## **Keep Diablo Canyon Commissioning 2024 and 2025**

Please keep Diablo Canyon Units One and Two on decommissioning schedule for 2024 and 2025. Much time, money and effort has been spent to achieve this decommissioning deadline. To not keep this deadline is to exhibit lack of faith in those who have been part of the effort to retire this aging dangerous plant which currently is using temporary spent nuclear fuel storage onsite with no permanent storage site in its future. Diablo Canyon as a 37 year operating nuclear plant has harmed the ocean through its one through cooling and sits on active earthquake faults. In order to show our faith that we can produce safe and effective energy for all Californians we must allow renewables and storage to provide 100% of our electricity. Please decommission Diablo canyon in 2024 and 2025.
