbes.
