Shut Down Diablo Canyon Nuclear Power Plant

Dear CA Energy Commission:

Please shut down Diablo Canyon as scheduled by 2025 or sooner, if possible. CA has a history of earthquakes. Seismic volatility may be devastating to a nuclear power plant, the surrounding community, human life, animals, plants and groundwater. The cooling system is unlawful and storage of radioactive waste is dangerous.

Stop wasting money on nuclear energy systems.

Invest in renewables: solar, wind, biodiesel, etc.

Thank you for your immediate consideration.

Sincerely,
Karen Kaplan
Scotts Valley, CA 95066
