My name is Autumn King and I am writing you in support of keeping Diablo Canyon Power Plant open. We need it's clean energy and should not have to shoulder the cost of early decommissioning or have to resort to using fuels like coal to replace (as if we could) the amount of power Diablo Canyon produces. Nuclear energy is clean energy, and as you can see in Europe, where unrest has made people really consider where their fuel is coming from, it is energy independence. We need more clean nuclear power plants, and we definitely don't need to shut down a perfectly good one.
Thank you for your time.
